Neue Musiktechnologie I:

Music and Technology in the Twentieth Century Hans-Joachim Braun, 2002-09-16 Braun Universität der Bundeswehr presents 13 contributions by scholars in two fields of history musicology and technology Topics include the role of Yamaha in Japan s musical development the social construction of the synthesizer the player piano as a precursor of computer music the musical role of airplanes and locomotives the origins of the 45 RPM record violin vibrato and the phonograph Jimi Hendrix the aesthetic challenge of sound sampling and others Originally published in 2000 as *I Sing the Body Electric Music and Technology in the 20th Century* Annotation copyrighted by Book News Inc Portland OR **Neue Musiktechnologie** Bernd Enders, Stefan Hanheide, 1993 *Broadcasting Fidelity* Myles W. Jackson, 2024-09-17 A landmark history of early radio in Germany and the quest for broadcast fidelity When we turn on a radio or stream a playlist we can usually recognize the instrument we hear whether it s a cello a guitar or an operatic voice Such fidelity was not always true of radio Broadcasting Fidelity shows how the problem of broadcast fidelity pushed German scientists beyond the traditional bounds of their disciplines and led to the creation of one of the most important electronic instruments of the twentieth century In the early days of radio acoustical distortions made it hard for even the most discerning musical ears to differentiate instruments and voices The physicists and engineers of interwar Germany with the assistance of leading composers and musicians tackled this daunting technical challenge Research led to the invention in 1930 of the trautonium an early electronic instrument capable of imitating the timbres of numerous acoustical instruments and generating novel sounds for many musical genres Myles Jackson charts the broader political and artistic trajectories of this instrument tracing how it was embraced by the Nazis and subsequently used to subvert Nazi aesthetics after the war and describing how Alfred Hitchcock commissioned a later version of the trautonium to provide the sounds of birds squawking and flapping their wings in his 1963 thriller *The Birds* A splendid work of scholarship by an acclaimed historian of science Broadcasting Fidelity reveals how the interplay of science technology politics and culture gave rise to new aesthetic concepts innovative musical genres and the modern discipline of electroacoustics *An Open Design for Computer-Aided Algorithmic Music Composition* Christopher Ariza, 2005 This dissertation introduces a new design for a computer aided algorithmic music composition system Rather than exploring specific algorithms this study focuses on system and component design The design introduced here is demonstrated through its implementation in athenaCL a modular polyphonic poly paradigm algorithmic music composition system in a cross platform interactive command line environment The athenaCL system offers an open source object oriented composition tool written in Python The system can be scripted and embedded and includes integrated instrument libraries post tonal and microtonal pitch modeling tools multiple format graphical outputs and musical output in Csound MIDI audio file XML and text formats Software design analysis is framed within a broad historical and intertextual study of the themes approaches and systems of computer aided algorithmic composition CAAC A detailed history of the earliest experiments as well as

analysis of the foundational CAAC systems is provided Common problems and interpretations of CAAC are then presented in a historical and intertextual context drawn from the writings and systems of numerous composers and developers Toward the goal of developing techniques of comparative software analysis a survey of system design archetypes based on seven descriptors of CAAC systems is presented With this foundation athenaCL system components are analyzed in detail System components are divided into abstractions of musical materials abstractions of musical procedures and system architecture For each component object models Python examples and diagrams are provided Further each component is given context in terms of its compositional implications and relation to alternative and related models from the history of CAAC

Music and Fuzzy Logic Hanns-Werner Heister, 2021-02-21 This book unfolds the manifold complex and intertwined relations between Fuzzy Logic and music in a first comprehensive overview on this topic systematically as an outline as completely as possible in the aspects of Fuzzy Logic in this relation and especially in music as a process with three main phases five anthropological layers and thirteen forms of existence of the art work Classics Jazz Pop Folklore Being concerned with the ontological gnoseological psychological and music aesthetical status and the relative importance of different phenomena of relationship between music and Fuzzy Logic the explication follows the four main principles with five phenotypes of Fuzzy Logic with respect to music similarity sharpening 1 as filtering sharpening 2 as crystallization blurring and variation The book reports on years of author's research on topics that have been only little explored so far in the area of Music and Fuzzy Logic It merges concepts of music analysis with fuzzy logical modes of thinking in a unique way that is expected to attract both specialists of music and specialists of Fuzzy Logic and also non specialists in both fields The book introduces the concept of dialectic between sharpening and conscious blurring In turn some important aspects of this dialectic are discussed placing them in an historical dimension and ending in the postulation of a musical turn in the sciences with some important reflections concerning a Philosophy of Fuzzy Logic Moreover a production oriented thinking is borrowed from fuzzy logic to musicology in this book opening new perspectives in music and possibly also in other artistic fields
