Moving In Cities:

Hearings, Reports and Prints of the Senate Special Committee on Aging United States. Congress. Senate. Special Committee on Aging, 1979 Unsettling Cities John Allen, Doreen Massey, Michael Pryke, 2005-08-12 This text examines the global nature of cities whose openness has shaped their dynamism and character It explores cities as sites of movement migration and settlement where different peoples cultures and environments combine *Unsettling Cities* explores the mix of proximity and difference that exists in the rich and diverse texture of city life The contributors reveal the association between the changing fortunes of cities and the power and influence of global networks SeaCities Joerg Baumeister, Edoardo Bertone, Paul Burton, 2020-11-28 This book presents and discusses a strategy which includes four approaches to dealing with the risk of sea level rise and other water hazards It also offers opportunities for cities to explore urban extensions such as marine estates aquatic food production systems new sea related industries maritime transport developments new oceanic tourist attractions and the designation of additional coastal ecological zones The urban interface between Sea and Cities generates therefore both burning issues and valuable opportunities and raises the question of whether it is possible to solve the former by exploiting the latter **Geographies of Mobilities: Practices, Spaces, Subjects** Dr Peter Merriman, Professor Tim Cresswell, 2012-11-28 Over the past fifteen years or so there has been a widespread and increasing fascination with the theme of mobility across the social sciences and humanities Of course geographers have always had an interest in mobility but as yet they have not viewed this in the same mobility turn as in other disciplines where it has been used to critique the standard approaches to the subjects This text brings together leading academics to provide a revitalised geography of mobilities informed by this wider mobility turn It makes connections between the seemingly disparate sub disciplinary worlds of migration transport and tourism suggesting that each has much to learn from each other through the ontological and epistemological concern for mobility *Holstein Breeder and Dairyman*, 1927 *American Recreation Journal*, 1961 Writing Design Fiction Tony Fry, 2021-10-21 Written by leading design philosopher Tony Fry *Writing Design Fiction Relocating a City in Crisis* is both an introduction to the power of design fiction in the design process and a novella length work of fiction in itself telling the dramatic story of the relocation of the City of Harshon Set in the near future Harshon a delta city is facing environmental catastrophe due to rising sea levels consequently a decision is made to relocate the entire city inland A diverse cast of voices including an architect a journalist an economist a construction worker and residents narrate the extraordinary challenges and complexities which follow This work presents a real world scenario which in coming decades will face many of the world's cities The fictional format provides a novel way of exploring the very serious inherent technical social political economic and cultural challenges The story provides a rehearsal of the design challenges which are likely to face architects planners and designers in an uncertain global future Design fiction is a fast growing area within design and architecture increasingly deployed as a serious methodology by designers as a tool in scenario planning

Writing Design Fiction takes the practice to a higher level conceptually and theoretically but also practically The book is divided into four parts with the fictional narrative bookended by further critical analysis Part One shows how a critique of existing modes of design fiction can lead to more grounded and critical thinking and practice Part Three critically reflects on the narrative while Part Four presents the practical application of the second order design fiction approach This book demonstrates the value of a more developed mode of design fiction to students professional designers and architects across the breadth of design practices as well as to other disciplines interested in the future of cities

Becoming Human by Design Tony Fry,2013-07-18 The last in Tony Fry s celebrated trilogy of books continues his radical rethinking of design Becoming Human by Design s provocative argument presents a revised reading of human evolution centred on ontological design Examining the relation of design to the nature of the human species where the species came from how it was created what it became and its likely future Fry asserts that current biological and social models of evolution are an insufficient explanation of how we humans became what we are Making a case for ontological design as an evolutionary agency the book posits the relation between the formation of the world of human fabrication and the making of mankind itself as indivisible It also functions as a provocation to rethink the fate of Homo sapiens recognising that all species are finite and that the fate of humankind turns on a fundamental Darwinian principle adapt or die Fry considers the nature of adaptation arguing that it will depend on an ability to think and design in new ways
