Markets States And Democracy The Political Economy Of Post Communist Transformation:

Markets, States, And Democracy Beverly Crawford, 1995-03-14 Much of the literature on the sequencing of economic and political liberalization suggests that new democracies cannot successfully implement market oriented reforms Yet post Communist transformations have shown that under certain conditions economic liberalizers are able to gain the upper hand in the political process In this interdisciplinary volume eminent scholars offer a cohesive framework for analyzing the forces that bolster or undermine liberalization and pursue four potential scenarios for the future of liberalization in these emerging states

Postcommunist Transformation and the Social Sciences Frank Bönker, Klaus Müller, Andreas Pickel, 2003-08 The work's major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate

Markets, States and Democracy Beverly Crawford, 1993 **State, Labor, and the Transition to a Market Economy** Agnieszka Paczyńska, 2015-06-19 In response to mounting debt crises and macroeconomic instability in the 1980s many countries in the developing world adopted neoliberal policies promoting the unfettered play of market forces and deregulation of the economy and attempted large scale structural adjustment including the privatization of public sector industries How much influence did various societal groups have on this transition to a market economy and what explains the variances in interest group influence across countries In this book Agnieszka Paczyńska explores these questions by studying the role of organized labor in the transition process in four countries in different regions the Czech Republic and Poland in eastern Europe Egypt in the Middle East and Mexico in Latin America In Egypt and Poland she shows labor had substantial influence on the process whereas in the Czech Republic and Mexico it did not Her explanation highlights the complex relationship between institutional structures and the critical junctures provided by economic crises revealing that the ability of groups like organized labor to wield influence on reform efforts depends to a great extent on not only their current resources such as financial autonomy and legal prerogatives but also the historical legacies of their past ties to the state This new edition features an epilogue that analyzes the role of organized labor uprisings in 2011 the protests in Egypt the overthrow of Mubarak and the post Mubarak regime

The International Political Economy of Transition Stuart Shields, 2014-10-03 This book explores the role played by state and multinationals in shaping transition It uniquely integrates issues of globalisation and transnationalism into the analysis of post communism This book will be of interest to students and researchers of transition postcommunism political economy and European politics

Capitalist Diversity on Europe's Periphery Dorothee Bohle, Béla Greskovits, 2012-07-27 With the collapse of the Council for Mutual Economic Assistance in 1991 the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future Capitalism they

found was not a single set of political economic relations Rather they each had to decide what sort of capitalist nation to become In Capitalist Diversity on Europe s Periphery Dorothee Bohle and B la Greskovits trace the form that capitalism took in each country the assets and liabilities left behind by socialism the transformational strategies embraced by political and technocratic elites and the influence of transnational actors and institutions They also evaluate the impact of three regional shocks the recession of the early 1990s the rolling global financial crisis that started in July 1997 and the political shocks that attended EU enlargement in 2004 Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy neoliberal embedded neoliberal and neocorporatist The Baltic states followed a neoliberal prescription low controls on capital open markets reduced provisions for social welfare The larger states of central and eastern Europe Poland Hungary and the Czech and Slovak republics have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy Slovenia has proved to be an outlier successfully mixing competitive industries and neocorporatist social inclusion Bohle and Greskovits also describe the political contention over such arrangements in Romania Bulgaria and Croatia A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis

Revolution And Transition In East-central Europe David Mason, 2018-10-08 Eastern and Western Europe continue to change in their relationship to one another and in their ongoing dynamic with the post Soviet states Economic development electoral upheaval and the Bosnian crisis all color the transition from communism to democracy and from a Cold War outlook to a new global order still taking shape In this fully revised and updated edition of his popular and critically acclaimed text David Mason brings the revolutionary events of 1989 into context with the transitional yet turbulent 1990s We see new parties new politics new constitutions and new opportunities in light of economic shock therapies left turns in recent elections and dissolving sovereignties and alliances Despite savage ethnic conflict economic scarcity and political insecurity Mason shows us that East Central Europe is consolidating and reemerging as a region to be reckoned with on the global stage

The Rule Of Law And Economic Reform In Russia Jeffery Sachs, 2019-05-20 What impact has Russia s chosen path of reform had on the development of law after the collapse of the communist regime This collection of essays examines how Russia s distinctive traditions of law and lawlessness are shaping the current struggle for economic reform in the country Nine renowned scholars chosen from specialties in history politi

Hot Coal, Cold Steel Stephen Crowley, 1997-02-12 Explores the different response of Soviet miners and steelworkers to the collapse of the Soviet Union

Globalization Under and After Socialism Besnik Pula, 2018-07-31 The post communist states of Central and Eastern Europe have gone from being among the world s most closed autarkic economies to being some of the most export oriented and globally integrated While previous accounts have attributed this shift to post 1989 market reform policies Besnik Pula sees the root causes differently Reaching deeper into the

region's history and comparatively examining its long run industrial development he locates critical junctures that forced the hands of Central and Eastern European elites and made them look at options beyond the domestic economy and the socialist bloc. In the 1970s Central and Eastern European socialist leaders intensified engagements with the capitalist West in order to expand access to markets, technology and capital. This shift began to challenge the Stalinist developmental model in favor of exports and transnational integration. A new reliance on exports launched the integration of Eastern European industry into value chains that cut across the East-West political divide. After 1989 these chains proved to be critical gateways to foreign direct investment and circuits of global capitalism. This book enriches our understanding of a regional shift that began well before the fall of the wall while also explaining the distinct international roles that Central and Eastern European states have assumed in the globalized twenty-first century. Market Dreams Elaine Susan Weiner, 2010-02-11 How have women experienced the transition from socialism to market economy in Eastern Europe? *Competitiveness of New Europe* Jan Winiecki, 2008-08-08 Edited by a leading scholar in transition economics this book examines the nations that make up the so-called New Europe to look at the economic competitiveness in comparison with each other and the rest of Europe.

Political Parties of Eastern Europe: A Guide to Politics in the Post-communist Era Janusz Bugajski, 2020-09-10 This comprehensive one-volume guide to politics in Eastern Europe provides a wealth of information on the region. The author outlines the emergent political spectrum of parties and coalitions which are described in the 20 country chapters that make up the heart of the book. Parties are classified across the political spectrum and discussed individually in terms of programs, leadership and political activity. Tables at the end of each country chapter present basic political data and electoral results. A concluding essay evaluates democratic development in the region. The American Bibliography of Slavic and East European Studies Patt Leonard, Rebecca Routh, 2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe, Central Europe, the Balkans, the Baltic States and the former Soviet Union. Organised by discipline it covers the arts, humanities, social sciences, life sciences and technology. Institutions, Property Rights, and Economic Growth Sebastian Galiani, Itai Sened, 2014-04-17 This volume showcases the impact of the work of Douglass North, winner of the Nobel Prize and father of the field of new institutional economics. Leading scholars contribute to a substantive discussion that best illustrates the broad reach and depth of Professor North's work. The volume speaks concisely about his legacy across multiple social sciences disciplines, specifically on scholarship pertaining to the understanding of property rights, the institutions that support the system of property rights and economic growth.

Georgia Bloomsbury Publishing, 2013-12-16 Georgia emerged from the fall of the Soviet empire in 1991 with the promise of swift economic and democratic reform. But that promise remains unfulfilled. Economic collapse, secessionist challenges, civil war and the failure to escape the legacy of Soviet rule culminating in the 2008 war with Russia characterise a two-decade struggle to establish democratic institutions and consolidate statehood. Here Stephen Jones critically analyses Georgia's

recent political and economic development illustrating what its transition has meant not just for the state but for its citizens as well. An authoritative and commanding exploration of Georgia since independence this is essential for those interested in the post Soviet world.

Russia's Market Economy Stefan Hedlund, 2002-11-01 Russia's Market Economy is a seminal account of Russia's transition to the market its tortuous development as a fledgling market economy through the 1990s right through to its spectacular collapse in August 1998. Rather than beginning with the economic collapse the book traces the historical mismanagement of Russian wealth through to the Soviet command economy and on to Gorbachev. Stefan Hedlund finally discusses what lessons should be learned from the damage inflicted on the Russian economy as well as its social legal and political infrastructure by the race of reform.

Continuities in Poland's Permanent Transition H. Wydra, 2001-02-02 This book examines change in post 1989 Poland by linking it analytically to the continuity of Poland's past. It argues that the first reality of objective institutional change is underpinned by the continuity of second realities. Based on an interdisciplinary analysis of the Polish case this study proposes a new conceptual framework for the study of transitional societies and revises standard assumptions in transitology and democratization studies.

Enlarging the EU Eastward Heather Grabbe, Kirsty Hughes, 1998-05-05 Successful eastward enlargement of the EU will be critical to ensuring stability and prosperity for post Cold War Europe. But enlargement raises difficult issues for the EU and the applicant countries of central and eastern Europe. Is the EU capable of reforming its institutions and policies to cope with 25 or more members? Which central and east Europeans will join and when? How can we ensure that enlargement brings the economic and security benefits expected of it? This comprehensive study examines in detail the political economic and security implications of eastward enlargement for both East and West. The authors present new analyses of the policy issues including the EU budget and pre accession strategy and of the economic integration likely before and after accession. Based on an extensive series of interviews with key ministers diplomats policy makers academics and journalists across Europe this study also provides an informed overview of expectations and attitudes towards enlargement within the EU and in the applicant countries.

The Oxford Handbook of Political Leadership R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback. It was studied intensively not only by political scientists but also by political sociologists and psychologists. Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s. Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance. Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes. The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration. In the media age leaders are presented and stage managed spun. DDLas the solution to almost every social problem. Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at

closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities
