## **Raging Floods:**

Raging Floods Louise Spilsbury, Richard Spilsbury, 2010 Explores what causes floods and how people can prepare for them

**Floods of the Tiber in Ancient Rome** Gregory S. Aldrete, 2007-03-05 A study of the impact of flooding on the ancient city during the classical period While the remains of its massive aqueducts serve as tangible reminders of Rome's efforts to control its supply of drinking water there are scant physical reminders that other waters sometimes raged out of control In fact floods were simply a part of life in ancient Rome where proximity to the Tiber left a substantial part of the city vulnerable to the river's occasional transgressions Here in the first book length treatment of the impact of floods on an ancient city Gregory S Aldrete draws upon a diverse range of scientific and cultural data to develop a rich and detailed account of flooding in Rome throughout the classical period Aldrete explores in detail the overflowing river's destructive effects drawing from ancient and modern written records and literary accounts analyses of the topography and hydrology of the Tiber drainage basin visible evidence on surviving structures and the known engineering methods devised to limit the reach of rising water He discusses the strategies the Romans employed to alleviate or prevent flooding their social and religious attitudes toward floods and how the threat of inundation influenced the development of the city's physical and economic landscapes *Floods of the Tiber in Ancient Rome* is that rare thing in scholarship a work that genuinely fills a gap in the scholarly literature Professor Aldrete has brilliantly illuminated an aspect of ancient Rome that was ever present to the city's inhabitants but almost invisible to modern historians Stanley Burstein history teacher Raises important questions about the effects of flooding of the Tiber on the city of ancient Rome and its inhabitants and explores why Romans did not take more sweeping steps to reduce if not eliminate the dangers of urban flooding There is no comparable book length study of this topic so this work fills a real need It will be of interest not only to students of ancient history but to hydrologists and students of urban studies as well Certainly it will give us classicists much to think about in our assessment of urban life in ancient Rome Harry B Evans Fordham University author of *Aqueduct Hunting in the Seventeenth Century*

**Floods** Michael Woods, Mary B. Woods, 2007-01-01 A flood can occur instantly from ocean waves that wash over land Or it can begin slowly with a rainfall lasting many hours Regardless terrible disasters can occur whenever too much water rushes into or slowly gathers in the wrong place Rushing water can sweep buildings off foundations People must quickly leave their homes and possessions to seek safety Some drown before they can escape With dramatic images and firsthand survivor stories plus the latest facts and figures this book shows you flood disasters up close

humanitarian law and terrorism The Yearbook is of scholarly quality but is not narrowly theoretical It provides the interested public diplomats civil servants politicians the military academics journalists NGO employees and serious citizens with a document of record comment and a starting point for further research on peacekeeping and related topics This is achieved not only by the provision of basic documents on CD ROM such as Security Council Resolutions and Reports of the UN Secretary General but also by expert commentaries on world events Peacekeeping is treated in a pragmatic light seen as a form of international military cooperation for the preservation or restoration of international peace and security Attention is focused not only on UN peacekeeping operations but other missions as well This Yearbook is the continuation of the journal International Peacekeeping **A General Index to the writings of Joanna Southcott** Joanna SOUTHCOTT,1805

*Collected Tracts* Joanna SOUTHCOTT,1804 **Taming the Yellow River: Silt and Floods** L.M. Brush,M. Gordon Wolman,2012-12-06 About four years ago Dr Gilbert White visited China and sowed the seeds of this project through conversations with Drs Huang and Gong of the Chinese Academy of Sciences and Mr Long of the Yellow River Conservancy Commission After some additional rounds of communications by letter the plan for a workshop evolved and Drs Wolman and Brush visited with Dr Sabadell of the National Science Foundation to begin the initial planning In March 1987 Dr Brush visited China and the details were worked out for the October 1987 workshop At the outset it was recognized that the 10 American scientists and engineers had very little knowledge of the Yellow River and none had ever seen it Therefore it became important that field trips be scheduled before the workshop to better set the stage for fruitful discussions It was also acknowledged that the American participants could not present papers about the Yellow River per se so their offerings reflected their general knowledge of rivers using other rivers as examples On the other hand the Chinese participants were all well into the difficult problems of harnessing the Yellow River and made their presentations accordingly Despite these differences the subject matter was the unifying thread and cross communication was excellent
