Radiocarbon Dating An Archaeological Perspective:

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating An Archaeological Perspective*. It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates. In addition to reviewing the basic principles of the method, it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record.

Radiocarbon Dating, Second Edition R.E. Taylor, Ofer Bar-Yosef, 2014-11-01 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating An Archaeological Perspective*. It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates. In addition to reviewing the basic principles of the method, it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record.

Radiocarbon Dating R Taylor, 2012-12-02 *Radiocarbon Dating An Archaeological Perspective* provides a review of some of the major advances and accomplishments of the ^{14}C method from an archaeological perspective. The text also provides an introduction to some of the problems and issues involved in the use of ^{14}C data in archaeological studies. The book covers topics in radiocarbon dating including the elements of the radiocarbon method, definition of major anomalies and the different effects of the ^{14}C method and sample sample pretreatment and measurement techniques. The evaluation of radiocarbon data and the historical development of radiocarbon dating as a method that aids in archaeological studies are also discussed. The text is recommended for archaeologists who want to know more about the theories and principles behind radiocarbon dating, its techniques and its application in their field. The book will also be good for physicists who want to work with archaeologists and apply their knowledge in radiocarbon dating.

Radiocarbon and Climate Change Edward A.G. Schuur, Ellen R.M. Druffel, Susan E. Trumbore, 2016-05-17 This book is a useful guide for researchers in ecology and earth science interested in the use of accelerator mass spectrometry technology. The development of research in radiocarbon measurements offers an opportunity to address the human impact on global carbon cycling and climate change. Presenting radiocarbon theory, history, applications and analytical techniques in one volume builds a broad outline of the field of radiocarbon and its emergent role in defining changes in the global carbon cycle and links to climate change. Each chapter presents both classic and cutting edge studies from different disciplines involving radiocarbon and

carbon cycling The book also includes a chapter on the history and discovery of radiocarbon and advances in radiocarbon measurement techniques and radiocarbon theory Understanding human alteration of the global carbon cycle and the link between atmospheric carbon dioxide levels and climate remains one of the foremost environmental problems at the interface of ecology and earth system science Many people are familiar with the terms global warming and climate change but fewer are able to articulate the science that support these hypotheses This book addresses general questions such as what is the link between the carbon cycle and climate change what is the current evidence for the fate of carbon dioxide added by human activities to the atmosphere and what has caused past changes in atmospheric carbon dioxide How can the radiocarbon and stable isotopes of carbon combined with other tools be used for quantifying the human impact on the global carbon cycle

Chronometric Dating in Archaeology R.E. Taylor, Martin J. Aitken, 2013-06-29 Since World War II there has been tremendous success in the development of new methods for dating artifacts the so called radiocarbon revolution was only the first such discovery The increasing accuracy of the various new techniques has brought about major changes in archaeological research strategies This important new text compiles the work of some of today's most innovative archaeologists who summarize progress in their respective techniques over the last 30 years with an emphasis on developments of the last five and the status of current research

Radiation in Art and Archeometry D.C. Creagh, D.A. Bradley, 2000-06-14 inca publications misc creaghcov htm About the cover This book contains twenty chapters covering a wide range of research in the fields of scientific conservation of art and archaeometry The common thread is the use of radiation in these analyses The term radiation is used in the widest possible sense The book encompasses the use of electromagnetic radiation in its microwave infrared visible ultraviolet x ray and ray forms and the use of particulate forms such as electrons neutrons and charged particles for which the Planck's Law relation applies In many cases there is an interplay between the two forms for example proton induced x ray emission PIXE secondary ion mass spectrometry SIMS As far as possible the chapters have been arranged in order of ascending particle energy Thus it commences with the use of microwaves and finishes with the use of rays The authors were chosen on the basis of their expertise as practitioners of their particular field of study This means that for example the mature fields of study such as the IR and UV study of paintings have been written by senior researchers whereas for the emerging fields of synchrotron and neutron techniques the chapters have been written by talented researchers at the commencement of their careers

The Shroud of Christ Michael Kowalski,2023-06-30 The Shroud of Turin has been the focus of extensive study by historians and researchers since the beginning of the twentieth century It is possibly the world s most studied historical artifact generating a regular flow of new research publications There is however one scientific test that overshadows all other research the 1988 radiocarbon dating This test dated the cloth to the period 1260 1390AD and was given such extensive publicity that most people today no longer accept the Shroud to be a true relic Sadly very few people are aware that this test has been widely criticized for falling short of acceptable scientific standards Similarly most people remain unaware of the wealth of compelling evidence that contradicts the conclusions of that test and supports claims of the Shroud s authenticity This book reveals extracts from secret discussions on dating evidence from the Shroud Science Group a private international forum of Shroud researchers and provides a detailed account of the dating evidence revealed by over a hundred years of research It outlines reasons why the 1988 radiocarbon dating test continues to attract criticism from respected scientists and also describes a series of innovative flax dating techniques which have recently been used measure the age of Shroud material producing results that contradict the radiocarbon date

Anglo-Saxon Graves and Grave Goods of the 6th and 7th Centuries AD Alex Bayliss,2017-07-05 The Early Anglo Saxon Period is characterized archaeologically by the regular deposition of artefacts in human graves in England The scope for dating these objects and graves has long been studied but it has typically proved easier to identify and enumerate the chronological problems of the material than to solve them Prior to the work of the project reported on here therefore there was no comprehensive chronological framework for Early Anglo Saxon Archaeology and the level of detail and precision in dates that could be suggested was low The evidence has now been studied afresh using a co ordinated suite of dating techniques both traditional and new a review and revision of artefact typology seriation

of grave assemblages using correspondence analysis high precision radiocarbon dating of selected bone samples and Bayesian modelling using the results of all of these These were focussed primarily on the later part of the Early Anglo Saxon Period starting in the 6th century This research has produced a new chronological framework consisting of sequences of phases that are separate for male and female burials but nevertheless mutually consistent and coordinated These will allow archaeologists to assign grave assemblages and a wide range of individual artefact types to defined phases that are associated with calendrical date ranges whose limits are expressed to a specific degree of probability Important unresolved issues include a precise adjustment for dietary effects on radiocarbon dates from human skeletal material Nonetheless the results of this project suggest the cessation of regular burial with grave goods in Anglo Saxon England two decades or even more before the end of the seventh century That creates a limited but important discrepancy with the current numismatic chronology of early English sceattas The wider implications of the results for key topics in Anglo Saxon archaeology and social economic and religious history are discussed to conclude the report
