In *Making Modern Mothers*, anthropologist Heather Paxson investigates how "experts," such as family planners, demographers, policy-makers, and three generations of urban Greek women explain the paradox of a "family-oriented" culture having one of the highest abortion rates and one of the lowest fertility rates in the European Union. In examining the cultural politics of motherhood in contemporary Greece, *Making Modern Mothers* contributes to emerging critical works on demography, the modernist ideology of international family planning, the relationship between reproduction and the nation, and the valence of reproductive practices as markers of modernity.¹

Paxson's research, based on two years of fieldwork in mid-1990s Athens, reveals a gap between women's reproductive experiences and dominant "expert discourses" that attribute Greece's high abortion rates to "the tenacity of tradition" (p. 3) and to "cultural resistance to contraception" (p. 121). However, Athenian women's experiences of fertility decline do not fit neatly into the teleological assumptions of demographic transition theory, which posit low fertility as a necessary condition and marker of modernity. Instead, urban Greek women are caught between the demands of modern subjecthood and the social and moral expectations of motherhood.

Chapter one, "Realizing Nature," examines the cultural specificity of the meaning and relationship of nature and gender in Greece. In the Greek language sex and gender are signified by the same word and describe a "socially ascribed and institutionally reinforced category of difference assumed by persons as a matter of moral responsibility" (p. 39), not a biologically determined state. Paxson organizes these changing, but overlapping, moral expectations of gender proficiency and motherhood into three roughly chronological ethical frameworks: the ethic of service, of choice, and of well-being. The ethic of service defines motherhood as a service to the family and the nation, a sacrifice which "redeemed women's sexuality and accorded women adult status" (p. 34). The ethic of choice describes the postwar generation, its struggle for reproductive rights, but also the increase burden of responsibility on women, and "compromises, contradictions, and hidden agendas" (p. 35). Finally, the ethic of well-being describes the current liberal ethic and mandate of self-care. Looking at abortion through the lenses of these three ethics reveals that these shift do not represent

an automatic increase in women's reproductive freedom. Although abortion was morally acceptable under both the ethic of service (for the good of the family), and the ethic of choice, under the ethic of well-being abortion becomes suspect as a backward and unhealthy practice that threatens the fertility of women and the nation.

Chapter two, "Remaking Mothers: From an Ethic of Service to an Ethic of Choice," traces the shift from early modern ethics, characterized by duty and convention, to modern ethics, which privilege inner subjectivities and consciousness. Under the ethic of service, procreation is not a personal choice, but rather a reflection of "God's will." Because modern contraceptives contradict the notion that fertility is outside of human agency, professional family planners depict abortion as a "traditional" method of fertility control. The shift from an ethic of service to an ethic of choice marks a change in subjectivity from "a self-controlling nature aimed at conforming to external standards" to internalized "inner desire that should be actualized through conscious planning" (p. 66).

In chapter three, "Rationalizing Sex: Family Planning and an Ethic of Well-Being," Paxson examines and critiques "family planning as an ideology" (p. 104) linked to the desire to be modern and European. Professional family planning, which according to Paxson is "caught in the tradition/modernity dualism" (p. 105), aims to bring rationality to sex and modernity to the nation. The desire for Europeaness (p. 105) forms the backdrop of how sexuality and reproductive choices are contextualized in contemporary Greece and explains the persistence of the ideology of family planning despite nationalist concerns over low fertility rates (p. 112–113). Family planning embraces a "medical sexual ideology" (p. 141) that mystifies the structures of patriarchal power and ignores the "deeply gendered" nature of modern contraception (p. 142), thus reinforcing women's burden as the domain of fertility moves from social control to individual medicalization. Whereas Athenian women described abortion as a "necessary evil" of a patriarchal society, for example, family planners explain it as a failure of rational planning and a cultural holdover.

Chapter four, "Maternal Citizens: Demographics, Pronatalism, and Population Policy," examines the gendered status of citizenship and women's roles as the symbolic and actual reproducers of the nation. Paxson traces two decades of discourses on "the problem" of low fertility in Greece, highlighting the nationalist assumptions of demography, the paradoxes of Greek pronatalist policies under the ethic of choice, and the slippery slide from nationalist demography to biological racism. Since nations are "figured" as families, only citizen mothers can reproduce them, as "only women can ensure the reproduction of a pure, legitimate nation" (p. 153). In this context, according

Making Modern Mothers Ethics And Family Planning In Urban Greece:

Making Modern Mothers Heather Paxson, 2004-02-12 Publisher Description *Abortion and Contraception in Modern Greece, 1830-1967* Violetta Hionidou, 2020-05-15 The book examines the history of abortion and contraception in Modern Greece from the time of its creation in the 1830s to 1967 soon after the Pill became available. It situates the history of abortion and contraception within the historiography of the fertility decline and the question of whether the decline was due to adjustment to changing social conditions or innovation of contraceptive methods. The study reveals that all methods had been in use for other purposes before they were employed as contraceptives. For example, Greek women were employing emmenagogues well before fertility was controlled; they did so in order to put themselves right and to enhance their fertility. When they needed to control their fertility, they employed abortifacients, some of which were also emmenagogues, while others had been used as expellants in earlier times. Curettage was also employed since the late nineteenth century as a cure for sterility; once couples desired to control their fertility, curettage was employed to procure abortion. Thus, couples did not need to innovate but rather had to repurpose old methods and materials to new birth control methods. Furthermore, the role of physicians was found to have been central in advising and encouraging the use of birth control for health reasons, thus facilitating and speeding fertility decline in Greece. All this occurred against the backdrop of a state and a church that were at times neutral and at other times disapproving of fertility control.

Orthodox Christianity in 21st Century Greece
Vasilios N. Makrides, 2016-05-13 One of the predominantly Orthodox countries that has never experienced communism is Greece, a country uniquely situated to offer insights about contemporary trends and developments in Orthodox Christianity. This volume offers a comprehensive treatment of the role Orthodox Christianity plays at the dawn of the twenty-first century. Greece, from social, scientific, and cultural historical perspectives. This book breaks new ground by examining in depth the multifaceted changes that took place in the relationship between Orthodox Christianity and politics, ethnicity, gender, and popular culture. Its intention is two-fold: on the one hand, it aims at revisiting some earlier stereotypes widespread both in academic and other circles about the Greek Orthodox Church, its cultural specificity, and its social presence, such as its alleged intrinsic non-pluralistic attitude toward non-Orthodox Others. On the other hand, it attempts to show how this fairly traditional religious system underwent significant changes in recent years, affecting its public role and image, particularly as it became more and more exposed to the challenges of globalization and multiculturalism.

The Nation and its Ruins
Yannis Hamilakis, 2007-08-02 This innovative, extensively illustrated study examines how classical antiquities and archaeology contributed significantly to the production of the modern Greek nation and its national imagination. It also shows how, in return, national imagination has created and shaped classical antiquities and archaeological practice from the nineteenth century to the present. Yannis Hamilakis covers a diverse range of topics, including the role of antiquities in the foundation of the Greek state in the nineteenth century, the Elgin marbles controversy, the role of archaeology under dictatorial regimes, the

use of antiquities in the detention camps of the Greek civil war and the discovery of the so called tomb of Philip of Macedonia
