Neuropathology A Guide For Practising Pathologists:

Neuropathology S. Love, 2012-12-06 In commissioning this volume of Current Topics in Pathology the editor of the series Prof Sir Colin Berry asked me to produce something which is aimed at the general pathologist but from the point of view of the neuropathologist who knows what is not being done well This was easier said than done Many aspects of neuropathology are encountered only infrequently in general pathology and are best dealt with by referral of material to a specialist unit Others need more extensive investigation than is practicable in a general pathology setting Yet neurological disorders in general are common and are encountered by general histopathologists paediatric and forensic pathologists on a daily basis particularly in autopsy practice In inviting contributions to this volume of Current Topics in Pathology I therefore biased the contents towards disorders in which the conduct of the autopsy and the initial approach to neuropathological investigation are of critical importance in making the diagnosis The authors all have a wealth of experience and expertise and I believe that this is reflected in their approach which is both personal and practical Indeed the emphasis in this book is very much on the provision of practical advice All of the chapters contain guidelines on the conduct of autopsies as well as information on the macroscopic and basic histological assessment of the nervous system in the relevant disorders *Oppenheimer's Diagnostic Neuropathology* Margaret Esiri, Waney Squier, Daniel Perl, 2006-02-24 *Oppenheimer's Diagnostic Neuropathology* A Practical Manual has become a modern classic in its field covering the practical aspects of the work of the neuropathologist Full of sensible advice and observations often omitted from neuropathology texts it guides the neuropathologist through the methods available to them when facing diagnostic questions The third edition has been fully updated to ensure authoritative coverage of this complex and fast moving discipline The experience of the authors is apparent on every page where superb illustrations combine with an accessible writing style to present complex academic information that could otherwise prove formidable to trainees and professionals alike An essential reference for postgraduate students of neuropathology and histopathology who need to acquire an understanding of neuropathology as part of their training this book will also be of interest to trained neuropathologists neurologists neurosurgeons and neuroradiologists *The Hospital Autopsy* Julian L. Burton, Guy Rutty, 2010-06-25 Now in full colour this new and revised edition of *The Hospital Autopsy* presents a clear and systematic approach to safe and effective modern autopsy practice for pathologists It begins by discussing issues such as legislation governing autopsies religious attitudes and ensuring safety before covering the procedures of external examination evisceration dissection of internal organs and report writing Six new chapters have been added and contemporary specialist techniques such as near virtual autopsy are covered in depth with chapters devoted to complex issues including perinatal autopsies maternal deaths and autopsies where the cause of death is unascertained *The Hospital Autopsy* is an indispensable resource for pathologists in training as well as a concise reference for practicing pathologists and autopsy technicians *Forensic Pathology Reviews Vol 2* Michael Tsokos, 2007-10-28 Cutting edge accounts of special

topics from various fields of forensic pathology and death scene investigation The authors explore new avenues for analyzing the pathology of death from starvation child neglect head injuries inflicted by glass bottles the clinical and pathological features of primary cerebral neoplasms obesity as it is relevant to the forensic pathologist and infant and early childhood asphyxial death Other areas of interest covered include suicide viral myocarditis in sudden death cases curious death scene phenomena hiding covering and undressing forensic entomology the interpretation of toxicological findings anabolic androgenic steroid abuse and autopsy findings of subendocardial hemorrhages
