the arts of the fin de siècle with an aura of expectancy challenging them to induce musical effects by their own means. With each art aspiring to produce the effects of another artistic medium, a synesthetic yearning ran like a shiver through the body of art that would emerge over the next half century. Rasula traces this pan-arts polyphony from German Romantic theory to early experiments in visual music encompassing such diverse phenomena as American fixation on Arcadia, early film theory, and the lure of the fourth dimension. All the while he keeps focus on the paramount historical consequence in elevating music to a new universal aesthetic standard, arguing that Wagnerism was first among modernisms. In surveying this momentous interplay among arts, History of a Shiver ranges from literature, music, and painting to theatre, cinema, dance, photography, and civic pageantry. It retells the story of modernism by recovering not an idea but a feeling, the hair-raising potential for each painting, literary text, or musical composition to herald an unprecedented domain of human enterprise.
