Responsive and accountable? Great Britain: Parliamentary and Health Service Ombudsman, 2011-10-25 This report reveals complaint handling across government to be inconsistent haphazard and unaccountable operating without any overarching design overall standards or common performance framework This is unhelpful for people who want to change their experience of interacting with a public service by making a complaint It also means opportunities to improve public services through complaint handling are being missed There is no shared view across government of the standard of complaint handling that a member of the public can reasonably expect Complainants may be required to navigate anything between one and four stages of a complaint procedure before local resolution is completed and the complainant can bring their complaint to the Ombudsman The absence of any clear methodology or machinery to share best practice or ensure lessons from complaints are learnt across government departments increases the likelihood of the same mistakes being repeated again and again The Ombudsman's Principles of Good Complaint Handling are a good starting point for government in the task of ensuring that all departments share an understanding of the importance of fairness transparency and accountability But there is a need for strong leadership from the top committed to developing a culture across the civil service that values complaints The report covers the survey of departments case studies and gives statistics on complaint handling and the financial costs of poor complaint handling \$250 Roy Arthur Tower, 1926 **Model Theory and**
