her beloved educator art critic author and painter husband Philip Leslie Hale A woman Hale far outpaced the success of many men including her husband During her early decades of activity Hale garnered innumerable national awards accolades and prizes and international acclaim for her oil portraits of children women in interiors and charcoal sketches of snowy landscapes all created in an Impressionist style utilizing only vertical strokes Hale was the originator and sole practitioner of a technique which paradoxically used line in an Impressionist manner While her classic art fell out of favor during the Modernist 1940s and later it is now once again very much in vogue My relationship with the artist's only child her daughter Nancy was of immeasurable assistance in the production of this book Diane Elizabeth Kelleher Shrewsbury Massachusetts 2013

Art as Abstract Machine Stephen Zepke, 2014-02-04 The aim of this book is to understand what Deleuze and Guattari mean by art Stephen Zepke argues that art in their account is an ontological term and an ontological practice that results in a new understanding of aesthetics For Deleuze and Guattari understanding what art is means understanding how it works what it does how it becomes and finally how it lives This book illuminates these philosophers discussion of ontology from the viewpoint of art and vice versa in a thorough questioning of aesthetic criteria as they are normally understood

Bruce Elder, 2018-06-30 Cubism and futurism were closely related movements that vied with each other in the economy of renown Perception dynamism and the dynamism of perception these were the issues that passed back and forth between the two Cubism and Futurism Spiritual Machines and the Cinematic Effect shows how movement became in the traditional visual arts a central factor with the advent of the cinema gone were the days when an artwork strived merely to lift experience out the realm of change and flow The cinema at this time was understood as an electric art akin to X rays coloured light and sonic energy In this book celebrated filmmaker and author Bruce Elder connects the dynamism that the cinema made an essential feature of the new artwork to the new science of electromagnetism Cubism is a movement on the cusp of the transition from the Cartesian world of standardized Cartesian coordinates and interchangeable machine parts to a Galvanic world of continuities and flows In contrast futurism embraced completely the emerging electromagnetic view of reality Cubism and Futurism examines the similarity and differences between the two movements engagement with the new science of energy and shows that the notion of energy made central to the new artwork by the cinema assumed a spiritual dimension as the cinema itself came to be seen as a pneumatic machine
