Self, War, and Society Mary Jo Deegan, 2017-09-08 George Herbert Mead 1863 1931 is a founding figure in the field of sociology His stature is comparable to that of his contemporaries Emile Durkheim and Max Weber Mead s contribution was a profound and unique American theory that analyzed society and the individual as social objects As Mead saw it both society and the individual emerged from cooperative democratic processes linking the self the other and the community Mary Jo Deegan a leading scholar of Mead s work traces the evolution of his thought its continuity and change She is particularly interested in the most controversial period of Mead s work in which he addressed topics of violence and the nation state Mead s theory of war peace and society emerged out of the historical events of his time particularly World

War I During this period he went from being a pacifist along with his contemporaries John Dewey and Jane Addams to being a strong advocate for war From 1917-1918 Mead became a leader in voicing the need for war based on his theory of self and society After the war he became disillusioned with President Woodrow Wilson with Americans failure to support mechanisms for international arbitration and with the political reasons for American participation in World War I He returned to a more pacifist and co-operative model of behavior during the 1920s when he became less political more abstract and more withdrawn from public debate The book includes Deegan's interpretation of Mead's early social thought his friendship and family networks the historical context of America at war and the importance of analysis of violence and the state from Mead's perspective She also provides illustrative selections from Mead's work much of which was previously unpublished

What Happens to People in a Competitive Society Svein Olaf Thorbjørnsen, 2020-01-24 In this book author Svein Olaf Thorbjørnsen probes the question What is at stake for human beings in a society dominated by competition particularly economic competition Is competition endemic to human nature Does it preserve the dignity and intrinsic value of the human being Does it secure better living conditions In a way the answer to these queries is a simple yes It can allow for superior satisfaction of fundamental needs legitimate self-love and self-realization and encourage positive feelings upon mastering a skill At the same time however competition can also contribute to a strong materialistic self-interest and support classicism social ranking and elitism other human beings become only means to a personal success thus jeopardizing fellowship and collaboration In a hyper-competitive environment some of the same positive human values mentioned above self-love self-realisation individuality and freedom can be viewed to pose a threat to the realisation of one's potential and to one's true humanity These competing contradictory aspects of competition are presented and discussed from perspectives across varying disciplines from social anthropology and economics to history ethics philosophy and theology

Abma, 2018-02-01 This book highlights views on responsive participatory and democratic approaches to evaluation from an ethos of care It critically scrutinizes and discusses the invisibility of care in our contemporary Western societies and evaluation practices that aim to measure practices by external standards Alternatively the book proposes several foci for evaluators who work from a care perspective or wish to encourage a caring society This is a society that sees evaluation and care as a continuously unfolding relational practice of moral political learning contributing to life sustaining webs At one level is the evaluator's immediately responsive and interpersonal encounter with the personal troubles of social actors most visible as Mills originally pointed out in an individual's biography and in those social settings directly open to the individual's lived experience At another level the sociological and political level the evaluator operates at what Mills called the arena of public issues where immediate personal troubles are seen not only as problems encountered by individuals but as the result of structural and political arrangements in society evaluation for a caring society is thought to operate at both levels Thomas A Schwandt Professor Emeritus University of Illinois at Urbana Champaign The intricate relationship between evaluation and care is hardly addressed by evaluators or caregivers This book fills a gap as it focuses on the relationship between evaluation and care and provides a multitude of examples of evaluation as a caring practice the book can serve as an antidote to the present day haste in social practices and contribute in form and content to developing an evaluation practice which may foster a caring society Guy Widdershoven Professor of Philosophy and Ethics of Medicine and head of the Department of Medical Humanities at VU University Medical Center VU University Amsterdam **On Society** Anthony Elliott, Bryan S.
