Automotive Prosthetic Charissa N. Terranova, 2014-01-15 In the twenty first century we are continually confronted with the existential side of technology the relationships between identity and the mechanizations that have become extensions of the self Focusing on one of humanity s most ubiquitous machines Automotive Prosthetic Technological Mediation and the Car in Conceptual Art combines critical theory and new media theory to form the first philosophical analysis of the car within works of conceptual art These works are broadly defined to encompass a wide range of creative expressions particularly in car based conceptual art by both older established artists and younger emerging artists including Ed Ruscha Martha Rosler Richard Prince Sylvie Fleury Yael Bartana Jeremy Deller and Jonathan Schipper At its core the book offers an alternative formation of conceptual art understood according to technology the body moving through space and what art historian curator and artist Jack Burnham calls relations This thought provoking study illuminates the ways in which the automobile becomes a naturalized extension of the human body incarnating new forms of car art and spurring a technological reframing of conceptual art Steeped in a sophisticated take on the image and semiotics of the car the chapters probe the politics of materialism as well as high low debates about taste culture and art The result is a highly innovative approach to contemporary intersections of art and technology

Art Deco and British Car Design Barrie Down, 2010 This is a book about automotive styling in particular the streamlined styling that defined what are now known as Airline cars During the mid 1930s the majority of British car manufacturers and coachbuilders experimented with streamlined styling This fashion was the result of Art Deco an international movement that influenced design and marketing in many different industries and produced some of the most unique and visually exhilarating cars ever produced in Britain Part One of the book explains and illustrates the Art Deco styling elements that link these streamlined car designs and describes their development their commonality and their unique aeronautical names The stories of the individual cars their designers and their development are told in Part Two Here Barrie Down has collected examples of all the significant British streamlined production cars made between 1933 and 1936 many of them still represented by beautifully restored survivors The book is well illustrated with over 200 contemporary pictures and colour photographs of existing cars many of which have never before been published This book is an instructive and visual feast for all car lovers

Shifting Mobility Dewan Masud Karim, 2023-12-01 In the face of resource depletion environmental changes lifestyle

changes demographic and digital adaptation old ideologies of city building and expensive and complex automobility solutions are in freefall These changes are creating severe friction between the old and new paradigms This book provides new perspectives through the process of ideological disassociation and concepts of human mobility code The basic premise of the book human mobility is an essential component of our creativity that comes from our unconscious desire to become a part of a community Several new concepts in the book starts with the hallmark of new discovery of human mobility code and its implications of urban mobility boundary systems to stay within safe planetary zone A new discovery of human mobility code from comprehensive research finding prove that each individual develops a unique mobility footprint and become our mobility identity Beyond individual hallmarks human develops collective mobility codes through interaction with the third space on which entire mobility systems lie and are created by the fundamentals of city planning and the design process Readers are introduced to an innovative mobility planning process and reinvention of multimodal mobility approaches based on new mobility code while formulating new concepts practical solutions and implementation techniques tools policies and processes to reinforce low carbon mobility options while addressing social equity environmental and health benefits Finally the book arms us with knowledge to prevent the disaster of full technological enlightenment against our natural human mobility code

Designing Modern America Christopher Innes,2008-10-01 From the 1920s through the 1950s two individuals Joseph Urban and Norman Bel Geddes did more by far to create the image of America and make it synonymous with modernity than any of their contemporaries Urban and Bel Geddes were leading Broadway stage designers and directors who turned their prodigious talents to other projects becoming mavericks first in industrial design and then in commercial design fashion architecture and more The two men gave shape to the most quintessential symbols of the modern American lifestyle including movies cars department stores and nightclubs along with private homes kitchens stoves fridges magazines and numerous household furnishings Illustrated with more than 130 photographs of their influential designs this book tells the engrossing story of Urban and Bel Geddes Christopher Innes shows how these two men with a background in theater lent dramatic flair to everything they designed and how this theatricality gave the distinctive modernity they created such wide appeal If the American lifestyle has been much imitated across the globe over the past fifty years says Innes it is due in large measure to the designs of Urban and Bel Geddes Together they were responsible for creating what has been called the Golden Age of American culture

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang,2020-11-09 The Routledge Companion to Twentieth and Early Twenty First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years The ideas and projects hypothetical and built range in scale from the city to the urban block level The focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them The morphology of a city its built environment evolves unselfconsciously as private and

governmental investors self consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends Philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development Rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces including architects planners urban historians urban geographers and urban morphologists Rural Modernity, Everyday Life and Visual Culture Rosemary Shirley, 2016-03-03 Through the lens of the everyday this book explores the countryside as an inhabited and practised realm with lived rhythms and routines It relocates the topography of everyday life from its habitually urban focus out into the English countryside The rural is often portrayed as existing outside of modernity or as its passive victim Here the rural is recast as an active and complex site of modernity a shift which contributes alternative ways of thinking the rural and a new perspective on the everyday In each chapter pieces of visual culture including scrapbooks art works adverts photographs and films are presented as tools of analysis which articulate how aspects of the everyday might operate differently in non metropolitan places The book features new readings of the work of significant artists and photographers such as Jeremy Deller and Alan Kane Stephen Willats Anna Fox Andrew Cross Tony Ray Jones and Homer Sykes seen through this rural lens together with analysis of visually fascinating archival materials including early Shell Guides and rarely seen scrapbooks made by the Women's Institute Combining everyday life rural modernity and visual cultures this book is able to uncover new and different stories about the English countryside and contribute significantly to current thinking on everyday life rural geographies and visual cultures *Cars & Parts* ,1996
