Others How Animals Made Us Human:

What are the Animals to Us? David Aftandilian, 2007 In What Are the Animals to Us scholars from a wide variety of academic disciplines explore the diverse meanings of animals in science religion folklore literature and art **The Others** Paul Shepard, 1996 Paul Shepard has been one of the most brilliant and original thinkers in the field of human evolution and ecology for more than forty years His thought provoking ideas on the role of animals in human thought dreams personal identity and other psychological and religious contexts have been presented in a series of seminal writings including Thinking Animals The Tender Carnivore and the Sacred Game and now The Others his most eloquent book to date The Others is a fascinating and wide ranging examination of how diverse cultures have thought about reacted to and interacted with animals Shepard argues that humans evolved watching other animal species participating in their world suffering them as parasites wearing their feathers and skins and making tools of their bones and antlers For millennia we have communicated their significance by dancing sculpting performing imaging narrating and thinking them The human species cannot be fully itself without these others Shepard considers animals as others in a world where otherness of all kinds is in danger and in which otherness is essential to the discovery of the true self We must understand what to make of our encounters with animals because as we prosper they vanish and ultimately our prosperity may amount to nothing without them **This Sacred Earth** Roger S. Gottlieb, 2003-11-07 Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly theological and activist religious environmentalism the second edition of This Sacred Earth is an unparalleled resource for the study of religion s complex relationship to the environment The Eco-Self in Early Modern English Literature Elizabeth Gruber, 2025-10-01 The Eco Self in Early Modern English Literature tracks an important shift in early modern conceptions of selfhood arguing that the period hosted the birth of a new subset of the human the eco self which melds a deeply introspective turn with an abiding sense of humans embedment in the world A confluence of cultural factors produced the relevant changes Of paramount significance was the rapid spread of literacy in England and across Europe reading transformed the relationship between self and world retooled moral reasoning and even altered human anatomy This book pursues the salutary possibilities including the ecological benefits of this redesigned self by advancing fresh readings of texts by William Shakespeare Christopher Marlowe John Webster and Margaret Cavendish The eco self offers certain refinements to ecological theory by renewing appreciation for the rational deliberative functions that distinguish humans from other species **Art, Animals, and Experience** Elizabeth Sutton, 2017-04-21 Cover Title Copyright Dedication Contents List of Figures List of Color Plates Acknowledgments 1 Relational Ethics and Aesthetics Being and Thinking with Art and Animals Between Presence and Absence An Ethical Art History 2 Dogged Flesh Rembrandt s Presentation in the Temple c 1640 Real and Represented Dogs Rembrandt s Three R s Radical Reflective Revelatory The Rhetoric of Etching Fleshly Experience Past Made Present 3 Glances with Wolves Encounters with Little John and Joseph

Criminology Piers Beirne, Nigel South, 2013-09-05 Explores the ways in which governments transnational corporations military apparatuses and ordinary people routinely harm environments other animals and humanity **Kinship to Mastery** Stephen R. Kellert, 2003-10 Kinship to Mastery is a fascinating and accessible exploration of the notion of biophilia the idea that humans having evolved with the rest of creation possess a biologically based attraction to nature and exhibit an innate affinity for life and lifelike processes Stephen R Kellert sets forth the idea that people exhibit different expressions of biophilia in different contexts and demonstrates how our quality of life in the largest sense is dependent upon the richness of our connections with nature While the natural world provides us with material necessities food clothing medicine clean air pure water it just as importantly plays a key role in other aspects of our lives including intellectual capacity emotional bonding aesthetic attraction creativity imagination and even the recognition of a just and purposeful existence As Kellert explains each expression of biophilia shows how our physical material intellectual emotional and spiritual well being is to a great extent dependent on our relationships with the natural world that surrounds us Kinship to Mastery is a thought provoking examination of a concept that while not widely known has a significant and direct effect on the lives of people everywhere Because the full expression of biophilia is integral to our overall health our ongoing destruction of the environment could have far more serious consequences than many people think In a readable and compelling style Kellert describes and explains the concept of biophilia and demonstrates to a general audience the wide ranging implications of environmental degradation Kinship to Mastery continues the exploration of biophilia begun with Edward O Wilson s landmark book *Biophilia* Harvard University Press 1984 and followed by *The Biophilia Hypothesis* Island Press 1993 co edited by Wilson and Kellert which brought together some of the most creative scientists of our time to explore Wilson s theory in depth Being Animal Anna L. Peterson, 2013-05-14 Conducting the first systematic examination of the place of animals in scholarly and popular thinking about nature Anna L Peterson builds a nature ethic that conceives of nonhuman animals as active subjects simultaneously a part of nature and human society *Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History* Dominik Ohrem, 2025-11-18 Volume IV comprises two sections dealing respectively with the development of pet culture and its evolution as a cultural institution over the course of the long nineteenth century and with the variegated presence of domesticated and feralised animals in U S cities Closely tied to the

antebellum rise of the American middle class family and the sentimentalisation of certain human animal relationships by the turn of the twentieth century American petkeeping had become the target of an expansive industry that offered everything from gourmet pet foods and fashionable accessories to healthcare and boarding services This proliferation of companion animals also had a significant impact on urban life Besides walking sitting or lying on sidewalks and being sold in city stores and on street corners in cases of abandonment the animals swelled an ever increasing population of canine and feline strays Together with horses pigs cows chicken and urban wildlife these animals fundamentally shaped the routines rhythms and general experience of nineteenth century urban life for human city dwellers **Strangers to Nature** Gregory R.

Smulewicz-Zucker,2012-03-22 **Strangers to Nature** challenges a reading public that has grown complacent with the standard framework of the animal ethics debate Human influence on and the control of the natural world has greater consequences than ever making the human impact on the lives of animals more evident We cannot properly interrogate our conduct in the world without a deeper understanding of how our actions affect animals It is crucial that the human animal relationship become more central to ethical inquiry This volume brings together many of the leading scholars who work to redefine and expand the discourse on animal ethics The contributors examine the radical developments that change how we think about the status of non human animals in our society and our moral obligations **Strangers to Nature** will engage both scholars and lay people by revealing the breadth of theorizing about current human non human animal relationships **Encyclopedia of Environment and Society** Paul Robbins,2007-08-27 As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader s guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN s economic indicators complete the set *Library Journal* this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both for its content and as a yardstick to measure progress toward sustainability and conservation *Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008* This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all *Booklist Starred Review* Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding *The Encyclopedia of Environment and Society* brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an

emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world

The Routledge Companion to Animal-Human History Hilda Kean, Philip Howell, 2018-09-03 The Routledge Companion to Animal Human History provides an up to date guide for the historian working within the growing field of animal human history Giving a sense of the diversity and interdisciplinary nature of the field cutting edge contributions explore the practices of and challenges posed by historical studies of animals and animal human relationships Divided into three parts the Companion takes both a theoretical and practical approach to a field that is emerging as a prominent area of study Animals and the Practice of History considers established practices of history such as political history public history and cultural memory and how animal human history can contribute to them Problems and Paradigms identifies key historiographical issues to the field with contributors considering the challenges posed by topics such as agency literature art and emotional attachment The final section Themes and Provocations looks at larger themes within the history of animal human relationships in more depth with contributions covering topics that include breeding war hunting and eating As it is increasingly recognised that nonhuman actors have contributed to the making of history The Routledge Companion to Animal Human History provides a timely and important contribution to the scholarship on animal human history and surrounding debates *Why the Wild Things Are* Gail F. Melson, 2005-03-15 What does it mean that children s earliest dreams are of

animals What is the unique gift that a puppy can give to a boy This book examines children s many connections to animals and to explore their developmental significance

Ignoring Nature No More Marc Bekoff,2024-05-31 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike

Dreaming of Animals Valerie Harms,2005 What are the links between the inner world of our imagination emotions and thoughts and the outer world where we encounter animals Can it be that the psychological and ecological are one and the same This book shows how their convergence might alter our perception of community Currently the connection between people and animals appears dysfunctional because of the accelerated loss of species Since we will not save what we do not love this book seeks to restore the honor and importance of animals Dreams including daydreams thoughts ideas cultural myths and sleep dreams have positive and negative consequences in the world In order to help heal ourselves and the Earth this book dives deeply into the lives of many animals documents our relationship to them over time and shows how to work with dreams and dialogues A great emotion transforming in effect is released when we take the beauty and power of dream animals to heart

Dialogues on Free Will Laura W. Ekstrom,2025-12-16 What kinds of conversations might take place when two intelligent and informed young people one a strong believer in free will and the other just as certain that we don t have it get together to discuss their viewpoints This new volume in the *Philosophical Dialogues on Contemporary Problems* series introduces both sides of this age old philosophical debate in a fun and accessible way Author and acclaimed philosopher Laura W Ekstrom has created Rosa and Leif two college students who each give voice to the strongest arguments in the most important debates about free will and moral responsibility Over the course of eleven days Rosa a strong defender of free will draws on her religious beliefs

and her thoughts about love and meaning in human life Leif her equally informed and articulate interlocutor raises challenges to Rosa's points drawing on the latest research and ideas in neuroscience theology and social psychology Along the way they must carefully develop clear reasons for their positions while offering a fair hearing to alternative viewpoints and spurring readers to reach their own conclusions Working in a philosophical tradition established by Plato these dialogues are both philosophically substantive and provocative inviting readers to ponder issues that are fundamental to our understanding of the nature of choice responsibility and ourselves as human beings *Information Arts* Stephen Wilson,2003-02-28 An introduction to the work and ideas of artists who use and even influence science and technology A new breed of contemporary artist engages science and technology not just to adopt the vocabulary and gizmos but to explore and comment on the content agendas and possibilities Indeed proposes Stephen Wilson the role of the artist is not only to interpret and to spread scientific knowledge but to be an active partner in determining the direction of research Years ago C P Snow wrote about the two cultures of science and the humanities these developments may finally help to change the outlook of those who view science and technology as separate from the general culture In this rich compendium Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics the physical sciences biology kinetics telecommunications and experimental digital systems such as artificial intelligence and ubiquitous computing In addition to visual documentation and statements by the artists Wilson examines relevant art theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future He also provides lists of resources including organizations publications conferences museums research centers and Web sites

Animal History in the Modern City Clemens Wischermann,Aline Steinbrecher,Philip Howell,2018-09-06 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Animals are increasingly recognized as fit and proper subjects for historians yet their place in conventional historical narratives remains contested This volume argues for a history of animals based on the centrality of liminality the state of being on the threshold not quite one thing yet not quite another Since animals stand between nature and culture wildness and domestication the countryside and the city and tradition and modernity the concept of liminality has a special resonance for historical animal studies Assembling an impressive cast of contributors this volume employs liminality as a lens through which to study the social and cultural history of animals in the modern city It includes a variety of case studies such as the horse human relationship in the towns of New Spain hunting practices in 17th century France the birth of the zoo in Germany and the role of the stray dog in the Victorian city demonstrating the interrelated nature of animal and human histories *Animal History in the Modern City* is a vital resource for scholars and students interested in animal studies urban history and historical geography *Homeless Dogs and Melancholy Apes* Laura S. Brown,2017-01-31 In eighteenth century England the encounter between humans and other animals took a singular turn with the discovery of the great apes and the rise of bourgeois pet keeping These historical

changes created a new cultural and intellectual context for the understanding and representation of animal kind and the nonhuman animal has thus played a significant role in imaginative literature from that period to the present day In *Homeless Dogs and Melancholy Apes* Laura Brown shows how the literary works of the eighteenth century use animal kind to bring abstract philosophical ontological and metaphysical questions into the realm of everyday experience affording a uniquely flexible perspective on difference hierarchy intimacy diversity and transcendence Writers of this first age of the rise of the animal in the modern literary imagination used their nonhuman characters from the lapdogs of Alexander Pope and his contemporaries to the ill mannered monkey of Frances Burney's *Evelina* or the ape like Yahoos of Jonathan Swift to explore questions of human identity and self definition human love and the experience of intimacy and human diversity and the boundaries of convention Later literary works continued to use imaginary animals to question human conventions of form and thought Brown pursues this engagement with animal kind into the nineteenth century through works by Mary Shelley Charles Dickens and Elizabeth Barrett Browning and into the twentieth with a concluding account of Paul Auster's dog novel *Timbuktu* Auster's work suggests that today as in the eighteenth century imagining other animals opens up a potential for dissonance that creates distinctive opportunities for human creativity

Inside the Animal Mind George Page, 2001-08-02 In the bestselling tradition of *When Elephants Weep* and *Dogs Don't Lie About Love* *Inside the Animal Mind* is a groundbreaking exploration of the nature and depth of animal intelligence While in the past scientists have refused to acknowledge that animals have anything like human intelligence a growing body of research reveals otherwise We've discovered ants that use leaves as tools to cross bodies of water woodpecker finches that hold twigs in their beaks to dig for grubs and bonobo apes that can use sticks to knock down fruit or pole vault over water Not only do animals use tools some also display an ability to learn and problem solve Based on the latest scientific and anecdotal evidence culled from animal experts in the labs and the field *Inside the Animal Mind* is an engrossing look at animal intelligence cognitive ability problem solving and emotion George Page originator and host of the long running PBS series *Nature* offers us an informed entertaining and humanistic investigation of the minds of predators and scavengers birds and primates rodents and other species Illustrated with twenty four black and white photographs the book is the companion to the three part hour long show of the same name hosted by Page
