of neurological examination relevant to the neonate and the infant This text then discusses the significance of obtaining a careful description of symptoms and the need to question the child as well as the parents Other chapters consider the variety of disorders that are genetically determined This book discusses as well the abnormalities at birth due to faults in the early growth and development of the body The final chapter deals with the advances in the field of genetics that contribute to the management of neurological diseases This book is a valuable resource for pediatric neurologists general pediatricians and public health physicians Acquired Neurological Speech/Language Disorders In Childhood Bruce E Murdoch,2017-07-28 The long held belief that acquired aphasia in children is primarily of the non fluent type has been challenged in recent years This book discusses language problems arising from cerebro vascular accidents occurring in childhood and from other A Neurodevelopmental Approach to Specific Learning Disorders Hilary Hart,Kingsley Whitmore,Guy Willems,1999-02-03 This volume considers the neurodevelopmental disorders such as dyslexia dyscalculia dysgraphia clumsiness and indeed all those learning difficulties to be found in a normal school population with an IQ of more than 70 Specific ideas about the causes of these disorders are presented along with very practical preventative and management information which will be welcomed by a wide range of professionals with an interest in paediatrics neurology developmental and educational psychology The Rehabilitation of Cognitive Disabilities Charles J. Long,J.M. Williams,2012-12-06 The rehabilitation of intellectual impairment resulting from brain injury has become a major professional activity of clinical neuropsychologists In recent years neuropsychology has developed from a professional role stressing assessment and diagnosis to one that now includes treatment and rehabilitation activities Such trends are also manifested in two new research interests of neuropsychologists the study of the generalizability of neuropsychological test findings to everyday abilities often referred to as the ecological validity of tests and outcome studies of cognitive retraining treatments Discovering the relationships between traditional neuropsychological tests and everyday behavior is important because the referral questions posed to neuropsychologists have changed Now the neuropsychologist is asked to comment on the patient s functional intellectual abilities as they relate to the everyday demands of home work and educational settings Of course the development of cognitive retraining theory and procedures allows neuropsychologists to intervene in the treatment of the cognitive problems that the neuropsychological evaluation has documented Since these approaches are still in their formative stages they have been the subject of clinical lore great controversy and little systematic research This situation prompted one of our presenters to lament Either you believe Cognitive Retraining is divinely inspired or the work of the devil There is apparently little middle ground Given this state of affairs the program committee of the Mid South Conference on Human Neuropsychology decided to focus on the role of neuropsychologists in rehabilitation Child Neurology Stephen Ashwal,2021-09-01 Child Neurology Its Origins Founders Evolution and Growth Second Edition updates the first biographical study of important contributors to the field of child neurology consisting of over 250 biographical sketches written by over 100 physicians specializing in
