*Women Hate Peace* Conrad Riker, 101-01-01 She Doesn t Want Calm She Wants Crisis Have you ever noticed that the harder you try to be kind stable and responsible the more she acts out Why do women punish peace and reward chaos Why does a high value man feel like a target not a partner Women are not broken their behavior is written into biology not trauma Love is often a cover for control drama and emotional exploitation The modern relationship is a rigged game this book shows you the rules Peace is not desired it is seen as weakness and weakness is rejected Women don t seek safety they seek intensity and intensity requires conflict The BPD spectrum isn t rare it s the operating system of femininity in the modern age You re not crazy you re sane in a world that calls sanity toxic masculinity This book doesn t blame women it reveals the truth so you can act with eyes open If you want to stop being used manipulated and drained by women who claim to love you then buy this book today

**Methodologies in Peace Psychology** Diane Bretherton, Siew Fang Law, 2015-09-03 This volume looks at research methods through the lens of peace studies and peace values. Apart from reviewing established methods from peace psychology, it presents some innovative ideas for conducting research in the area of peace psychology. Many of these methods are drawn from the field from activities used by active peace practitioners. A critical component of this volume is its core argument that peace research should be conducted by peaceful means and should model peaceful processes. Organized thematically, the volume begins with a review of the established best practices in peace psychology research methodology, including methods for qualitative research, for quantitative research, and participative action networks. In doing so, it also points to some of the limitations of working for peace within the tradition of a single discipline and to the need to expand psychology methodology to methodologies. Therefore, the second half of the volume proceeds to explore the realm of innovative, relatively unorthodox research methods such as participatory and workshop methods, the creative arts, and sports for research purposes. The use of new advances in information technology to conduct peaceful research are also discussed. The concluding chapters synthesize key issues from the previous chapters and link peace psychology with ideas and implementation of research designs and practices. Finally, it discusses the nature of academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to build a more peaceful world. Overall, this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research. Many researchers find the experience of doing research a somewhat lonely, if not isolating experience. **Methodologies in Peace Psychology** Peace Research by Peaceful Means aims to alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research. This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference, in addition to encouraging more reflection and analysis for experienced peace psychologists.

**SECURITY AND PEACE** J. Isawa Elaigwu, 2014-05-02 This book deals with challenges of security in Nigeria, including the relationship between security and peace as imperatives for national development. It also analyses the various sources of insecurity in Nigeria and the challenges they pose to democratic governance. The book is a minefield of data on incidences and patterns of violent conflicts in Nigeria since May 29, 1999, which scholars and other readers are likely to find useful.

**Democracy and Deterrence: Foundations for an Enduring World Peace** Walter Gary Sharp, 2009-05 Two fundamental strategies are necessary to create lasting peace in the world: facilitating the spread of democracy and maintaining comprehensive deterrence mechanisms targeted at individual world leaders. Sharp surveys conventional approaches to avoiding war and presents evidence to validate the democratic peace principle, the notion that democracies are inherently more peaceful than non-democracies, and the incentive theory of war avoidance formulated by John Norton Moore. Sharp proposes a mathematical formula that can be used to predict the probability of peace for a given nation.
