Public Relations, 2007

Celebrity Advocacy and International Development Dan Brockington, 2014-04-03 Celebrity advocacy is a curious phenomenon It occupies a significant proportion of the public domain but does so without engaging particularly well with much of the public Yet this may not matter very much Many people at the core of advocacy and in political and business elites simply do not notice any lack of engagement In these circles celebrity advocacy can be remarkably effective Celebrity Advocacy and International Development examines the work of celebrity advocacy and lobbying in international development Its purpose is to understand the alliances resulting their history consequences wider contexts and implications It argues that celebrity advocacy signals a new aspect of elite rule For populist celebrity advocacy can mark ironically a disengagement between the public and politics and particularly the public and civil society Recognising this poses new challenges but also presents new opportunities for the development movement This book gives students and researchers in development studies and media studies a wealth of original empirical data including interviews across the NGO sector media and celebrity industries newspaper analysis large surveys of public opinion and focus group research

Silences in NGO Discourse Issa G. Shivji, 2007-06-30 One of the most articulate critics of the destructive effects of neoliberal policies in Africa and in particular of the ways in which they have eroded the gains of independence, Issa Shivji shows in two extensive essays in this book that the role of NGOs in Africa cannot be understood without placing them in their political and historical context. As structural adjustment programs were imposed across Africa in the 1980s and 1990s, the international financial institutions and development agencies began giving money to NGOs for programs to minimize the more glaring inequalities perpetuated by their policies. As a result, NGOs have flourished and played an unwitting role in consolidating the neoliberal hegemony in Africa. Shivji argues that if social policy is to be determined by citizens rather than the donors, African NGOs must become catalysts for change rather than the catechists of aid that they are today.

Documents of the Christian Church Henry Bettenson, Chris Maunder, 2011-09-29 This selection of writings from the most important moments in the history of Christianity has become established as a classic reference work providing insights into 2000 years of Christian theological and political debate. While retaining the original material selected by Henry Bettenson, Chris Maunder has added a substantial section of more recent writings. These illustrate the Second Vatican Council, the theologies of liberation, Church and State from Thatcher's Britain to Communist Eastern Europe, Black feminist and ecological theology, ecumenism and interfaith dialogue. The emphasis on moral debate in the contemporary churches is reflected in selections discussing questions about homosexuality, divorce, AIDS, and in vitro fertilization, amongst other issues. This further expanded fourth edition brings the anthology up to date with a new section looking at issues facing the twenty-first century churches. This includes extracts exploring the churches' responses to questions of social justice, international politics, trade and debt, environmental change, and technological development. New material also covers the global growth of Christianity, the progress of Christian unity and mission in multi-faith and postmodern societies.

Landmarks for Sustainability Wayne Visser, 2017-11-30 Landmarks for Sustainability is a high impact, quick reference guide to many of the most critical events and initiatives that have shaped our world and the sustainable development agenda over the past 20 years and more. These include high profile historic events such as the Exxon Valdez oil spill, the Rio Earth Summit, the anti-globalisation protests in Seattle and Genoa, and the collapse of Enron, as well as more subtle but no less important developments such as trends in fairtrade, ethical codes, and sustainable investment. By shining a spotlight on these and other landmark events and initiatives, the book draws into sharp relief the most significant social and environmental challenges of our time, from climate change and the state of the planet to poverty and corruption. Equally importantly, however, more than half of the book is dedicated to constructive global responses, such as the boom in clean technology, the role of the World Economic and World Social Forums, and the growth of ISO 14001 and SA8000 standards. Each of the 20 chapters follows a similar, easy access, full colour design with inspiring quotations, compelling

Education and International Development 2000 2020 A Constructivist Critique of the One size fits all Liberal Model advances the claim that there exists a liberal theory of international education Ian Wash argues that the assumed harmony of this model is the main source of dispute in the field of education and international development The liberal thinking behind the aspirations for education the political levers necessary for its effective governance and the ideas behind the policies all have contributed towards growing tensions that prevented international education from achieving optimal functionality Through a qualitative discourse analysis of the key policy documents produced between 2000 and 2020 Wash reveals how the liberal model was discursively constructed as a grand narrative of three acts that chronicles the vision process and outcomes of international education Such a rendering brings an understanding of the hidden conflicts essential for finding a resolution to this policy puzzle thereby improving the prosperity and wellbeing of those in poorer countries My Revision Notes: AQA GCSE Citizenship Studies Mike Mitchell,2012-05-18
