Reading Boileau:

Reading Boileau Robert T. Corum, 1998 In French literary history Nicolas Boileau 1636-1711 has enjoyed legendary status as the great codifier of French classicism the discerning critic who could demolish or elevate several generations of French poets This view of Boileau's role has led to an emphasis on his poetics not his poems which in turn has generated general disdain for his poetic art Robert Corum dispels these misconceptions about Boileau by focusing rigorous critical attention on Boileau's first nine Satires and the accompanying Discours au roy composed between 1657 and 1668 His reading takes into account a number of factors including sources genesis relation to one another coherence and continuity of argument This examination reveals Boileau to be a gifted poet not just a talented versifier or a strait laced mouthpiece for French classical doctrine

Boileau and the Nature of Neoclassicism Gordon Pocock, 1980-06-19 Boileau has traditionally been regarded as the spokesman of French neo-classicism but some elements of scholarship have discounted the importance of neo-classical doctrine in general and of Boileau's particular contribution to it Many critical approaches have stressed instead the liveliness and wit of Boileau's poems his love of language and his passionate temperament Mr Pocock uses these critical approaches to demonstrate in detail how Boileau's verve love of contrasts and essentially dramatic imagination animate the major poems But he also argues that such approaches do not in themselves suffice to explain Boileau's special qualities Neo-classicism was an important element in the intellectual life of Europe in the most critical period of the decline of Christianity and the rise of rationalism and science Mr Pocock proposes a reformulation of those views which take account not only of modern criticism but also of Boileau's commitment to neo-classicism and his embodiment of it in his work
