Climate Management Issues Julie K. Gines,2011-12-14 Despite all the controversy and hype that climate change has generated there now exists an overwhelming body of scientific evidence that the problem is real and that its effects are already being felt on a global scale Part of what makes this a volatile and controversial issue is that it is not just confined to the realms of the scientific community nor does it have just one simple predefined solution it has multifaceted dimensions involving economic sociological political psychological and personal issues making this a topic that affects every person on earth now and in the future Connecting the dots Climate Management Issues Economics Sociology

and Politics is the first book to propose a truly comprehensive solution to effectively deal with climate change in both the short and long term. It reaches across diverse sectors of society to link issues in climate change management and offer new insights into the complex interrelationships. As the author emphasizes, climate change extends far beyond the physical sciences to affect lifestyles, cultural values, political systems, economics, and health. An overview of the physical science of climate change gives readers a firm understanding of the concepts they need for policy and decision making, sociological applications, and community leadership. The book then focuses on multifaceted aspects such as international cooperation, journalistic balance, human psychology, international policy, national security, socioeconomic impacts, agricultural conservation, healthcare, the economics of mitigation, climate modeling, and error amplification. This timely volume puts on center stage those crucial ideas that are usually overlooked, misunderstood, or lost in media sensationalism. Enlightening and empowering readers, it looks at the decisions that must be made to mitigate climate change problems before irreversible damage is done.

Documents Council of Europe: Parliamentary Assembly, 2004-04-15 **Intellectual Property in Asian Emerging Economies** Mr Assafa Endeshaw, 2013-02-28 This book critically reviews the recurrent debate on Intellectual Property law and policy in developing countries carried out in the last decade. It identifies the still unresolved policy issues and proposes alternative approaches that resonate with the needs for transformation of the economic and social reality of developing countries. Focusing on emerging economies in Asia, the work draws the wider lessons to be learnt by researchers, policy makers, legislators, and the business sector in general and concludes by putting forward proposals for reform. **The Statesman's Yearbook 2013** B. The Liberalization of Maritime Transport Services Benjamin Parameswaran, 2012-12-06 Despite multiple efforts on the bilateral, regional, and multilateral level to create uniform or at least harmonized rules for commercial operations and practices in the maritime transport sector and to liberalize maritime transport services by tearing down the barriers that exist in that sector, there is until today no global regime regulating or rather deregulating the supply of maritime transport services and ensuring open markets. In this situation, private economic actors are confronted with substantial legal uncertainty. This book provides a detailed analysis of the history of maritime transport services in the Uruguay and post Uruguay Round negotiations and the role of the sector in the ongoing Doha Round talks where Member States have the opportunity to work towards a global regime ensuring the progressive liberalization of the sector. The reader will be confronted with an extensive overview of the role of maritime transport services in the WTO GATS framework, a topic basically uncovered in the literature so far. **Population Ageing in Central and Eastern Europe** Andreas Hoff, 2016-04-08 During the 1990s, Europe became the first continent with a mature society where people aged 60 years and

older outnumber children and as this trend continues the resulting ageing societies will differ from previous societies in their make up in their needs and in their resource allocation Population ageing poses an even greater challenge to the post communist societies of Central and Eastern Europe While still struggling to cope with the aftermath of the economic and social transition process following the breakdown of communism they are now facing even more rapid demographic change than Western Europe This book brings together leading scholars to present an understanding of the processes underlying the very rapid population ageing in Central and Eastern Europe In addition to discussing the main demographic drivers behind this development in each of the countries examined this volume also discusses its implications for policy healthcare provision workforces intergenerational family relations the social cohesion of future Central and Eastern European societies and the quality of life experienced by their citizens Organised around broad geographical regions with final sections analysing the book s findings and their future implications Population Ageing in Central and Eastern Europe will be of interest to gerontologists policy makers students and scholars of population change [The Statesman's Yearbook 2009](#) B.
