The Crisis of European Sciences and Transcendental Phenomenology Edmund Husserl, 1970 The Crisis of European Sciences and Transcendental Phenomenology Husserl's last great work is important both for its content and for the influence it has had on other philosophers In this book which remained unfinished at his death Husserl attempts to forge a union between phenomenology and existentialism Husserl provides not only a history of philosophy but a philosophy of history As he says in Part I The genuine spiritual struggles of European humanity as such take the form of struggles between the philosophies that is between the skeptical philosophies or nonphilosophies which retain the word but not the task and the actual and still vital philosophies But the vitality of the latter consists in the fact that they are struggling for their true and genuine meaning and thus for the meaning of a genuine humanity

The Postcolonial Contemporary Jini Kim Watson, Gary Wilder, 2018-07-03 This volume invokes the postcolonial contemporary in order to recognize and reflect upon the emphatically postcolonial character of the contemporary conjuncture as well as to inquire into whether postcolonial criticism can adequately grasp it Neither simply for nor against postcolonialism the volume seeks to cut across this false alternative and to think with postcolonial theory about political contemporaneity Many of the most influential frameworks of postcolonial theory were developed during the 1970s and 1990s during what we may now recognize as the twilight of the postwar period If forms of capitalist imperialism are entering into new configurations of neoliberal privatization wars without end xenophobic nationalism and unsustainable extraction what aspects of postcolonial inquiry must be reworked or revised in order to grasp our political present In twelve essays that draw from a number of disciplines history anthropology literature geography indigenous studies and regional locations the Black Atlantic South Africa South Asia East Asia Australia Argentina The Postcolonial Contemporary seeks to move beyond the habitual oppositions that have often characterized the field such as universal vs particular Marxism vs postcolonialism and politics vs culture These essays signal an attempt to reckon with new and persisting postcolonial predicaments and do so under four inter related analytics Postcolonial Temporality Deprovincializing the Global South Beyond Marxism versus Postcolonial Studies and Postcolonial Spatiality and New Political Imaginaries

This ambitious work aims to shed new light on the relations between Husserlian phenomenology and the present day efforts toward a scientific theory of cognition with its complex structure of disciplines levels of explanation and conflicting hypotheses The book s primary goal is not to present a new exegesis of Husserl s writings although it does not dismiss the importance of such interpretive and critical work Rather the contributors assess the extent to which the kind of phenomenological investigation Husserl initiated favors the construction of a scientific theory of cognition particularly in contributing to specific contemporary theories either by complementing or by questioning them What clearly emerges is that Husserlian phenomenology cannot become instrumental in developing cognitive science without undergoing a substantial transformation Therefore the central concern of this book is not only the progress of contemporary theories of cognition but also the reorientation of Husserlian phenomenology Because a single volume could never encompass the numerous facets of this dual aim the contributors focus on the issue of naturalization This perspective is far reaching enough to allow for the coverage of a great variety of topics ranging from general structures of intentionality to the nature of the founding epistemological and ontological principles of cognitive science to analyses of temporality and perception and the mathematical modeling of their phenomenological description This book then is a collective reflection on the possibility of utilizing a naturalized Husserlian phenomenology to contribute to a scientific theory of cognition that fills the explanatory gap between the phenomenological mind and brain **Managing Understanding in Organizations** Jorgen Sandberg,Axel Targama,2007-01-09

Literature & Pedagogy Anthony Cordingley,2025-04-01 Building upon the approach to reading literature pioneered by Bruce Gardiner at the University of Sydney for over four decades Literature and Pedagogy is devoted to the way that texts literary texts in particular seek to instruct us Bruce Gardiner has inspired generations of teachers and scholars in the field of literary criticism He stands for a scholarly ethos which is at risk of disappearing His distinctive academic career which was entirely devoted to research led teaching invites us to think about the relationships between literary studies and pedagogy It also invites us to ask what role a unique pedagogical style plays in the evolution of a discipline How does intergenerational transmission between teacher and student play out both within and beyond disciplinary boundaries This collection explores these questions while also documenting Gardiner s methods of scholarly as much as professional resistance to the neo liberalisation and neo conservatism of contemporary academic culture Contributors draw from inspiring encounters with him to reflect upon the rhetoric and motifs of pedagogy within literary works They put Gardiner s mode of reading into practice by offering new interpretations of pedagogical mechanisms employed within important literary works from the seventeenth century to the present and of cultural phenomena like colonial interpretations of the Australian lyrebird s song The volume also offers pieces inspired by Gardiner such as poetry art translation and creative non fiction as well as three unpublished lectures by Gardiner himself Techniques and methodologies of literary education are traditionally believed to offer students the keys with which to unlock the secrets of texts and foster their appreciation Literature and Pedagogy offers a new perspective showing teachers and students of both education and literature how literary works present their own methods
