Hearings on National Defense Authorization Act for Fiscal Year 1998--H.R. 1119 and Oversight of Previously Authorized Programs Before the Committee on National Security, House of Representatives, One Hundred Fifth Congress, First Session United States. Congress. House. Committee on National Security. Subcommittee on Military Research and Development,1997 **Technological Change and the Future of Warfare** Michael E. O'Hanlon,2011-04-01

In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia **Circular** United States.
