Rhodes, 2012-04-21 Since the early 1990s the federal role in education exemplified by the controversial No Child Left Behind Act NCLB has expanded dramatically Yet states and localities have retained a central role in education policy leading to a growing struggle for control over the direction of the nation s schools In *An Education in Politics* Jesse H Rhodes explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on the role played by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child Shaping the Preschool Agenda Anne McGill-Franzen, 1993-01-01 Making all children ready to learn is the first and probably the most important national education goal for the year 2000 What does it mean for children to be ready to learn This book is about the beliefs of the people who are shaping preschool policy McGill Franzen tells us what key decision makers are thinking about preschool education what counts as school who should pay for it what should be taught and especially whether there should be reading and writing programs for four year olds This book also explores the history of these beliefs The author locates contemporary early childhood concepts about developmental
