Eran Ben-Joseph, Terry S. Szold

Reclaiming Public Housing A Half Century Of Struggle In Three Public Neighborhoods:

Reclaiming Public Housing Lawrence J. Vale, 2002 Lawrence Vale explores the rise fall and redevelopment of three public housing projects in Boston Vale looks at these projects from the perspectives of their low income residents and assesses the contributions of the design professionals who helped to transform these once devastated places during the 1980s and 1990s

Purging the Poorest Lawrence J. Vale, 2024-05-31 The building and management of public housing is often seen as a signal failure of American public policy but this is a vastly oversimplified view In Purging the Poorest Lawrence J Vale offers a new narrative of the seventy five year struggle to house the deserving poor In the 1930s two iconic American cities Atlanta and Chicago demolished their slums and established some of this country s first public housing Six decades later these same cities also led the way in clearing public housing itself Vale s groundbreaking history of these twice cleared communities provides unprecedented detail about the development decline and redevelopment of two of America s most famous housing projects Chicago s Cabrini Green and Atlanta s Techwood Clark Howell Homes Vale offers the novel concept of design politics to show how issues of architecture and urbanism are intimately bound up in thinking about policy Drawing from extensive archival research and in depth interviews Vale recalibrates the larger cultural role of public housing revalues the contributions of public housing residents and reconsiders the role of design and designers

Regulating Place Eran Ben-Joseph, Terry S. Szold, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

Sense of Place, Health and Quality of Life Allison Williams, 2016-12-05 A significant body of theoretical and empirical studies describes sense of place as an outcome of interconnected psychological social and environmental processes in relation to physical place s Sense of place has been examined particularly in human geography in terms of both the character intrinsic to a place as a localized bounded and material entity and the sentiments of attachment detachment that humans experience and express in relation to specific places Scholars in a wide range of disciplines are increasingly exploring the relationship between place and health and recently the field of public health has been encouraged to recognize sense of place as a potential contributing factor to well being It is evident that over the last few decades sense of place has developed into a versatile construct This important book brings together work related to sense of place and health broadly defined from the perspective of a variety of fields and disciplines It will give the reader an understanding of both the range of applications of this construct within approaches to human health as well as the breadth of research methodologies employed in its investigation

Transcultural Cities Jeffrey Hou, 2013-02-11 Transcultural Cities uses a framework of transcultural placemaking cross disciplinary inquiry and transnational focus to examine a collection of case studies around the world presented by a multidisciplinary group of scholars and activists in architecture urban planning urban studies art environmental psychology geography political science and social work The book addresses the intercultural exchanges as well as the cultural trans formation that takes place in urban spaces In doing so it views cultures not in isolation from each

other in today's diverse urban environments but as mutually influenced constituted and transformed. In cities and regions around the globe, migrations of people have continued to shape the makeup and making of neighborhoods, districts, and communities. For instance, in North America, new immigrants have revitalized many of the decaying urban landscapes, creating renewed cultural ambience and economic networks that transcend borders. In Richmond, BC, Canada, an Asian night market has become a major cultural event that draws visitors throughout the region and across the US and Canadian border. Across the Pacific, foreign domestic workers in Hong Kong transform the deserted office district in Central on weekends into a carnivalesque site. While contributing to the multicultural vibes in cities, migration and movements have also resulted in tensions, competition, and clashes of cultures between different ethnic communities, old timers, newcomers, employees, and employers, individuals and institutions. In *Transcultural Cities*, Jeffrey Hou and a cross-disciplinary team of authors argue for a more critical and open approach that sees today's cities, urban places, and placemaking as vehicles for cross-cultural understanding.

The Mutual Housing Experiment Kristin M Szylvian, 2015-06-12. In the series *Urban Life Landscape and Policy*, edited by Zeynep L Miller, David Stradling, and Larry Bennett. **Housing America** Randall G.

Holcombe, 2017-07-05. Housing policy not only affects all Americans' quality of life but has a direct impact on their financial well-being. About 70 percent of American households own their own homes, and for most, their homes represent the majority of their net worth. Renters are affected by housing policy. Even the small minority of Americans who are homeless are affected by housing policies specifically targeted to low-income individuals. The government's increasing involvement in housing markets, fed by popular demand that government do something to address real problems of mortgage defaults and loans, provides good reason to take a new look at the public sector in housing markets. Crises in prime mortgage lending may lower the cost of housing, but the poor and homeless cannot benefit because of increases in unemployment. Even the private market is heavily regulated. Government policies dictate whether people can build new housing on their land, what type of housing they can build, the terms allowed in rental contracts, and much more. This volume considers the effects of government housing policies and what can be done to make them work better. It shows that many problems are the result of government rules and regulations. Even in a time of foreclosures, the market can still do a crucial job of allocating resources just as it does in other markets. Consequently, the appropriate policy response may well be to significantly reduce, not increase, government presence in housing markets. *Housing America* is a courageous and comprehensive effort to examine housing policies in the United States and to show how such policies affect the housing market.

SAGE Biographical Research John Goodwin, 2012-06-25. The Paradox of Urban Space S. Sutton, S. Kemp, 2011-01-31 As racially based inequalities and spatial segregation deepen further strained by emergent problems associated with climate change ever widening differences between wealth and poverty and the economic crisis this book issues a timely call for just sustainable development

The Routledge Handbook of Housing and Welfare Martin Grander, Mark Stephens, 2023-12-22 This handbook takes on one of the most pressing issues of today's society the question of housing It is a cutting edge edited volume about the disputed interrelationship between housing and the wider welfare state Although housing scholars generally agree that housing should be regarded as part of such a wider welfare system it has proven hard to pinpoint and operationalize its position within it Moreover the relationship became considerably more complex as a result of the period of intense globalization and the integration of national housing finance systems into world finance markets Furthermore welfare systems reflect economic as well as social models and these too have changed as countries have responded to globalization and traditional ideological frameworks have become less distinct Thus there is a need to redefine the connection between housing and welfare in light of changes in both welfare and housing systems By investigating the current situation and historical development of housing provision and welfare distribution in different contexts worldwide this book aims to contribute to an expanded understanding of housing and welfare The book brings together 25 international housing researchers covering 15 countries worldwide With such a global approach the book aims to provide an updated empirical picture and analysis of different housing systems and their connection to the welfare regime in different national contexts The book moves beyond the usual focus on affordable housing provision in the context of well developed welfare regimes and includes countries from the global south incorporating regions where it is debatable whether there are welfare systems present at all Thus the book aims to provide the reader with an insight into the large differences in housing provision in international contexts with large differences regarding how the welfare state is comprised From these insights we reflect on whether regime approaches continue to provide a suitable theoretical framework for understanding the relationship between housing and the wider welfare state This handbook is essential reading for researchers students

policymakers and other professionals in the fields of housing studies welfare studies economics urban studies social work
social and public policy and sociology
