Researchers have recently made tremendous progress in the area of mucosal immunology greatly increasing our understanding of the common mucosal immune system mucosal infections and oral immunization However this research has not previously been made available in a single work In its large 81 2x 11 format Handbook of Mucosal Immunology covers the entire spectrum of mucosal immunity and is organized in two main sections to present the basic biology of the common mucosal immune system and the immune responses of the mucosae The first section provides an introduction and historical perspective of the mucosal immune system and includes comprehensive discussion of the development and physiology of mucosal defense It discusses such topics as the structure and function of the mucosal epithelium characteristics of mucosal associated lymphoid tissue MALT Peyer's patches and concepts of mucosal vaccines The second section focuses on the secretory immune system with special reference to mucosal diseases in the digestive GALT respiratory BALT and genitourinary tracts This information is especially important in light of the current interest in the mechanisms transmission and prevention of infectious diseases such as AIDS hepatitis and tuberculosis Virtually all chapters have been authored by the original investigators responsible for key observations on which current concepts are based This handbook will be an invaluable resource for a diverse group of both researchers and practicing clinicians Molecular biologists immunologists veterinarians public health workers physicians in specialties from pediatrics to pulmonology and graduate students of mucosal immunology will all find this handbook the most complete work on the subject **Essentials of Mucosal**

Challacombe,P. Bland,C. Stokes,A. Heatley,A. Mowat,2012-12-06 The immunology of mucosal surfaces is one of the most exciting and relevant areas of medical veterinary and dental research since it applies basic research to tissues involved in everyday defence against microbes and against environmental and food antigens This book is based on the contributions presented at the International Congress of Mucosal Immunology held in London in July 1989 and organised by the Mucosal Immunology Affinity Group of the British Society for Immunology The meeting was attended by over 500 delegates from 27 countries including virtually all of the leading investigators in the field The contents give comprehensive and up to date information on such topics as antigen presentation and processing in the gut mucosal vaccines in man and animals HIV infection in the gut the role of T cells in the gut epithelium recent advances in inflammatory bowel disease and coeliac disease the role of cytokines in the regulation of the IgA response mucosal mast cells and cell migration The contributions reflect the rapid pace of research in mucosal immunology and the great strides which are taking place in the understanding of the immunology molecular biology and biochemistry of host response at mucosal surfaces Principles of Mucosal Immunology Society for Mucosal Immunology,2012-04-18 Principles of Mucosal Immunology is designed for graduate students and postdoctoral fellows researchers in immunology and microbiology and medical and dental students It presents the basic and clinical aspects of the mucosal immune system focusing on the major components of the mucosal barrier the gastrointestinal upper and lower respiratory *Immunity* Anthony L. DeFranco,Richard M. Locksley,Miranda Robertson,2007 An understanding of the immune system is central to the understanding of how the body interacts with its surroundings Presenting an insight into this biological system this book leads students through both innate and adaptive immunity how infection is detected and how the cells of the immune system interact to generate a response Advances in Mucosal Immunology Jiri Mestecky,Michael W. Russell,Susan Jackson,Suzanne M. Michalek,Helena Tlaskalová-Hogenová,Jaroslav Sterzl,2013-04-17 The Seventh International Congress of Mucosal Immunology held in Prague the beautiful old capital of The Czech Republic 16-20 August 1992 was the first to be sponsored by the Society for Mucosal Immunology and was the largest since their inception 20 years earlier in Birmingham

Alabama It was attended by 624 participants who gave 538 presentations more than 10 times the numbers of the first meeting these proceedings contain 354 papers that were submitted for publication The political events in Europe that made it possible to hold this Congress in Prague also allowed for the first time the participation of large numbers of scientists from Eastern Europe as well as from Asia and the organizers were truly gratified by this happy circumstance It is now clear not only that mucosal immunity encompasses the huge area of mucosal surfaces and most physiological organ systems but also that mucosal immunology extends over the whole global surface and all continents The sheer size of the Congress and number of manuscripts unfortunately entailed some unexpected problems in editing and assembling the proceedings partly due to the diversity of linguistic styles not represented at earlier meetings and we apologize to the authors who have patiently awaited the publication of their contributions
