**A Genealogy of Cyborgothic** Dongshin Yi,2017-03-02 In his provocative and timely study of posthumanism Dongshin Yi adopts an imaginary imaginative approach to exploring the transformative power of the cyborg a strategy that introduces balance to the current discourses dominated by the practicalities of technoscience and the dictates of anthropocentrism Proposing the term cyborgothic to characterize a new genre that may emerge from gothic literature and science fiction Yi introduces mothering as an aesthetic and ethical practice that can enable a posthumanist relationship

between human and non human beings Yi examines the cyborg s literary manifestations in novels including *The Mysteries of Udolpho* *Frankenstein* *Dracula* *Arrowsmith* and *He She and It* alongside philosophical and critical texts such as Edmund Burke s *A Philosophical Enquiry into the Origins of Our ideas of the Sublime and Beautiful* Immanuel Kant s *Critique of Judgment* John Stuart Mill s *Utilitarianism and System of Logic* William James s essays on pragmatism ethical treatises on otherness and things feminist writings on motherhood and recent studies of posthumanism Arguing humans imagine the cyborg in ways that are seriously limited by fear of the unknown and current understandings of science and technology Yi identifies in gothic literature a practice of the beautiful that extends the operation of sensibility heightened by gothic manifestations or situations to surrounding objects and people so that new feelings flow in and attenuate fear In science fiction which demonstrates how society has accommodated science Yi locates ethical corrections to the anthropocentric trajectory that such accommodation has taken Thus *A Genealogy of Cyborgothic* imagines a new literary genre that helps envision a cyborg friendly non anthropocentric posthuman society Encoded with gothic literature s aesthetic embrace of fear and science fiction s ethical criticism of anthropocentrism the cyborgothic retains the prospective nature of these genres and develops mothering as an aesthetico ethical practice that both humans and cyborgs should perform

*The Changing Vampire of Film and Television* Tim Kane, 2015-01-09 Vampires have been a fixture of film since Bela Lugosi brought Bram Stoker s *Dracula* to life on the big screen in 1931 Over the decades the genre has been far from static as vampire narratives changed and evolved with the appetites of their viewing public First depicted as formally dressed villains vampires would later be portrayed as supernatural beings with some human characteristics and still later as sympathetic figures Focusing on 19 representative films and television productions this critical study tracks the evolutionary changes of the screen vampire It explores the factors that cause a genre to change and examines the alternating cycles of audience expectation The author identifies three distinct modes of depiction the Malignant Cycle 1931 1948 comprised primarily of the Universal films the Erotic Cycle 1957 1985 which encompasses Hammer films and popular television shows such as *Dark Shadows* and the Sympathetic Cycle 1987 present including recent offerings such as *The Lost Boys* *Interview with the Vampire* and *Buffy the Vampire Slayer* Each film is evaluated in seven key areas including the act of the vampire biting the victim process of the victim s infection physical appearance and demeanor of the vampire and the vampire expert and the eventual destruction of the vampire Appendices include a complete filmography of the films examined Instructors considering this book for use in a course may request an examination copy here

[The Ecogothic Werewolf in Literature](#)

Kaja Franck,2025-08-21 Using an Ecogothic lens this book offers a new conceptual framework for the werewolf in literature recasting the lycanthrope as an emblem for society's fear of untamed wilderness Tracing lycanthropy from a place of liminality to hybridity and to myriad and complex subjectivities The Ecogothic Werewolf in Literature reassesses the Gothic werewolf to show how the relationship between humans and wolves has influenced its representation in literature Starting with Dracula and tracing lycanthropic imaginings through natural histories folk and fairy tales to contemporary iterations in the works of Maggie Stiefvater Whitley Strieber and Glen Duncan Kaja Franck reconsiders the trope of the beast within in the werewolf canon From early conservationist Aldo Leopold's awakening regarding the death of wolves to George Monbiot's call to rewild tensions around humanity's responsibility to the natural world have emerged in lycanthropic literature A challenge to previous anthropocentric analysis of Gothic horror's stock monster Franck considers the changing attitude towards wolves alongside the growing environmentalism movement and reclaims the wolf from the figure of the werewolf
