The Ecology of Trees in the Tropical Rain Forest I. M. Turner,2001-07-05 Our knowledge of the ecology of tropical rain forest trees is limited with detailed information available for perhaps only a few hundred of the many thousand of species that occur Yet a good understanding of the trees is essential to unravelling the workings of the forest itself This book aims to summarise contemporary understanding of the ecology of tropical rain forest trees The emphasis is on comparative ecology an approach that can help to identify possible adaptive trends and evolutionary constraints and which may also lead to a workable ecological classification for tree species conceptually simplifying the rain forest community and making it more amenable to analysis

Riches of the Rain Forest Wendy Veevers-Carter,1991 Even to a botanist the rain forests of the tropics consist of a bewildering variety of plants and plant forms most of them woody and tall and therefore bearing their flowers and fruits discretely out of sight in the dense high canopy Animal and bird life is arboreal heard but not often seen while the insects fungi and bacteria at work are specialized studies in themselves In this eminently readable book the author brings together an interesting collection of vignettes on plant and animal life in the rain forests of Malaysia and Indonesia the richest in numbers of species in the world Each plant chosen exemplifies some aspect of the wonderful web of rain forest life Evolving and proliferating through millions of years the complex interrelationships of a rain forest can be admired or destroyed by human beings but never replaced The author cogently illustrates the basic principles

of rain forest ecology which in its intricate complexity makes of any rain forest a wonder of the natural world and uses examples throughout to develop a passionate plea for conservation The book is elegantly illustrated with color plates drawn by Mohamed Anwar of the Bogor Herbarium and line drawings by the author herself Trees and Plants in the Rain Forest Saviour Pirotta, 1999 Describes the different types of trees and plants that grow in the layers of the rain forest the fruits nuts and vegetables they provide and what threatens their survival Australian Rain-forest Trees William Douglas Francis, 1929

Changes and Disturbance in Tropical Rainforest in South-East Asia D. M. Newbery, T. H. Clutton-Brock, Ghilleen T. Prance, Royal Society (Great Britain), 2000 Views on the dynamics of tropical forests are changing rapidly with the recognition that their environment is variable on the decadal to century scale Fluctuating climatic conditions partly determine tropical forest structure species composition and dynamics Tropical communities are also highly contingent in space and time with respect to site and historical factors Tropical forests have experienced to some degree this disturbance regime in the past but climatologists are now predicting increasingly frequent extreme events in the new century The combination of increasing deforestation and land use conversion by man plus an increasingly variable environment means a situation that could be very difficult to manage
