Making A Living In The Middle Ages The People Of Britain 850 15:

Making a Living in the Middle Ages Christopher Dyer, 2003-08-11 Dramatic social and economic change during the middle ages altered the lives of the people of Britain in far reaching ways from the structure of their families to the ways they made their livings In this masterly book preeminent medieval historian Christopher Dyer presents a fresh view of the British economy from the ninth to the sixteenth century and a vivid new account of medieval life He begins his volume with the formation of towns and villages in the ninth and tenth centuries and ends with the inflation population rise and colonial expansion of the sixteenth century This is a book about ideas and attitudes as well as the material world and Dyer shows how people regarded the economy and responded to economic change He examines the growth of towns the clearing of lands the Great Famine the Black Death and the upheavals of the fifteenth century through the eyes of those who experienced them He also explores the dilemmas and decisions of those who were making a living in a changing world from peasants artisans and wage earners to barons and monks Drawing on archaeological and landscape evidence along with more conventional archives and records the author offers here an engaging survey of British medieval economic history unrivaled in breadth and clarity

The Economy of Medieval Wales, 1067-1536 Matthew Frank Stevens, 2019-10-01 This book surveys the economy of Wales from the first Norman intrusions of 1067 to the Act of Union of England and Wales in 1536 Key themes include the evolution of the agrarian economy the foundation and growth of towns the adoption of a money economy English colonisation and economic exploitation the collapse of Welsh social structures and rise of economic individualism the disastrous effect of the Glyndŵr rebellion and ultimately the alignment of the Welsh economy to the English economy Comprising four chapters a narrative history is presented of the economic history of Wales 1067 1536 and the final chapter tests the applicability in a Welsh context of the main theoretical frameworks that have been developed to explain long term economic and social change in medieval Britain and Europe

A Cultural History of Work in the Medieval Age Valerie L. Garver, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities Work was central to medieval life Religious and secular authorities generally expected almost everyone to work Artistic and literary depictions underlined work's cultural value The vast majority of medieval people engaged in agriculture because it was the only way they could obtain food Yet their work led to innovations in technology and production and allowed others to engage in specialized labor helping to drive the growth of cities Many workers moved to seek employment and to improve their living conditions For those who could not work charity was often available and many individuals and institutions provided forms of social welfare Guilds protected their members and created means for the transmission of skills When they were not at work medieval Christians were to meet their religious obligations yet many also enjoyed various pastimes A consideration of medieval work is therefore one of medieval society in all its creativity and complexity and that is precisely what this volume provides A Cultural History of Work in the Medieval Age presents an overview of the period with essays on economies

Medieval Monks and Monasteries Hunt Janin,Ursula Carlson,2023-03-01 The Middle Ages in Western Europe extended from roughly 500 to 1500 c e During these thousand years hundreds of monastic communities were founded and played important roles in religious economic social literary and even military realms Each had different emphases and goals ranging from aristocratic monasteries and nunneries that offered comfort and security to rural institutions that specialized only in the most ascetic lifestyles This book has two goals The first is to detail the most significant monastic and secular events of the Middle Ages in Western Europe such as the decline of the Roman Catholic Church the rise of Protestantism and the various types and purposes of monasteries and nunneries The second is to introduce some notable and unusual individuals who made their mark upon the Middle Ages such as Eustache the French monk who became a pirate and made a pact with the Devil

Contesting the Middle Ages John Aberth,2018-10-03 *Contesting the Middle Ages* is a thorough exploration of recent arguments surrounding nine hotly debated topics the decline and fall of Rome the Viking invasions the Crusades the persecution of minorities sexuality in the Middle Ages women within medieval society intellectual and environmental history the Black Death and lastly the waning of the Middle Ages The historiography of the Middle Ages a term in itself controversial amongst medieval historians has been continuously debated and rewritten for centuries In each chapter John Aberth sets out

key historiographical debates in an engaging and informative way encouraging students to consider the process of writing about history and prompting them to ask questions even of already thoroughly debated subjects such as why the Roman Empire fell or what significance the Black Death had both in the late Middle Ages and beyond Sparking discussion and inspiring examination of the past and its ongoing significance in modern life Contesting the Middle Ages is essential reading for students of medieval history and historiography

The Late Medieval Interlude Fiona S. Dunlop, 2007 Sensitive study of the 15-16 century interlude focussing on one of its major concerns the depiction of male aristocracy and the development to maturity The commercial theatre of the late sixteenth century is often credited with introducing its audiences to new modes of thought about the self society and the nation making them conscious that the self is performed as an actor performs a role Yet the earlier interlude drama originally performed in households and other institutions of the late fifteenth and sixteenth centuries indicates that the late medieval period was fully aware of the theatricality of identity This book argues that ideas of performance inform the concepts of aristocratic masculinity developed in the plays *Nature Fulgens* and *Lucretia* *The World and the Child* *The Interlude of Youth* and *Calisto and Melebea* It examines how the depiction of young male aristocrats in these texts is shaped by ideas of male youth constituted in the middle ages and shows them as failing or succeeding to perform an adult noble masculinity in the aristocratic body and in aristocratic household The book also suggests ways in which the plays offer discreet praise and censure of the manner in which their noble patrons performed as aristocrats Throughout it brings out the subtle qualities of the interludes which the author shows have been unjustly neglected
