Osteology Of The Miller Site:

Osteology of the Miller Site N. S. Ossenberg, 1969 The Miller site some twenty miles east of Toronto Ontario is a late pre Iroquoian village which was occupied about A D 1125 Dr W A Kenyon who excavated the site concluded that the settlement pattern burial practices and artifact inventory all indicated that the inhabitants of the site were lineal ancestors of the Ontario Iroquois Kenyon's report on the excavation the Miller Site was published as Art and Archaeology Occasional Paper No 14 Royal Ontario Museum University of Toronto 1968 This report is organized in two ways first to give an account of each individual and second to provide the vital statistics of the group as a whole the sex and age distribution the average measurements and the incidence of variations anomalies and pathology The second approach which involves largely a bone by bone description organizes the osteological data in such a way as to facilitate comparison of the Miller Site people with other groups Osteology of the Miller Site Nancy S. Ossenberg, 1990-06-01 **Bones of the Ancestors** Ronald F.

Williamson, Susan Pfeiffer, 2003-01-01 This book provides a rare glimpse of thirteenth century life and death in a southern Ontario Iroquoian community The discovery in 1997 of an Iroquoian ossuary containing the remains of at least 87 people has given scientists a remarkably detailed demographic profile of the Moatfield people as well as strong indicators of their health and diet Published in English **The Global History of Paleopathology** Jane E. Buikstra, Charlotte Roberts, 2012-06-07

The first comprehensive global history of the discipline of paleopathology **The Routledge Handbook of Archaeological Human Remains and Legislation** Nicholas Marquez-Grant, Linda Fibiger, 2011-03-21 Methodologies and legislative frameworks regarding the archaeological excavation retrieval analysis curation and potential reburial of human skeletal remains differ throughout the world As work forces have become increasingly mobile and international research collaborations are steadily increasing the need for a more comprehensive understanding of different national research traditions methodologies and legislative structures within the academic and commercial sector of physical anthropology has arisen The Routledge Handbook of Archaeological Human Remains and Legislation provides comprehensive information on the excavation of archaeological human remains and the law through 62 individual country contributions from Europe Asia Africa North America South America and Australasia More specifically the volume discusses the following What is the current situation including a brief history of physical anthropology in the country What happens on discovering human remains who is notified etc What is the current legislation regarding the excavation of archaeological human skeletal remains Is a license needed to excavate human remains Is there any specific legislation regarding excavation in churchyards Any specific legislation regarding war graves Are physical anthropologists involved in the excavation process Where is the cut off point between forensic and archaeological human remains e g 100 years 50 years 25 years Can human remains be transported abroad for research purposes What methods of anthropological analysis are mostly used in the country Are there any methods created in that country which are population specific Are there particular ethical issues that need to be

considered when excavating human remains such as religious groups or tribal groups In addition an overview of landmark anthropological studies and important collections are provided where appropriate The entries are contained by an introductory chapter by the editors which establish the objectives and structure of the book setting it within a wider archaeological framework and a conclusion which explores the current European and world wide trends and perspectives in the study of archaeological human remains The Routledge Handbook of Archaeological Human Remains and Legislation makes a timely much needed contribution to the field of physical anthropology and is unique as it combines information on the excavation of human remains and the legislation that guides it alongside information on the current state of physical anthropology across several continents It is an indispensable tool for archaeologists involved in the excavation of human remains around the world

Contributions to Physical Anthropology, 1978-1980 Jerome S. Cybulski, 1981-01-01 Contains seven papers dealing with the physical anthropology of earlier Canadian Native populations or with subject materials relevant to the interpretation of their skeletal remains Included are two site reports on prehistoric burials from British Columbia a detailed investigation of mandibular torus a skeletal trait commonly reported in Arctic populations and problems in paleopathology Published in English

Native Peoples of Canada D. A. Rokala, C. A. Meikljohn, 1986-01-01 The Manitoba Masterfile PBHD is a bibliographic database maintained at the University of Manitoba Currently the database contains 6 000 entries relating to population biology health and illness of Native North Americans The present volume of 2 100 entries 80% annotated presents the Masterfile content on prehistoric historic and contemporary Native populations from within the geo political boundaries of Canada Research on related populations is reported only when the reports include Canadian content Published in English

Biological Relationships of Southern Ontario Woodland Peoples Joseph Eldon Molto, 1983-01-01 A synthesis of biological relationships during the Woodland period of southern Ontario prehistory is presented The database consists of a battery of discontinuous nonmetric cranial traits which is used to compute C A B Smith's Mean Measure of Divergence MMD between 17 large N 20 crania Woodland samples The research design tests a series of hypotheses formulated from a review of previous skeletal and archaeological studies in the research area The main strategy is to eliminate those factors potentially biased toward producing Type I or Type II statistical errors and emphasize the selection of an appropriate battery of traits to compare the samples since inappropriate data would ruin attempts to estimate biological distance from the start Published in English

Before Ontario Marit K. Munson, Susan M. Jamieson, 2013-10-01 Before Ontario there was ice As the last ice age came to an end land began to emerge from the melting glaciers With time plants and animals moved into the new landscape and people followed For almost 15 000 years the land that is now Ontario has provided a home for their descendants hundreds of generations of First Peoples With contributions from the province's leading archaeologists Before Ontario provides both an outline of Ontario's ancient past and an easy to understand explanation of how archaeology works The authors show how archaeologists are able to study items as diverse as fish bones flakes of stone and stains in the soil to reconstruct the events and places of a distant past fishing parties long distance trade and houses built to withstand frigid winters Presenting new insights into archaeology's purpose and practice Before Ontario bridges the gap between the modern world and a past that can seem distant and unfamiliar but is not beyond our reach
