No-code Ai: Concepts And Applications In Machine Learning, Visualization, And Cloud Platforms Minsoo Kang, Park Sung Yul, Myeong-ae Chung, Dong-hun Han, 2024-07-19 This book is a beginner friendly guide to artificial intelligence AI ideal for those with no technical background It introduces AI machine learning and deep learning basics focusing on no code methods for easy understanding The book also covers data science data mining and big data processing maintaining a no code approach throughout Practical applications are explored using no code platforms like Microsoft Azure Machine Learning and AWS SageMaker Readers are guided through step by step instructions and real data examples to apply learning algorithms without coding Additionally it includes the integration of business intelligence tools like Power BI and AWS QuickSight into machine learning projects This guide bridges the gap between AI theory and practice making it a valuable resource for beginners in the field

New-Product Diffusion Models Vijay Mahajan, Eitan Muller, Yoram Wind, 2000-09-30 Product sales especially for new products are influenced by many factors These factors are both internal and external to the selling organization and are both controllable and uncontrollable Due to the enormous complexity of such factors it is not surprising that product failure rates are relatively high Indeed new product failure rates have variously been reported as between 40 and 90 percent Despite this multitude of factors marketing researchers have not been deterred from developing and designing techniques to predict or explain the levels of new product sales over time The proliferation of the internet the necessity or developing a road map to plan the launch and exit times of various generations of a product and the shortening of product life cycles are challenging firms to investigate market penetration or innovation diffusion models These models not only provide information on new product sales over time but also provide insight on the speed with which a new product is being accepted by various buying groups such as those identified as innovators early adopters early majority late majority and laggards New Product Diffusion Models aims to distill synthesize and integrate the best thinking that is currently available on the theory and practice of new product diffusion models This state of the art assessment includes contributions by individuals who have been at the forefront of developing and applying these models in industry The book's twelve chapters are written by a combined total of thirty two experts who together represent twenty five different universities and other organizations in Australia Europe Hong Kong Israel and the United States The book will be useful for researchers and students in marketing and technological forecasting as well as those in other allied disciplines who study relevant aspects of

innovation diffusion Practitioners in high tech and consumer durable industries should also gain new insights from New Product Diffusion Models The book is divided into five parts I Overview II Strategic Global and Digital Environments for Diffusion Analysis III Diffusion Models IV Estimation and V Applications and Software The final section includes a PC based software program developed by Gary L Lilien and Arvind Rangaswamy 1998 to implement the Bass diffusion model A case on high definition television is included to illustrate the various features of the software A free 15 day trial access period for the updated software can be downloaded from <http://www.mktgeng.com/diffusionbook> Among the book's many highlights are chapters addressing the implications posed by the internet globalization and production policies upon diffusion of new products and technologies in the population **Applied Machine Learning and AI for Engineers** Jeff Prosise, 2022-11-10 While many introductory guides to AI are calculus books in disguise this one mostly eschews the math Instead author Jeff Prosise helps engineers and software developers build an intuitive understanding of AI to solve business problems Need to create a system to detect the sounds of illegal logging in the rainforest analyze text for sentiment or predict early failures in rotating machinery This practical book teaches you the skills necessary to put AI and machine learning to work at your company Applied Machine Learning and AI for Engineers provides examples and illustrations from the AI and ML course Prosise teaches at companies and research institutions worldwide There's no fluff and no scary equations just a fast start for engineers and software developers complete with hands on examples This book helps you Learn what machine learning and deep learning are and what they can accomplish Understand how popular learning algorithms work and when to apply them Build machine learning models in Python with Scikit Learn and neural networks with Keras and TensorFlow Train and score regression models and binary and multiclass classification models Build facial recognition models and object detection models Build language models that respond to natural language queries and translate text to other languages Use Cognitive Services to infuse AI into the apps that you write **Titanic 100th Anniversary Edition** Stephanie Barczewski, 2012-02-09 An anniversary edition of a highly regarded account of the world's most notorious tragedy at sea *Machine Learning in the AWS Cloud* Abhishek Mishra, 2019-09-11 Put the power of AWS Cloud machine learning services to work in your business and commercial applications Machine Learning in the AWS Cloud introduces readers to the machine learning ML capabilities of the Amazon Web Services ecosystem and provides practical examples to solve real world regression and classification problems While readers do not need prior ML experience they are expected to have some knowledge of Python and a basic knowledge of Amazon Web Services Part One introduces readers to fundamental machine learning concepts You will learn about the types of ML systems how they are used and challenges you may face with ML solutions Part Two focuses on machine learning services provided by Amazon Web Services You'll be introduced to the basics of cloud computing and AWS offerings in the cloud based machine learning space Then you'll learn to use Amazon Machine Learning to solve a simpler class of machine learning problems and Amazon SageMaker to solve more complex problems Learn techniques that allow you

to preprocess data basic feature engineering visualizing data and model building Discover common neural network frameworks with Amazon SageMaker Solve computer vision problems with Amazon Rekognition Benefit from illustrations source code examples and sidebars in each chapter The book appeals to both Python developers and technical solution architects Developers will find concrete examples that show them how to perform common ML tasks with Python on AWS Technical solution architects will find useful information on the machine learning capabilities of the AWS ecosystem

Titanic John P. Eaton, Charles A. Haas, 1999 An illustrated chronology of the Titanic providing details about the people and events related to the ship from its conception construction and testing through the exploration and exhibition of the wreckage *Explanatory Model Analysis* Przemyslaw Biecek, Tomasz Burzykowski, 2021-02-15 Explanatory Model Analysis Explore Explain and Examine Predictive Models is a set of methods and tools designed to build better predictive models and to monitor their behaviour in a changing environment Today the true bottleneck in predictive modelling is neither the lack of data nor the lack of computational power nor inadequate algorithms nor the lack of flexible models It is the lack of tools for model exploration extraction of relationships learned by the model model explanation understanding the key factors influencing model decisions and model examination identification of model weaknesses and evaluation of model s performance This book presents a collection of model agnostic methods that may be used for any black box model together with real world applications to classification and regression problems **Automotive Industries** ,1914 *Automobile Trade Journal* ,1914 *Safety and Reliability: Methodology and Applications* Tomasz Nowakowski, Marek Mlynczak, Anna Jodejko-Pietruczuk, Sylwia Werbinska-Wojciechowska, 2014-09-01 Within the last fifty years the performance requirements for technical objects and systems were supplemented with customer expectations quality abilities to prevent the loss of the object properties in operation time reliability and maintainability protection against the effects of undesirable events safety and security and the ability to Data Mining and Statistics for Decision Making Stéphane Tufféry, 2011-03-23 Data mining is the process of automatically searching large volumes of data for models and patterns using computational techniques from statistics machine learning and information theory it is the ideal tool for such an extraction of knowledge Data mining is usually associated with a business or an organization s need to identify trends and profiles allowing for example retailers to discover patterns on which to base marketing objectives This book looks at both classical and recent techniques of data mining such as clustering discriminant analysis logistic regression generalized linear models regularized regression PLS regression decision trees neural networks support vector machines Vapnik theory naive Bayesian classifier ensemble learning and detection of association rules They are discussed along with illustrative examples throughout the book to explain the theory of these methods as well as their strengths and limitations Key Features Presents a comprehensive introduction to all techniques used in data mining and statistical learning from classical to latest techniques Starts from basic principles up to advanced concepts Includes many step by step examples with the main software R SAS IBM SPSS as well as

a thorough discussion and comparison of those software Gives practical tips for data mining implementation to solve real world problems Looks at a range of tools and applications such as association rules web mining and text mining with a special focus on credit scoring Supported by an accompanying website hosting datasets and user analysis Statisticians and business intelligence analysts students as well as computer science biology marketing and financial risk professionals in both commercial and government organizations across all business and industry sectors will benefit from this book

Logistic Regression Models Joseph M. Hilbe, 2009-05-11 Logistic Regression Models presents an overview of the full range of logistic models including binary proportional ordered partially ordered and unordered categorical response regression procedures Other topics discussed include panel survey skewed penalized and exact logistic models The text illustrates how to apply the various models

Machine Learning Automation with TPOT Dario Radecic, 2021-05-07 Discover how TPOT can be used to handle automation in machine learning and explore the different types of tasks that TPOT can automate Key Features Understand parallelism and how to achieve it in Python Learn how to use neurons layers and activation functions and structure an artificial neural network Tune TPOT models to ensure optimum performance on previously unseen data Book Description The automation of machine learning tasks allows developers more time to focus on the usability and reactivity of the software powered by machine learning models TPOT is a Python automated machine learning tool used for optimizing machine learning pipelines using genetic programming Automating machine learning with TPOT enables individuals and companies to develop production ready machine learning models cheaper and faster than with traditional methods With this practical guide to AutoML developers working with Python on machine learning tasks will be able to put their knowledge to work and become productive quickly You ll adopt a hands on approach to learning the implementation of AutoML and associated methodologies Complete with step by step explanations of essential concepts practical examples and self assessment questions this book will show you how to build automated classification and regression models and compare their performance to custom built models As you advance you ll also develop state of the art models using only a couple of lines of code and see how those models outperform all of your previous models on the same datasets By the end of this book you ll have gained the confidence to implement AutoML techniques in your organization on a production level What you will learn Get to grips with building automated machine learning models Build classification and regression models with impressive accuracy in a short time Develop neural network classifiers with AutoML techniques Compare AutoML models with traditional manually developed models on the same datasets Create robust production ready models Evaluate automated classification models based on metrics such as accuracy recall precision and f1 score Get hands on with deployment using Flask RESTful on localhost Who this book is for Data scientists data analysts and software developers who are new to machine learning and want to use it in their applications will find this book useful This book is also for business users looking to automate business tasks with machine learning Working knowledge of the Python programming language and beginner

level understanding of machine learning are necessary to get started **Titanic** Kevin S. Sandler, Gaylyn Studlar, 1999 In 1997 James Cameron's Titanic became the first motion picture to earn a billion dollars worldwide These essays ask the question What made Titanic such a popular movie Why has this film become a cultural and film phenomenon What makes it so fascinating to the film going public
