Development and

Diffusionism J. Dibua, 2015-12-04 This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development. It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities, Eurocentric diffusionism played a significant role in the failure of development planning.

Population and Food in the Early Twenty-first Century Nurul Islam, 1995-01-01 The IFPRI roundtable with its focus on the prospects of a long term balance between food demand and supply provided a link between the two conferences as the adequacy of food supply at affordable prices for future populations is a crucial element in a strategy designed to alleviate poverty and accelerate growth in the context of an increasing population.

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological. Low income countries are by definition those where such ingredients are missing. None of today's high income countries started its growth process with the required and complete list of growth ingredients. Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated and questioned. This volume, the second of the *Oxford Handbook of Africa and Economics*, reassesses the economic policies

and practices observed across the continent since independence. It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints. Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book.

At Christmas and on Rainy Days Margaret Grieco, Nana A. Agyepong, Jeff Turner, 1996. At Christmas and on rainy days, the women traders of Accra make use of taxis and other high cost forms of transport. On normal days, many transport their goods and themselves in overcrowded, poorly ventilated mini buses. This book examines the relationships between household organisation, petty trading and the informal public transport system. It documents the travel and transport strategies of Accra's female traders as they go about the task of household survival in a petty trading economy.

Management of Nitrogen and Phosphorus Fertilizers in Sub-Saharan Africa Uzo M. Mokwunye, Paul L.G. Vlek, 2012-12-06. Food security, one of the basic human rights, seems to be ever eluding the people of sub-Saharan Africa. With each occurrence of crop failure, agriculturalists around the world are reawakened to the challenge of ensuring stable adequate food production in the tropical African environments. The International Fertilizer Development Center (IFDC) with its mandate of alleviating food shortages through judicious use of fertilizers formulated a program to study fertilizer use strategies for sub-Saharan Africa. With generous financial assistance from the International Fund for Agricultural Development (IFAD), IFDC in collaboration with the International Crop Research Institute for the Semi-Arid Tropics (ICRISAT) and the International Institute for Tropical Agriculture (IITA) initiated a research project aimed at assessing means to remedy soil nutrient deficiencies that constrain food production in the humid, subhumid and semiarid tropics of Africa. The results of this project were summarized during a workshop held in Togo, March 25-28, 1985.

the proceedings of that meetings are found in this volume The project established collaboration with numerous national programs that were responsible for much of the data collection The data presented in Chapters 6 and 9 include much of this information We wish to acknowledge the contribution of the individual scientists J T Ambe F Ganry M Gaoh M Issaka J Kiazolu J Kikafunde Twine K Kpombrekou F Lompo H
