The profession of peacemaking has been practiced by indigenous communities around the world for many centuries; however, the ethnocentric world view of the West, which dominated the world of ideas for the last five centuries, dismissed indigenous forms of peacemaking as irrelevant and backward tribal rituals. Neither did indigenous forms of peacemaking fit the conception of modernization and development of the new ruling elites who inherited the postcolonial state. The new profession of Alternative Dispute Resolution (ADR), which emerged in the West as a new profession during the 1970s, neglected the tradition and practice of indigenous forms of peacemaking. The scant literature which has appeared on this critical subject tends to focus on the ritual aspect of the indigenous practices of peacemaking. The goal of this book is to fill this lacuna in scholarship. More specifically, this work focuses on the process of peacemaking, exploring the major steps of the process of peacemaking which the peacemakers follow in dislodging antagonists from the stage of hostile confrontation to peaceful resolution of disputes and eventual reconciliation. The book commences with a critique of ADR for neglecting indigenous processes of peacemaking and then utilizes case studies from different communities around the world to focus on the

following major themes the basic structure of peacemaking process change and continuity in the traditions of peacemaking the role of indigenous women in peacemaking the nature of the tools peacemakers deploy common features found in indigenous processes of peacemaking and the overarching goals of peacemaking activities in indigenous communities

John. Ikenberry, Michael

Mastanduno, 2003-05-21 What will the Asia Pacific rim look like in the years ahead What tools will international relations theorists need to understand the complex relationship among China Japan and the United States as the three powers shape the economic and political future of this crucial region Some of the best and most innovative scholars in international relations and Asian area studies gather here with the working premise that stability in the broader Asia Pacific region is in large part a function of the behavior of and relationships among these three major powers Each author analyzes the foreign policy behavior of one or more of these states and or relations among them in an effort to make claims about the prospects

for regional stability Some of the chapters focus on security relationships some on economic relations and some on the interaction of the two The authors do not promote any particular theoretical perspective but instead draw on the full diversity of theoretical approaches in contemporary international relations scholarship to illuminate international interactions among the Pacific powers The creative collaboration of international relations and Asian studies specialists presents the opportunity to assess the applicability of Western categories of analysis to the beliefs and behaviors of Asian actors The scholars in this volume share the conviction that a deeper understanding of the effects of cultural divides between Asian and American policymakers is essential if the Pacific rim s economic and regional security is to be safeguarded
