

Characteristics: Riparian Water Regulations

Guidelines: Developing A Water Withdrawal Regulatory Program

- Within any area where it intends to control water withdrawals, the Agency should require withdrawal permits by all users above a critical size regardless of their type of use. The Agency may exempt small users from the permitting requirement. It may be helpful to put a cap on the amount of the exempted withdrawal.
- Permits should be defined in terms of both withdrawal and consumption. Any modification of a permit should be subject to Agency review and approval.
- The Agency should establish a procedure for estimating return flows and should use this procedure in its planning.
- Revenues should be generated through administrative fees assessed uniformly of each applicant. Non-payment of administrative fees for a specified period of time should result in a forfeiture of permits.
- The Agency should require measuring devices to be installed on all facilities for withdrawing water from natural watercourses. It should either monitor those withdrawals itself or require a self-reporting system by the users. In the latter case, the Agency should establish an audit system, a citizen reporting system, and unannounced inspections to ensure a high degree of compliance.
