Advanced Research Instrumentation and Facilities Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Advanced Research

Instrumentation,2007-01-28 In recent years the instrumentation needs of the nation's research communities have changed and expanded The need for particular instruments has become broader crossing scientific and engineering disciplines The growth of interdisciplinary research that focuses on problems defined outside the boundaries of individual disciplines demands more instrumentation Instruments that were once of interest only to specialists are now required by a wide array of scientists to solve critical research problems The need for entirely new types of instruments such as distributed networks cybertools and sensor arrays is increasing Researchers are increasingly dependent on advanced instruments that require highly specialized knowledge and training for their proper operation and use The National Academies Committee on Science Engineering and Public Policy Committee on Advanced Research Instrumentation was asked to describe the current programs and policies of the major federal research agencies for advanced research instrumentation the current status of advanced mid sized research instrumentation on university campuses and the challenges faced by each The committee was then asked to evaluate the utility of existing federal programs and to determine the need for and if applicable the potential components of an interagency program for advanced research instrumentation **Grants** Jean M. Fromm,2007 Grants are available from thousands of sources both private and public To the grantseeker however this wealth of sources appears like an impenetrable jungle Where are the grants I need and what do I need to do to submit my ideas and proposals This book is designed to answer these questions by aiming the grantseeker to both the grant givers and by providing a bibliography of book for further research **Cell Biology** Maika G. Mitchell,2016-01-16 Cell Biology Translational Impact in Cancer Biology and Bioinformatics provides insight into the implications for cell cycle regulation and cell proliferation in cancer growth and dissemination Offering guidance for techniques and tools to help with diagnosis this publication provides users with a broad view of this research area and is also useful for both early and experienced researchers across cell biology cancer research molecular biology and in clinical and translational science Offers insight into how cell cycle and cell division relates to cancer biology Emphasizes flow cytometry and other cell biology techniques for diagnosis Includes recommendations for integration and analyzation of molecular and clinical data *Funding Science in America* James D. Savage,2000-11-06 Funding Science in America first published in 1999 explores the pros and cons of the academic earmarking issue **FastLane** Thomas J. Misa,Jeffrey R. Yost,2016-01-15 The unique history and development of FastLane the central nervous system of the National Science Foundation Since 2000 the National Science Foundation has depended upon its pioneering FastLane e government system to manage grant applications peer reviews and reporting In this behind the scenes account Thomas J Misa and Jeffrey R Yost examine how powerful forces of science and computing came together to create this influential grant management system assessing its impact on cutting edge scientific research Why did the NSF create FastLane and how did it anticipate the development of web based e commerce What technical challenges did the glitch prone early system present Did the switch to electronic grant proposals disadvantage universities with fewer resources And how did the scientific community

help shape FastLane Foregrounding the experience of computer users the book draws on hundreds of interviews with
 scientific researchers sponsored project administrators NSF staff and software designers developers and managers 1977
