Jay Moon,2017-12-05 This addition to an acclaimed series brings cutting edge research to bear on a topic of perennial interest making disciples The book looks at disciple making from multiple cultures to help readers discover contextual approaches that are culturally relevant and biblically faithful It emphasizes methods that are especially effective with contemporary converts and includes practical examples from around the world Each chapter includes sidebars discussion questions an activity for discipling and a case study An appendix contains further suggestions and exercises for instructors *Role Transitions* Vernon L. Allen,Evert van de Vliert,2012-12-06 The concept of role transition refers to a wide range of experiences found in life job change unemployment divorce entering or leaving prison retirement immigration Gastarbeiten becoming a parent and so on Such transitions often produce strain and hence a variety of problems for the transiting individual occupants of complementary social positions and other members of one's social group and community In spite of the diversity of role transitions that occur however it is important also to realize that many basic psychological processes can be discerned in ostensibly different instances Research on role transitions has been dispersed across many different subdisciplines of the social sciences the problem can be investigated from several points of view and levels of analysis As modern societies become ever more complex role transitions can be expected to increase in number and diversity with a concomitant increase in detrimental consequences for the individual and society Hence for reasons of both theory and practice improved conceptual models and new empirical data are needed The chapters in this book are the outcome of a NATO symposium convened for the purpose of discussing aspects of role transitions from international and interdisciplinary perspectives The meeting was designed to be a working conference to facilitate as much intellectual exchange and debate among participants as possible *Counseling Adults in Transition* Nancy K. Schlossberg,2005-11 **Evolution and the Levels of Selection** Samir Okasha,2006-11-16 Does natural selection act primarily on individual organisms on groups on genes or on whole species The question of levels of selection on which biologists and philosophers have long disagreed is central to evolutionary theory and to the philosophy of biology Samir Okasha's comprehensive analysis gives a clear account of the philosophical issues at stake in the current debate **The Major Transitions in Evolution Revisited** Brett

Calcott, Kim Sterelny, 2011-04-22 Drawing on recent advances in evolutionary biology prominent scholars return to the question posed in a pathbreaking book how evolution itself evolved In 1995 John Maynard Smith and E rs Szathm ry published their influential book *The Major Transitions in Evolution* The transitions that Maynard Smith and Szathm ry chose to describe all constituted major changes in the kinds of organisms that existed but most important these events also transformed the evolutionary process itself The evolution of new levels of biological organization such as chromosomes cells multicelled organisms and complex social groups radically changed the kinds of individuals natural selection could act upon Many of these events also produced revolutionary changes in the process of inheritance by expanding the range and fidelity of transmission establishing new inheritance channels and developing more open ended sources of variation Maynard Smith and Szathm ry had planned a major revision of their work but the death of Maynard Smith in 2004 prevented this In this volume prominent scholars including Szathm ry himself reconsider and extend the earlier book s themes in light of recent developments in evolutionary biology The contributors discuss different frameworks for understanding macroevolution prokaryote evolution the study of which has been aided by developments in molecular biology and the complex evolution of multicellularity
