

Ridgewood Analogies

Grades 4–8

Book 1, for fourth grade, teaches students how to solve analogies that exemplify five kinds of relationships: descriptive analogies, comparative analogies, categorical analogies, serial analogies, and causal analogies. Book 2, for fifth grade, and Book 3, for sixth grade, follow the same format, but use more difficult vocabulary. Organized by subject areas, Books 4 and 5, for seventh and eighth grade, contain analogies in **Geography, History and Government, Language Arts, and Math**. Students use their learning in these areas to solve analogies that are challenging as well as interesting.

Each kind of analogy is introduced and reinforced through the following four levels:

- ✦ **Novice:** Students are given an analogy and find the analogy that corresponds to it.
- ✦ **Apprentice:** Students complete an analogy by choosing a word from a Word Bank.
- ✦ **Masters:** Students choose two words from the Word Bank to complete an analogy.
- ✦ **Super Masters:** Students are given a relationship to create two analogies that correspond to one another.

Schank, 2004-04-26 In the author's words This book is an honest attempt to understand what it means to be educated in today's world His argument is this No matter how important science and technology seem to industry or government or indeed to the daily life of people as a society we believe that those educated in literature history and other humanities are in some way better informed more knowing and somehow more worthy of the descriptor well educated This 19th century conception of the educated mind weighs heavily on our notions on how we educate our young When we focus on intellectual and scholarly issues in high school as opposed to issues such as communications basic psychology or child raising we are continuing to rely on outdated notions of the educated mind that come from elitist notions of who is to be educated and what that means To accommodate the realities of today's world it is necessary to change these elitist notions We need to rethink what it means to be educated and begin to focus on a new conception of the very idea of education Students need to learn how to think not how to accomplish tasks such as passing standardized tests and reciting rote facts In this engaging book Roger C Schank sets forth the premises of his argument cites its foundations in the Great Books themselves and illustrates it with examples from an experimental curriculum that has been

used in graduate schools and with K 12 students Making Minds Less Well Educated Than Our Own is essential reading for scholars and students in the learning sciences instructional design curriculum theory and planning educational policy school reform philosophy of education higher education and anyone interested in what it means to be educated in today s world
