Seibert,1975 **Radio / body** Farokh Soltani,2020-12-15 This study provides an in depth exploration of the dramaturgical practices of radio drama and their underlying philosophical assumptions By presenting an analytical model drawn from phenomenology it challenges the current understanding of the medium instead focusing on the bodily and aural aspects of radio drama while offering a critique of the conventions of dramaturgical practice for neglecting these affective sonic aspects Tracing these conventions through the history of the development of radio drama it proposes that a more bodily resonant mode of radio dramaturgy is best placed to meet the demands of the current era of digital production and distribution The book also examines a number of approaches to creating a more embodied experience for the listener Keywords in Sound David Novak,Matt Sakakeeny,2015-05-09 In twenty essays on subjects such as noise acoustics music and silence Keywords in Sound presents a definitive resource for sound studies and a compelling argument for why studying sound matters Each contributor details their keyword s intellectual history outlines its role in cultural social and political discourses and suggests possibilities for further research Keywords in Sound charts the philosophical debates and core problems in defining classifying and conceptualizing sound and sets new challenges for the development of sound studies Contributors Andrew Eisenberg Veit Erlmann Patrick Feaster Steven Feld Daniel Fisher Stefan Helmreich Charles Hirschkind Deborah Kapchan
