The Great Conversation Belden C. Lane, 2019-05-01 We are surrounded by a world that talks but we don't listen. We are part of a community engaged in a vast conversation but we deny our role in it. In the face of climate change, species loss, and vast environmental destruction, the ability to stand in the flow of the great conversation of all creatures and the earth can feel utterly lost to the human race. But Belden C. Lane suggests that it can and must be recovered, not only for the sake of endangered species and the well-being of at-risk communities but for the survival of the world itself. *The Great Conversation* is Lane's multi-faceted treatise on a spiritually centered environmentalism. At the core is a belief in the power of the natural world to act as teacher. In a series of personal anecdotes, Lane pairs his own experiences in the wild with the writings of saints and sages from a wide range of religious traditions. A night in a Missourian cave brings to mind the *Spiritual Exercises* of Ignatius of Loyola; the canyons of southern Utah elicit a response from the Chinese philosopher Laozi; 500,000 migrating sandhill cranes rest in Nebraska and evoke the Sufi poet Farid ud Din Attar. With each chapter, the humility of spiritual masters through the ages melds with the author's encounters with natural teachers to offer guidance for entering once more into a conversation with the world.

Migration and Education in a Multicultural World U. Kelly, 2009-02-16 Arising from the legacies of the twentieth century: unprecedented worldwide migration, unrelenting global conflict, and warring unchecked materialist consumption and unconscionable environmental degradation are important questions about the toll of loss, such changes exact individually and collectively. As large-scale and ubiquitous as these changes are, their deep specificity re-inscribes the importance of place as a critical construct. Attending to such specificity emphasizes the interconnections between contexts and broader movements and remains a prudent route to articulating critical interconnections among places and peoples in complex times. This book of essays turns to such specificity as a means to examine the inflections of migration on identity, displacement, disorientation, loss, and difference as sites of both regression and possibility. Fusing autobiography and cultural analysis, it provides a framework for a critical education attuned to such concerns.

Ralph Waldo Emerson Prentiss Clark, 2023-01-05 In his 1837 speech *The American Scholar*, Ralph Waldo Emerson noted that life is our dictionary, encapsulating a body of work that reached well beyond the American 19th century. This comprehensive study explores Emerson as a preacher, poet, philosopher, lecturer, essayist, and editor. There are nearly 100 entries on individual texts and their personal, historical, and literary contexts. Emerson's work is placed within his relationships with family members, fellow Transcendentalists, and transatlantic friends, and his commitment to ethics, self-culture, and social change. This book provides the fullest possible exploration of Emerson's writing and philosophy. Far ahead of his own time, the man enthusiastically questioned institutions, communities, friendships, history, individuality, and contemporaneous approaches to environmental stewardship.

Replenish Sandra Postel, 2017-10-10 Nothing is more important to life than water and no one knows water better than Sandra Postel Replenish is a wise sobering but ultimately hopeful book Elizabeth Kolbert Remarkable New York Times Book Review Clear eyed treatise Postel makes her case eloquently Booklist starred review An informative purposeful argument Kirkus We spend billions of dollars on irrigation dams sanitation plants and other feats of engineering to control water for our own prosperity What if the answer was not control but replenishment Sandra Postel takes readers around the world to explore water projects that work with rather than against nature s rhythms Forest rehabilitation is safeguarding drinking water farmers are planting cover crops to reduce polluted runoff and sponge cities are capturing rainwater to curb urban flooding Postel argues that efforts like these will be essential as we adjust to a hotter wilder climate Will we continue to fight the water cycle endangering ourselves and the planet or recognize our place in it and take advantage of the inherent services nature offers
