Making Of Totalitarian Thought:

The Making of Totalitarian Thought Josep R. Llobera, 2003-06-01 The totalitarian regimes of the twentieth century reveal disturbing and uncomfortable facts about human nature social life and moral progress Totalitarianism ironically came at a time when the spirit of modernity was in full swing and human potential was supposedly at its peak Distracted by the wonders of the industrial revolution few would have guessed the horrors that were just around the corner Focusing on the historical background to twentieth century totalitarianism this book unravels the complexity and mystery behind ideas of domination leadership and human development In doing so it not only sheds light on the dark side of modern thought but also shows that the foundations of totalitarian ideology existed long before the modern age Totalitarian thought is best understood by looking at four fundamental myths about race the crowd revolutionary violence and eugenics This book analyzes each myth in depth by tracing its beginnings and development It shows how key socio political thinkers wrote about and interpreted these myths and how they became the basis of many important racial and social theories Specific attention is given to six controversial nineteenth century thinkers Maistre Gobineau Galton Le Bon Vacher and Sorel Llobera through detailed analysis of their work suggests that these so called prophets of doom with their anti bourgeois elitist and anti progressive leanings understood the socio political reality of modern society far more accurately than other highly praised social thinkers of the same period These key figures provide a crucial insight into totalitarianism by overturning nineteenth century illusions of progress and laying bare the darker aspects of human nature The Making of Totalitarian Thought is an accessible and penetrating overview of a compelling phenomenon It emphasizes the importance of previously neglected socio political writing and neatly unpacks sophisticated intellectual ideas This **Modernism and Totalitarianism** R.

Shorten, 2012-11-15 Modernism and Totalitarianism evaluates a broad range of post 1945 scholarship Totalitarianism as the common ideological trajectory of Nazism and Stalinism is dissected as a synthesis of three modernist intellectual currents which determine its particular inherited character The Militant Intellect Andrés Fabián Henao Castro, 2022-10-03 The Militant Intellect offers a way of rethinking the relationship between critical theory and politics How does critical theory become self conscious of its own relation to politics How does it contribute to change the world through its reinterpretation of it These are some of the questions that drive The Militant Intellect In this book Andr s Fabi n Henao Castro argues that critical theory cultivates the militancy of the general intellect by training that intellect to work towards the intersectional and structural death of the colonist and thus to envision at the same time the materialization of that feminist decolonial communist queer marronage world that constitutes its horizon Henao Castro borrows and expands on Gilles Deleuze and Félix Guattari's idea of conceptual persona to qualify the intellectual labor of critical theory as an undisciplined field that performs its labor through the creation of conceptual personae capable of subjectivizing critical thought Doing so The Militant Intellect argues for the indispensable reinterpretation of Plato's Philosopher Sovereign Karl Marx's Communist

Frantz Fanon's Rebel Jacques Derrida's Specter Gayatri Spivak's Subaltern Saidiya Hartman's Wayward Life Jacques Rancière's Ignorant Schoolmaster Judith Butler's Antigone Ismene and Jordy Rosenberg's Fox as compelling personifications of intellectual militancy for the general intellect to have new scripts capable of cultivating the virtuosity of its more revolutionary performances Psychoanalysis in the Age of Totalitarianism Matt Ffytche, Daniel Pick, 2016-05-20

Psychoanalysis in the Age of Totalitarianism provides rich new insights into the history of political thought and clinical knowledge. In these chapters internationally renowned historians and cultural theorists discuss landmark debates about the uses and abuses of the talking cure and map the diverse psychologies and therapeutic practices that have featured in and against tyrannical modern regimes. These essays show both how the Freudian movement responded to and was transformed by the rise of fascism and communism the Second World War and the Cold War and how powerful new ideas about aggression destructiveness control obedience and psychological freedom were taken up in the investigation of politics. They identify important intersections between clinical debate political analysis and theories of minds and groups and trace influential ideas about totalitarianism that took root in modern culture after 1918 and still resonate in the twenty-first century. At the same time they suggest how the emergent discourses of totalitarian society were permeated by visions of the unconscious. Topics include the psychoanalytic theorizations of anti-Semitism the psychological origins and impact of Nazism the post-war struggle to rebuild liberal democracy state-funded experiments in mind control in Cold War America coercive re-education programmes in Eastern Europe and the role of psychoanalysis in the politics of decolonization. A concluding trio of chapters argues in various ways for the continuing relevance of psychoanalysis and of these mid-century debates over the psychology of power submission and freedom in modern mass society. Psychoanalysis in the Age of Totalitarianism will prove compelling for both specialists and readers with a general interest in modern psychology politics culture and society and in psychoanalysis. The material is relevant for academics and post-graduate students in the human social and political sciences the clinical professions the historical profession and the humanities more widely. Making Sense of Tyranny Simon

Tormey, 1995. Totalitarianism remains a central concept in political theory as relevant today as it was in the time of Hitler and Stalin. This book tries to resolve the long-running debates about what totalitarianism is or was how the term can be applied and what the future of the concept might be. Joseph de Maistre and his European Readers, 2011-05-23. Following the publication of Isaiah Berlin's essay on Joseph de Maistre 1753-1821 the Savoyard philosopher has been known primarily in the English-speaking world as a precursor of fascism. The essays in this volume challenge this view. Disclosing the inaccuracies and limitations of Berlin's account they illustrate Maistre's colossally diverse European posterity. Far from an inflexible ideologist Maistre was a versatile and deeply modern thinker who attracted interpreters across the political spectrum. Through the centuries Maistre's passionate Europeanism has contributed to his popularity from Madrid to Moscow. And in our times when religion is re-asserting itself as a source of public reason his theorization of the encounter between

tradition and modernity is lending his work ever more urgent relevance Cover illustration by Matthieu Manche *Utopian Literature and Science* Patrick Parrinder, 2015-08-11 Scientific progress is usually seen as a precondition of modern utopias but science and utopia are frequently at odds Ranging from Galileo's observations with the telescope to current ideas of the post human and the human animal boundary this study brings a fresh perspective to the paradoxes of utopian thinking since Plato

Totalitarianism and Philosophy Alan Haworth, 2019-11-20 When Mussolini Hitler and Stalin first came to power in the 1930s their regimes were considered by many to represent a new and perplexing phenomenon They were labelled totalitarian But is totalitarianism genuinely new or is the word just another name for something old and familiar namely tyranny This is the first question to be addressed by Alan Haworth in this book which explores the relevance of philosophy to the understanding of totalitarianism In the course of the discussion definitions are tested Is it coherent to think of totalitarianism as the imposition of a total state or of total control Could it even be that the idea of totalitarianism is a non concept Examining the work of the totalitarian philosophers Giovanni Gentile and Carl Schmitt the idea of totalitarianism by other means as represented in dystopian fiction and the philosophy of Hannah Arendt *Totalitarianism and Philosophy* is essential reading for all students and scholars of political philosophy

The Political Consequences of Thinking Jennifer Ring, 2012-02-01 In this book Jennifer Ring offers a wholly new interpretation of Hannah Arendt's work from Eichmann in Jerusalem with its bitter reception by the Jewish community to *The Life of the Mind* Departing from previous scholarship Ring applies the perspectives of gender and ethnicity to investigate the extent to which Arendt's identity as a Jewish woman influenced both her thought and its reception Ring's analysis of Zionist and assimilationist responses to century-old antisemitic sexual stereotypes leads her to argue that Arendt's criticism of European Jewish leadership during the Holocaust was bound to be explosive New York and Israeli Jews shared a rare moment of unity in their condemnation of Arendt charging that she had betrayed the Jewish community the kind of charge Ring contends often leveled against women who dare to speak out publicly against prominent men in their own cultural or racial groups The book moves from a feminist analysis of the Eichmann controversy to a discussion of Jewish themes in the structure and content of Arendt's major theoretical works Ring makes a powerful contribution to an understanding of Arendt and of multiculturalism demonstrating that Arendt's most sustained philosophical work was influenced as much by her Jewish heritage as by her German education

New Critical Writings in Political Sociology Alan Scott, 2024-11-01 The articles collected together in this volume are concerned with why and how people get involved in politics whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest or through engagement in public debate But just as important is the question of why people do not get involved in politics What social conditions ideas and values facilitate or discourage political activity How is it that some people are systematically disempowered in democratic societies in comparison with others What social forms offer the most promise for extending and deepening democracy This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and

developed concepts and methodologies in order to research the answers to those questions

In Search of Politics Zygmunt Bauman, 1999 In this book the noted sociologist confronts the decline of the public realm and the profound contradictions of freedom in present day society How can most of us consider ourselves free and yet believe equally firmly that there is little we can change singly severally or all together in the ways the affairs of the world are being run Why has the growth of individual freedom coincided with the growth of collective impotence insofar as there is no easy and obvious way to translate private worries into public issues and conversely to pinpoint public issues in private troubles What under these circumstances can bring us together Occasionally our impulses toward sociality are released in short lived explosions sometimes in carnivals of compassion and charity sometimes by outbursts of beefed up aggression against a freshly discovered enemy The trouble with these occasions is that they run out of steam quickly and when we return to our daily business the shared world brightly illuminated for a moment seems if anything darker than before The chance of changing this condition hangs on the agora the space neither private nor public but more exactly private and public at the same time In this space private problems meet in a meaningful way not just to draw narcissistic pleasures or in search of some therapy through public display but to seek collective levers powerful enough to lift individuals from their private miseries and create public good a just society or shared values The trouble is that little is left today of the old style private public spaces In this book the author both explores these problems and sketches the outlines of a solution for them We cannot he argues overcome our collective impotence without resorting to politics and using the vehicle of political agency In the latter part of the book the author focuses on three orientation points for a reconstruction of politics the republican model of the state and of citizenship basic income as a universal entitlement and an attempt to re enable the institutions of autonomous society by catching up with the extraterritorial powers wielding control in an age of globalization
