care **Bouncebacks! Critical Care** Michael B. Weinstock, Kevin M. Klauer, 2021-07-13 This edition of Bouncebacks Emergency Medicine books examines the bounceback visit putting the reader in the footsteps of the clinician as the patient deteriorates. The story pauses at important decision points as possible management strategies are reviewed in a literature based fashion followed by a revelation of the path chosen by the actual provider. As the patient's course progresses we reach additional decision points and address further clinical questions. In addition to our chapter authors many with expertise in critical care emergency medicine we have an all star lineup of expert whisperers first an EM critical care section editor below and second EMCRIOT.org's double boarded critical care guru Scott Weingart. Their comments are inserted in grey boxes and are intended to give tips and tricks borne of experience and to provide context to the literature as if they are standing over our shoulder and advising during a resuscitation. Additionally there are three chapters where we address the medical legal aspects of care. Enter Greg Henry MD past president of The American College of Emergency Physicians ACEP and one of the most experienced physician medical legal experts in the country. He opines on the approach that both the defense and plaintiff would likely pursue and by extension how we can make patients safer through our evaluation and documentation before there is an adverse outcome. Whereas these chapters contain the actual documentation from the ED chart a very few chapters have slight modifications to the final aspects of the return visit at decision point 3 to allow for exploration of different critical care scenarios. There is still plenty of commentary on the documentation missed red flags and what could have been done to improve care at the initial visit. Our goal is to make each chapter challenging dynamic and realistic to move us from standard of care to excellence in care. Book Review It's back it's Bouncebacks. One of the mostly widely read and highly regarded education series in all of Emergency Medicine. Clinicians fear the medical malpractice landscape but Mike Weinstock and the team give you all the tools you need to protect yourselves. Documentation people documentation.
