Looking Ahead Independent School Issues And Answers:

On Privilege, Fraudulence, and Teaching As Learning Peggy McIntosh, 2019-07-04 From one of the world's leading voices on white privilege and anti-racism work comes this collection of essays on complexities of privilege and power. Each of the four parts illustrates Peggy McIntosh's practice of combining personal and systemic understandings to focus on power in unusual ways. Part I includes McIntosh's classic and influential essays on privilege or systems of unearned advantage that correspond to systems of oppression. Part II helps readers to understand that feelings of fraudulence may be imposed by our hierarchical cultures rather than by any actual weakness or personal shortcomings. Part III presents McIntosh's Interactive Phase Theory highlighting five different world views or attitudes about power that affect school curriculum, cultural values, and decisions on taking action. The book concludes with powerful insights from SEED, a peer-led teacher development project that enables individuals and institutions to work collectively toward equity and social justice. This book is the culmination of forty years of McIntosh's intellectual and organizational work.

Tracing the threads Kelly J.D. Waldron, 2009-01-01 This text is a postmodern historical analysis that seeks to trouble the distinction between the private and the public that is traditionally drawn in educational history and theory by examining the histories of public schools and independent schools around the topics of identity, politics, accountability, and globalization. This work is unique in its focus on the histories of independent schoolings as being in dialogue with those of public schooling. Through a historical and theoretical examination of the dialogical space in between the private/public divide in education around these three interrelated topics, this work seeks to trouble the private/public distinction, exploring the possibilities and futurities for curriculum work and education in the postmodern space in between public schools and independent schools. It raises questions regarding what defines the structures of schooling in the United States as well as how contrasts between public and private spaces question traditional notions of democratic education.

Love's Return Gail M. Boldt, Paula M. Salvio, 2012-11-12 The idea that teachers love children is often taken for granted in education. Rarely is the idea of love itself examined. Bringing together the work of educators, curriculum theorists, and clinical psychoanalysts and drawing upon autobiographical and narrative case studies, this groundbreaking collection examines the collision of love and learning, including the ways in which such intersections are provoked, repressed, and denied. Contributors turn to psychoanalysis to explore questions of love in all of its varying permutations: ambivalence, sexuality, hatred, desire, projection, and loss, in order to demonstrate how the social ramifications of such work is critical to the ways teachers are currently being prepared for life in the classroom.
