Reconnection with the Power of Love Richard Schemmerer, 2004-07-01 The Power of Love is a journey back to our origin a place in us that leaves the limitations of the mind behind and reconnects us with the source of all that is With The Power of Love we are presented with an inspirational book that guides us to the heart of the matter It dives with sincerity into the often misunderstood subject of love to lift the veil of confusion It does not deal with the romantic notion of love like many other books instead it recognizes love as the most potent energy field that prevails in the Universe This Love force is the primordial source of creation Without it we are leaves in the wind of our desires and emotions Without the connection to this love we feel like enemies towards each other The Power of Love is attempting to teach you how to be in constant contact with this love and to live from the center of your heart to prevent us from indulging into self destructive behaviors that harm us and others and to awaken us to the wonder that is unfolding around us Reconnection to the Power of Love uses easy to understand terminology to explain the interaction between the inner world and our outer experiences Our scientific knowledge of the inter connectedness between thought and the manifestation of the material world is growing rapidly but our thinking and loving processes haven't properly adjusted as of yet Love is of universal interest and every person on the planet relates to this subject through personal experience There is a need to revise our preconceived notion about love The world has changed so rapidly that we have been swept away not by love but by stress and other competitive elements It is time to have a closer look at those dated concepts to evaluate if they are still valuable in the 21st century Love can only be experienced in the now of the moment and the now can only be truly experienced in a moment of unconditional love **Love**

to Learn Isabelle C. Hau, 2025-02-11 The most important aspect of early childhood in general and education in particular is the quality and care of the relationships a child forms Love to Learn shows how to build and develop these relationships and unlock every child's true potential Early relationships are the key to healthy brain development resilience and lifelong flourishing Children need to be loved to be valued to interact and to be listened to When children have the space and time to play and explore through nurturing positive relationships then children learn But loving relationships are precisely what so many children are missing and modern factors are making it more difficult for children to build these necessary bonds Kids are growing up in smaller families with fewer siblings and in more single parent households They have fewer adult family friends and mentors They have less contact with grand parents and grand adults They spend 60% less time with friends than children did a decade ago They play outside less half the time spent by their parent's generation They find themselves increasingly immersed in solitary realms of screens a modern sanctuary where parents seek refuge as well Many kids are so overscheduled they have less time to build friendships Love to Learn offers a vision for a future where learning is relational and love is a literacy It is a provocative paradigm shift from child centered education to relationship centered learning It weaves in stories of perseverance empathy creativity and showcases innovations anchored in the latest neuroscience and

technology advance all driven by the desire to unlock the inherent human potential in any child This hope filled book seeks to change how we raise our children how we run early learning environments and how we construct care full communities It aims to inspire and engage readers catalyze new solutions and in doing so change our understanding of childhood itself

Miller,2017-03-01 Mainstream educational leadership has lost much of its footing as a progressive practice More managers than wisdom keepers educational leaders no longer have authority to critique the toxicities of the present and imagine alternative futures In public schools and higher education the neoliberal emphasis on measurable outcomes shrinks the radius of concern for what educational leaders are leading toward There s a planet missing in mainstream discourses of sustainability in educational leadership and this book aims to resituate the work of teaching leading in the place where we stand In a period of overlapping social environmental crises this book takes inspiration from Robert Jensen s call for teachers and intellectual leaders to go apocalyptic i e to face head on the calamities that threaten our shared future on Earth When leadership is situated within an apocalyptic context we are called to reflect on educational injustice and unsustainability while envisioning more hopeful futures The work of apocalyptic leadership though isn t all about future vision it s also about attending to what

hurts and what heals in the present moment Intended for aspiring and practicing educational leaders in both K 12 and higher education settings as well as scholars in the fields of social justice and sustainability this book begins mapping and traversing the affective spiritual pragmatic and organizational geography of apocalyptic leadership Such leadership holds dear the radical belief in our shared capacity to work gracefully with the painful awareness that tremendous challenges are inevitable and yet we have every opportunity for inching toward a more habitable future *Sustainable Automated and Connected Transport* Nikolas Thomopoulos, Maria Attard, Yoram Shiftan, 2024-06-04 This volume is a valuable source of ACT information for developing holistic research methods and global policies for making progress towards the SDGs **The Publishers Weekly** ,1987 *Forthcoming Books* Rose Arny,1999 **New Age Journal** ,1994
