Martin,Barbara H. Rosenwein,Bonnie G. Smith,2012-01-04 Students of Western civilization need more than facts They need to understand the cross cultural global exchanges that shaped Western history to be able to draw connections between the social cultural political economic and intellectual happenings in a given era and to see the West not as a fixed region but a living evolving construct These needs have long been central to *The Making of the West* The book s chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context enabling students to witness the unfolding of Western history understand change over time and recognize fundamental relationships **The Making of Russian Absolutism 1613-1801** Paul Dukes,2014-01-14 Revised and expanded the second edition of this fascinating study surveys the first two centuries of Romanov rule from the foundation of the dynasty by Michael Romanov in 1613 to the accession of Alexander I in 1801 The central theme of the book is the growth of absolutism in Russia throughout these years and it traces in detail how the Russian variety of what was a contemporary European phenomenon came fully into being **Soldiers, Statecraft, and History** James A. Nathan,2002-08-30 The increasing capacity of states to muster violence the concomitant rise of military power as a meaningful instrument of foreign policy and the frequent episodic collapse of that power are considered in this examination of force order and diplomacy Nathan points to periods of relative order and stability in international relations the time immediately prior to the rise of Frederick the Great for example or the half century after the Napoleonic Wars as times when states have been most vulnerable to spoilers and rogues Only the power of the Cold War blocs fostered durable order Now notwithstanding novel elements of globalization international relations

appear as dependent as ever on the prudent management of force. Students, scholars and soldiers are frequently exposed to Clausewitz, Westphalia, Napoleon, World War I and the like. But what makes these events and individuals so important? This book is Clausewitz's successor insisting that soldiers and statesmen know and master the integrative potential of force. Nathan provides a narrative account of the people and events that have shaped international relations since the onset of the state system. He asserts that an understanding of the limits and utility of persuasion as well as the corresponding limits and utility of force will help assure national security in a world filled with more uncertainties than ever in the last 50 years.

Aspects of European History 1494-1789 Stephen J. Lee, 2005-06-20. First published in 1984. Routledge is an imprint of Taylor & Francis, an informal company. *Germany under the Old Regime 1600-1790* John G. Gagliardo, 2014-01-21. German history in the seventeenth and eighteenth centuries is notoriously inaccessible to non-specialists. When other European countries were well on the way to becoming nation states, Germany remained frozen as a territorially fragmented, politically and religiously divided society. The achievement of this major contribution to the new History of Germany is to do justice to the variety and multiplicity of the period without foundering under the wealth of information it conveys. **The Making of Modern Europe, 1648-1780** Geoffrey Treasure, 2003-12-16. This reissue of a classic textbook has been revised and updated with a new introduction by the author. Geoffrey Treasure provides a thoroughly comprehensive account of the European experience at a time when so much of what is today identified as modern began to take shape. Discussing key issues of the period, *The Making of Modern Europe 1647-1780* examines the evolution of the developing society, detailed studies of the people, their environment, attitudes and beliefs, economic aspects, the growth of the states, politics, war and diplomacy, religion, intellectualism and science. This work provides an excellent grounding for the study of seventeenth and eighteenth century European history. *The Arming of Europe and the Making of the First World War* David G. Herrmann, 2020-03-31. David Herrmann's work is the most complete study to date of how land-based military power influenced international affairs during the series of diplomatic crises that led up to the First World War. Instead of emphasizing the naval arms race which has been extensively studied before, Herrmann draws on documentary research in military and state archives in Germany, France, Austria, England and Italy to show the previously unexplored effects of changes in the strength of the European armies during this period. Herrmann's work provides not only a contribution to debates about the causes of the war but also an account of how the European armies adopted the new weaponry of the twentieth century in the decade before 1914, including quick-firing artillery, machine guns, motor transport and aircraft. In a narrative account that runs from the beginning of a series of international crises in 1904 until the outbreak of the war, Herrmann points to changes in the balance of military power to explain why the war began in 1914 instead of at some other time. Russia was incapable of waging a European war in the aftermath of its defeat at the hands of Japan in 1904-5 but in 1912 when Russia appeared to be regaining its capacity to fight, an unprecedented land armaments race began. Consequently when the July crisis of 1914 developed the atmosphere of

military competition made war a far more likely outcome than it would have been a decade earlier **The Making of Strategy** Williamson Murray, 1996-05-31 Most writing about strategy has focused on individual strategic theorists or great military leaders This book focuses instead on the messy processes by which rulers and states have framed strategy in the past a subject of vital practical importance to strategists and of great interest to students of strategy and statecraft It consists of 17 case studies that range from fifth century Athens and Ming China to Hitler s Germany Israel and the post 1945 United States The studies analyse within a common interpretive framework precisely how rulers and states have made strategy The introduction emphasises the constants in the rapidly shifting world of the strategist the concluding essay tries to understand the forces that have driven the transformation of strategy since 400 BC and seem likely to continue to transform it in the future **The Making of the Second World War** Anthony P. Adamthwaite, 1992 First Published in 1979
