Grammar Vol 1 I P Attarde, Fostering Language Teaching Efficiency through Cognitive Linguistics Sabine De Knop, Frank Boers, Antoon De Rycker, 2010-09-27 In contexts of instructed second language acquisition there is a need for teaching methods that are optimally efficient i.e. teaching interventions that generate a maximal return on learners and teachers' investment of time and effort In the past couple of decades many researchers have argued that insights from Cognitive Linguistics CL when suitably translated for pedagogical purposes can make a major contribution to fostering such language teaching efficiency This collective volume assesses and supplements those CL proposals The first part of the book positions CL inspired language pedagogy vis-à-vis recent trends in mainstream applied linguistics and illustrates through several case studies that language focused instruction including CL inspired instruction is a useful if not indispensable complement to learner autonomous incidental acquisition The second part demonstrates how CL research can help pedagogues identify hitherto neglected language elements that merit explicit targeting in second language instruction The third part consists of contributions that put the pedagogical efficiency of several CL inspired interventions to the test in classroom experiments Additions to the currently available armoury of teaching methods are proposed The kinds of target language items under examination in the book range from single words over multiword units to grammar patterns

Throughout the volume illustrates how much pedagogy oriented Cognitive Linguistics has matured in recent years
