Schmaltz, Delphine Antoine-Mahut, 2019-05-02 The Oxford Handbook of Descartes and Cartesianism comprises fifty specially written chapters on Ren Descartes 1596 1650 and Cartesianism the dominant paradigm for philosophy and science in the seventeenth century written by an international group of leading scholars of early modern philosophy The first part focuses on the various aspects of Descartes s biography including his background intellectual contexts writings and correspondence and philosophy with chapters on his epistemology method metaphysics physics mathematics moral philosophy political thought medical thought and aesthetics The chapters of the second part are devoted to the defense development and modification of Descartes s ideas by later generations of Cartesian philosophers in France the Netherlands Italy and elsewhere The third and final part considers the opposition to Cartesian philosophy by other philosophers as well as by civil ecclesiastic and academic authorities This handbook provides an extensive overview of Cartesianism its doctrines its legacies and its fortunes in the period based on the latest research

Receptions of Descartes Tad M. Schmaltz, 2012-10-12 *Receptions of Descartes* is a collection of work by an international group of authors that focuses on the various ways in which Descartes was interpreted defended and criticized in early modern Europe The book is divided into five sections the first four of which focus on Descartes reception in specific French Dutch Italian and English contexts and the last of which concerns the reception of Descartes among female philosophers

Causation and Cognition in Early Modern Philosophy Dominik Perler, Sebastian Bender, 2019-07-23 This book re examines the roles of causation and cognition in early modern philosophy The standard historical narrative suggests that early modern thinkers abandoned Aristotelian models of formal causation in favor of doctrines that appealed to relations of efficient causation between material objects and cognizers This narrative has been criticized in recent scholarship from at least two directions Scholars have emphasized that we should not think of the Aristotelian tradition in such monolithic terms and that many early modern thinkers did not unequivocally reduce all causation to efficient causation In line with this general approach this book features original essays written by leading experts in early modern philosophy It is organized around five guiding questions What are the entities involved in causal processes leading to cognition What type s or kind s of causality

are at stake Are early modern thinkers confined to efficient causation or do other types of causation play a role What is God's role in causal processes leading to cognition How do cognitive causal processes relate to other non cognitive causal processes Is the causal process in the case of human cognition in any way special How does it relate to processes involved in the case of non human cognition The essays explore how fifteen early modern thinkers answered these questions Francisco Suarez René Descartes Louis de la Forge Géraud de Cordemoy Nicolas Malebranche Thomas Hobbes Baruch de Spinoza Gottfried Wilhelm Leibniz Ralph Cudworth Margaret Cavendish John Locke John Sergeant George Berkeley David Hume and Thomas Reid The volume is unique in that it explores both well known and understudied historical figures and in that it emphasizes the intimate relationship between causation and cognition to open up new perspectives on early modern philosophy of mind and metaphysics Pierre-Daniel Huet (1630-1721) and the Skeptics of his Time José R. Maia

Neto, 2022-06-28 This book offers a detailed and scholarly historical and philosophical examination of French scepticism from Descartes to the beginning of the Enlightenment by examining the views of Pierre Daniel Huet 1630-1721 It shows the crucial role played by Huet in the modification of the early modern sceptical tradition from a practical perspective closer to ancient scepticism mostly presented by Montaigne and Charron to an epistemological and metaphysical perspective strongly influenced by Descartes's doubt The book examines and gives original interpretations of the various sceptical and semi-sceptical views held in the period and their connections to Huet's own scepticism Besides known philosophers such as Descartes Gassendi Pascal and Bayle the book also accesses sceptical views held by secondary figures such as La Mothe Le Vayer and Simon Foucher and others who have not thus far been connected to the sceptical tradition such as Jean Baptiste du Hamel and Madeleine de Scudéry The book is useful for scholars in the field of early modern ideas philosophical religious and scientific *The Battle of the Gods and Giants Redux* Patricia Easton, 2015-09-07 The Battle of Gods and Giants Redux is a collection of 14 original essays by leading scholars in the field Part One includes figures and topics associated with

Descartes the chief idealist in the story including Leibniz Spinoza and Malebranche Part Two includes figures and topics that fall on the Gassendist materialist side of the battle including Hobbes Bayle and Locke In organizing these varied discussions along these themes and lines something more than the sum of the parts emerges The reader will gain a breadth and depth of insight into the battle of ideas in early modern thought historical philosophical and interpretive Contributors are Margaret Atherton Martha Brandt Bolten Patricia Easton Lorne Falkenstein Nicolas Jolley Jos Maia Neto Steven Nadler Alan Nelson Lawrence Nolan Donald Rutherford Tad Schmaltz Kurt Smith Julie Walsh and Richard Watson **Psychosomatic**

Disorders in Seventeenth-Century French Literature Bernadette Höfer, 2016-04-15 Bernadette Höfer's innovative and ambitious monograph argues that the epistemology of the Cartesian mind-body dualism and its insistence on the primacy of analytic thought over bodily function has surprisingly little purchase in texts by prominent classical writers In this study Höfer explores how Surin Molière Lafayette and Racine represent interconnections of body and mind that influence behaviour

both voluntary and involuntary and that thus disprove the classical notion of the mind as distinct from and superior to the body The author s interdisciplinary perspective utilizes early modern medical and philosophical treatises as well as contemporary medical compilations in the disciplines of psychosomatic medicine neurobiology and psychoanalysis to demonstrate that these seventeenth century French writers established a view of human existence that fully anticipates current thought regarding psychosomatic illness *Insiders and Outsiders in Seventeenth-Century Philosophy* G.A.J. Rogers, Tom Sorell, Jill Kraye, 2009-10-28 Seventeenth century philosophy scholars come together in this volume to address the Insiders Descartes Spinoza Leibniz Locke and Hobbes and Outsiders Pierre Gassendi Kenelm Digby Theophilus Gale Ralph Cudworth and Nicholas Malebranche of the philosophical canon and the ways in which reputations are created and confirmed In their own day these ten figures were all considered to be thinkers of substantial repute and it took some time for the Insiders to come to be regarded as major and original philosophers Today these Insiders all feature in the syllabi of most history of philosophy courses taught in western universities and the papers in this collection contrasting the stories of their receptions with those of the Outsiders give an insight into the history of philosophy which is generally overlooked

Aquinas on Transubstantiation Reinhard Hutter, 2019 Aquinas on Transubstantiation treats one of the most frequently mis understood and mis represented teachings of Thomas Aquinas Eucharistic transubstantiation The study interprets Aquinas s teaching as an exercise of holy teaching sacra doctrina that intends to show theologically and back up philosophically the simple yet profound thesis that transubstantiation affirms nothing but the truth of Christ s words at the Last Supper This is my body This is my blood Yet in order to achieve a contemporary ressourcement of this simple yet profound truth it is necessary to probe the depths of Thomas Aquinas s philosophical interpretation of it For Thomas Aquinas in regarding the truth of Eucharistic conversion it is faith that preserves the human intellect from missing or dismissing the mystery announced in Christ s words Faith however is not intellectually blind a faith that as is often erroneously held is commanded by arbitrary divine dictates to which the will submits in blind obedience Rather Aquinas takes faith is sustained but not constituted by an intellectual contemplation of the proposed mystery of faith by faith seeking understanding Thomas Aquinas unfolds this exercise of understanding guided by faith in the medium of a metaphysical contemplation that affords a profound intellectual appreciation of this central mystery of faith precisely as mystery Thomas s metaphysical contemplation of Eucharistic conversion gestures toward the blinding light of superintelligibility experienced as the unique darkness that surrounds this sublime mystery of faith A ressourcement in Thomas Aquinas s doctrine of transubstantiation also affords an renewed appreciation of the Church s affirmation of transubstantiation as the most apt term for the interpretation of the mystery of Eucharistic conversion and a greater precision of what is centrally at stake in this mystery in the ongoing ecumenical conversation of this most central Christian teaching A doctrinally sound ecumenically informed and philosophically reflected contemporary Catholic theology cannot afford to ignore or dismiss Aquinas s surpassing account of

Eucharistic conversion **Hume's Dialogues Concerning Natural Religion** Kenneth Williford, 2023-10-31 David Hume's *Dialogues Concerning Natural Religion* is a philosophical and literary classic of the highest order. It is also an extremely relevant work because of its engagement with issues as alive today as in Hume's time: the Design Argument for a deity, the Problem of Evil, the dangers of superstition and fanaticism, the psychological roots and social consequences of religion. In this outstanding and unorthodox collection, an international team of scholars engage with Hume's classic work. The chapters include state-of-the-art contributions on the central interpretive questions posed by the *Dialogues*, as well as major contributions relating the work to contemporary issues in Philosophy of Religion, Philosophy of Science, Moral Psychology, and Social Philosophy. Additional contributions tackle the historical and philosophical background of the *Dialogues*, relating it to Hume's own systematic philosophy, to the work of other key seventeenth and eighteenth-century figures (Locke, Clarke, Bayle, Cudworth, Malebranche, Spinoza, Lord Bolingbroke, and Voltaire, among others), to early modern neo-Epicureanism, in the life sciences, and notably to what Darwin missed by thinking too much like William Paley and not enough like Hume's Philo. Overall, this volume provides fresh and even groundbreaking perspectives on Hume's *Dialogues Concerning Natural Religion*. It is essential reading for students and scholars of Hume, the History of Modern Philosophy, Philosophy of Religion, and the History and Philosophy of Science.

Culture of Enlightening Jeffrey D. Burson, 2019-08-01 Recent scholarly and popular attempts to define the Enlightenment, account for its diversity, and evaluate its historical significance suffer from a surprising lack of consensus at a time when the social and political challenges of today cry out for a more comprehensive and serviceable understanding of its importance. This book argues that regnant notions of the Enlightenment—the Radical Enlightenment and the multitude of regional and religious enlightenments proposed by scholars—all share an entangled intellectual genealogy rooted in a broader revolutionary culture of enlightening that took shape over the long arc of intellectual history from the waning of the sixteenth-century Reformations to the dawn of the Atlantic Revolutionary era. Generated in competition for a changing readership and forged in dialog and conflict, dynamic and diverse notions of what it meant to be enlightened constituted a broader culture of enlightening from which the more familiar strains of the Enlightenment emerged, often ironically and accidentally from originally religious impulses and theological questioning. By adapting for the first time methodological insights from the scholarship of historical entanglement (*l'histoire croisée*) to the study of the Enlightenment, this book provides a new interpretation of the European republic of letters from the late 1600s through the 1700s by focusing on the lived experience of the long-neglected Catholic theologian, historian, and contributor to Diderot's *Encyclopédie*, Abbé Claude Yvon. The ambivalent historical memory of Yvon, as well as the eclectic and global array of his sources and endeavors, Burson argues, can serve as a gauge for evaluating historical transformations in the surprisingly diverse ways in which eighteenth-century individuals spoke about enlightening human reason, religion, and society. Ultimately, Burson provocatively claims that even the most radical fruits of the Enlightenment can be understood as the unintended

offspring of a revolution in theology and the cultural history of religious experience The Newton Wars & the Beginning of the French Enlightenment J.B. Shank,2024-05-31 Nothing is considered more natural than the connection between Isaac Newton's science and the modernity that came into being during the eighteenth century Enlightenment Terms like Newtonianism are routinely taken as synonyms for Enlightenment and modern thought yet the particular conjunction of these terms has a history full of accidents and contingencies Modern physics for example was not the determined result of the rational unfolding of Newton's scientific work in the eighteenth century nor was the Enlightenment the natural and inevitable consequence of Newton's eighteenth century reception Each of these outcomes in fact was a contingent event produced by the particular historical developments of the early eighteenth century A comprehensive study of public culture The Newton Wars and the Beginning of the French Enlightenment digs below the surface of the commonplace narratives that link Newton with Enlightenment thought to examine the actual historical changes that brought them together in eighteenth century time and space Drawing on the full range of early modern scientific sources from studied scientific treatises and academic papers to book reviews commentaries and private correspondence J B Shank challenges the widely accepted claim that Isaac Newton's solitary genius is the reason for his iconic status as the father of modern physics and the philosophemovement **The Cartesian Mind** Jorge Secada, Travis Tanner, Cecilia Wee, 2025-09-03 Descartes is widely acknowledged as a central figure in the origins of modernity The nature of his thought and of the role it played is however a matter of considerable dispute among experts The Cartesian Mind is a significant contribution to this debate It covers the full extent of his work not only placing it in its historical context but also exploring its reception legacy and contemporary significance Comprising over 40 chapters by an international team of distinguished scholars the collection is divided into 3 parts Historical Context Philosophical Themes Reception and Influence Within these parts key topics are addressed including Descartes's life and works Platonism Scholasticism Stoicism skepticism atomism meditation method the self God will and freedom mind and body biology and medicine causation mathematics the natural sciences philosophy of science ethics and the origins of idealism Descartes's reception and legacy within science and philosophy from the seventeenth century to our days including current analytic and continental traditions as well as within the broader contemporary culture also receive sustained attention Descartes's work is central to all areas of philosophy including epistemology metaphysics philosophy of mind philosophy of science and ethics As such The Cartesian Mind is essential reading and an indispensable tool for all students and researchers in the discipline The Best of All Possible Worlds Steven Nadler, 2008-10-28 In the spring of 1672 the German philosopher and mathematician Gottfried Wilhelm Leibniz arrived in Paris on a furtive diplomatic mission That project was abandoned quickly but Leibniz remained in Paris with a singular goal to get the most out of the city's intellectual and cultural riches He benefited above all from his friendships with France's two greatest philosopher theologians of the period Antoine Arnauld and Nicolas de Malebranche The interactions of these three men would prove of

great consequence not only for Leibniz's own philosophy but for the development of modern philosophical and religious thought. Despite their wildly different views and personalities, the three philosophers shared a single passionate concern: resolving the problem of evil. Why is it that in a world created by an all-powerful, all-wise, and infinitely just God, there is sin and suffering? Why do bad things happen to good people and good things to bad people? This is the story of a clash between radically divergent worldviews. But it is also a very personal story. At its heart are the dramatic and often turbulent relationships between three brilliant and resolute individuals. In this lively and engaging book, Steven Nadler brings to life a debate that obsessed its participants, captivated European intellectuals, and continues to inform our ways of thinking about God, morality, and the world.

The Jesuit Suppression in Global Context Jeffrey D. Burson, Jonathan Wright, 2015-10-29 This volume analyses the causes and consequences of the Jesuit Suppression, one of the most dramatic events in eighteenth-century history.

The Collapse of Mechanism and the Rise of Sensibility Stephen Gaukroger, 2010-11-25 How did we come to have a scientific culture, one in which cognitive values are shaped around scientific ones? Stephen Gaukroger presents a rich and fascinating investigation of the development of intellectual culture in early modern Europe, a period in which understandings of the natural realm began to fragment.

Secret conversions to Judaism in early modern Europe [electronic resource] Martin Mulsow, Richard Henry Popkin, 2004 This volume deals with conversions to Judaism from the 16th to the 18th century. It provides six case studies by leading international scholars on phenomena as crypto-Judaism, judaizing, reversion of Jewish Christian converts, and secret conversion of non-Jewish Christians for intellectual reasons. The first contributions examine George Buchanan and John Dury, followed by three studies of the milieu of late seventeenth-century Amsterdam. The last essay is concerned with Lord George Gordon and Cabbalistic Freemasonry. The contributions will be of interest for intellectual historians but also historians of political thought or Jewish studies.

Contributors include Elisheva Carlebach, Allison P. Coudert, Martin Mulsow, Richard H. Popkin, Marsha Keith Schuchard, and Arthur Williamson.

Evil Andrew P. Chignell, 2019-04-16 Thirteen original essays examine the conceptual history of evil in the West, from ancient Hebrew literature and Greek drama to Darwinism and Holocaust theory. Thirteen reflections contextualize the philosophical developments by looking at evil through the eyes of animals, poets, mystics, witches, librettists, film directors, and tech executives.

1668 Peter Sahlins, 2017-10-13 When animals and their symbolic representations in the Royal Menagerie in art, in medicine, in philosophy, helped transform the French state and culture? Peter Sahlins's brilliant new book reveals the remarkable and understudied animal moment in and around 1668, in which authors including La Fontaine, whose Fables appeared in that year, anatomists, painters, sculptors, and especially the young Louis XIV turned their attention to nonhuman beings. At the center of the Year of the Animal was the Royal Menagerie in the gardens of Versailles, dominated by exotic and graceful birds. In the unfolding of his original and sophisticated argument, Sahlins shows how the animal bodies of the menagerie and others were critical to a dramatic rethinking of governance, nature, and the human. The animals of 1668

helped to shift an entire worldview in France what Sahlins calls Renaissance humanimalism toward more modern expressions of classical naturalism and mechanism In the wake of 1668 came the debasement of animals and the strengthening of human animality including in Descartes s animal machine highly contested during the Year of the Animal At the same time Louis XIV and his intellectual servants used the animals of Versailles to develop and then to transform the symbolic language of French absolutism Louis XIV came to adopt a model of sovereignty after 1668 in which his absolute authority is represented in manifold ways with the bodies of animals and justified by the bestial nature of his human subjects 1668 explores and reproduces the king s animal collections in printed text weaving poetry and engraving all seen from a unique interdisciplinary perspective Sahlins brings the animals of 1668 together and to life as he observes them critically in their native habitats within the animal palace itself by Louis Le Vau the paintings and tapestries of Charles Le Brun the garden installations of Andr Le N tre the literary work of Charles Perrault and the natural history of his brother Claude the poetry of Madeleine de Scud ry the philosophy of Ren Descartes the engravings of S bastien Leclerc the transfusion experiments of Jean Denis and others The author joins the nonhuman and human agents of 1668 panthers and painters swans and scientists weasels and weavers in a learned and sophisticated treatment that will engage scholars and students of early modern France and Europe and readers broadly interested in the subject of animals in human history

Sacrifice and Self-interest in Seventeenth-Century France Thomas M. Lennon, 2019-07-01 How much of our own self interest should we be willing to sacrifice for love of another The Quietists answered all of it even the salvation of our own soul Opposing them were the Jansenists including Arnauld who saw self interest as inescapable The debate swept across French society in the 17th century with Bossuet and F nelon on opposite sides and was multi dimensional with political and ecclesiastical intrigue charges of heresy and many shenanigans Initially theological the debate s basis lay in differing philosophical concepts of freewill with both sides claiming support from Descartes s views The debate thus highlights interpretation of the Cartesians especially Malebranche a prominent participant in it Nevertheless this is the first book on the debate in English
