Wright, 2013 When my sister and brother and I were growing up on Staten Island Dad told us very little about his Vermont boyhood and nothing at all about his father We respected his silence We figured he had good reason for it But long after Dad's death my sister and I started to look more closely at our family history Soon we were connected to a world of New England striving and struggle that we came to see as part of our own Vermont heritage So this is the story of Dad and his mother and brother and his unreliable father and his father's five sisters whom we'd known nothing about before we began our research It pays tribute to an everyday heroine Dad's mother who took her sons to Staten Island to begin a new life when her marriage failed It also traces earlier Wrights and forebears with other surnames like Little Bailey Hadley Hathaway Shattuck Blanchard and Burt in towns all over Vermont and New Hampshire and Massachusetts some of them with their own compelling stories farmers soldiers railroad men miners housewives and keepers of inns and hotels These are my Wrights of Vermont **Pictorial and Biographical Memoirs of Elkhart and St. Joseph Counties, Indiana** ,1893 **Sale Catalogues** American Art Association, Anderson Galleries (Firm), inc American art association Aderson galleries, 1920

Trains and Technology Anthony J. Bianculli, 2001 This work presents a view of the history of American railroads in the nineteenth century from a somewhat different perspective The maturation of the railroad is traced through an exposition of the railroad technology that was developed and applied during the period Throughout the nineteenth century a symbiotic relationship existed between railroading and technology each dependent upon the state and progress of the other to a large degree A great deal of new technology was created for the railroad and the railroad in turn applied new technology as it became available Volume four is about bridges and tunnels and signals An exposition of the various types of bridges their foundations and the materials of which they were made is included Tunnels and marine railroad operations are treated also The development of signal systems is an area that has been overlooked or neglected in the general literature but is fully covered here The text of this volume is accompanied by 145 illustrations and accurate drawings of the equipment and appliances many of which have not been published before outside of old technical journals Anthony J Bianculli is a mechanical engineer with extensive and varied experience in a Fortune 500 company
