Animal Rights & Human Morality Bernard E. Rollin, 2010-12 It s been more than two decades since the first edition of this landmark book garnered public accolades for its sensitive yet honest and forthright approach to the many disquieting questions surrounding the emotional debate over animal rights Is moral concern something owed by human beings only to human beings Drawing upon his philosophical expertise his extensive experience of working with animal issues all over the world and his knowledge of biological science Bernard E Rollin now widely recognized as the father of veterinary ethics develops a compelling analysis of animal rights as it is emerging in society The result is a sound basis for rational discussion and social policy development in this area of rapidly growing concern He believes that society must elevate the moral status of animals and protect their rights as determined by their natures His public speaking and published works have contributed to passage of major federal legislation designed to increase the well being of laboratory animals This new third edition is greatly expanded and includes a new chapter on animal agriculture plus additional discussions of animal law companion animal issues genetic engineering animal pain animal research and many other topics **Zoopolis** Sue Donaldson, Will Kymlicka, 2011-11-25 Zoopolis offers a new agenda for the theory and practice of animal rights Most animal rights theory focuses on the intrinsic capacities or interests of animals and the moral status and moral rights that these intrinsic characteristics give rise to Zoopolis shifts the debate from the realm of moral theory and applied ethics to the realm of political theory focusing on the relational obligations that arise from the varied ways that animals relate to human societies and institutions Building on recent developments in the political theory of group differentiated citizenship Zoopolis introduces us to the genuine political animal It argues that different types of animals stand in different relationships to human political communities Domesticated animals should be seen as full members of human animal mixed communities

participating in the cooperative project of shared citizenship Wilderness animals by contrast form their own sovereign communities entitled to protection against colonization invasion domination and other threats to self determination Liminal animals who are wild but live in the midst of human settlement such as crows or raccoons should be seen as denizens resident of our societies but not fully included in rights and responsibilities of citizenship To all of these animals we owe respect for their basic inviolable rights But we inevitably and appropriately have very different relations with them with different types of obligations Humans and animals are inextricably bound in a complex web of relationships and Zoopolis offers an original and profoundly affirmative vision of how to ground this complex web of relations on principles of justice and compassion
