Rise And Fall Of The East Asian Growth System 1951 :

The Rise and Fall of the East Asian Growth System, 1951-2000 Huang Xiaoming, 2004-11-10 Huang gives important and high quality research on the economic growth in East Asia from 1945 to the present assessing the various theories put forward to explain the phenomenon and appraising the various factors which have contributed to economic growth in East Asia

The Rise and Fall of the East Asian Growth System, 1951-2000 Xiaoming Huang, 2005 Huang examines a recurring pattern of rapid economic growth in East Asia from 1951 to the present and explores how far a single East Asian Growth model can be said to exist Assessing the various theories put forward to explain the phenomenon and supported by the most comprehensive data the book finds that methods of institutional enhancement were at the core of the growth This institutional enhancement affected state structure and functions economic policy corporate arrangements social structure and relations individual behaviour and domestic and international interaction Each of these elements was a critical aspect of the growth system that defined and propelled the rapid growth

Economic Growth and Employment in Vietnam David Lim, 2014-03-21 Vietnam has enjoyed significant economic success since the implementation of its doi moi reforms including rapid growth in GDP exports and foreign and domestic investment and a shedding of poorly performing state owned enterprises Despite this however the economic situation for many ordinary people in Vietnam is fragile with income only just above the poverty line and high unemployment especially among the young In addition inflation is high and the state owned sector is still large much of it still performing badly This book provides a comprehensive overview of the current economic situation in Vietnam It outlines the state of the economy paying special attention to employment discusses government policies including on trade and integration with the global economy and concludes by assessing the key challenges facing Vietnam s economy going forward

Accelerating Japan's Economic Growth F. Gerard Adams, Lawrence R. Klein, Kumasaka Yuzo, Shinozaki Akihiko, 2007-09-12 The Japanese economy is beginning to show signs of recovery after years of stagnation deflation but many Japanese policymakers warn that this economic growth may be sluggish slower than in the United States and certainly slower than in other East Asian countries Japan faces significant economic problems including an aging population a large fiscal deficit and the need to adjust to the IT economy and to competition with the rest of East Asia A slow growth scenario would greatly reduce opportunities for new productive investment and would make it increasingly difficult to provide for Japan s growing social needs The authors of this book argue that Japan can and should grow more rapidly and examine the reasons for the sluggish performance of the Japanese economy For example some Japanese economic sectors particularly in distribution and finance have failed to take advantage of new information and communications technology to accelerate the growth of productivity as has happened in other countries such as the US Production function studies and econometric model simulations suggest that with appropriate policies the Japanese economy can grow more rapidly and deal with its future problems The book posits a number of policy proposals which would help to accelerate Japan s economic

growth This book will be of interest to students of the Japanese economy macroeconomics and international economies and also to policymakers and professionals interested in Japan's economy *Reform and Productivity Growth in India* Dibyendu Maiti, 2014-01-03 During the last two decades India has experienced a high growth rate but the contribution from productivity growth and technological progress has been very low This has resulted in a poor performance in the employment generation in the formal sector and this book examines this phenomenon and the Indian growth pattern Using primary and secondary data the book looks at the impact of economic reform on technological change and total productivity growth and in turn its impact on the labour market It examines the effect of trade reform on the form and functioning of labour markets and goes on to look at the impact of the global financial crisis on the Indian labour market Offering interesting modelling exercises and empirical verifications that bring fresh ideas and new content this book is of interest to academics in the fields of development economics international economics and South Asian studies Financial Development and Economic Growth in Malaysia James B. Ang, 2008-11-25 This book is concerned with the role of financial intermediation in economic development and growth in the context of Malaysia Using an analytical framework the author investigates the Malaysian economy from 1960 onwards to examine how far financial development has progressed in the course of economic development and whether it has been instrumental in promoting economic growth A significant improvement in the Malaysian financial system coupled with rapid economic growth and a rich history of financial sector reforms makes Malaysia an interesting case study for this subject The author shows that some government interventions seem to have impacted negatively on economic growth whereas repressionist financial policies such as interest rate controls high reserve requirements and directed credit programmes seem to have contributed positively to financial development The analysis concludes that financial development leads to higher output growth via promoting private saving and private investment Shedding light on the evolutionary role of financial system and the interacting mechanisms between financial development and economic growth this book will be of interest to those interested in economic and financial development financial liberalization saving behaviour and investment analysis and Asian Studies **China and India** Dilip K. Das, 2007-01-24 Written in a comprehensive and authoritative manner this book compares and contrasts the two economies of the People's Republic of China and India covering large areas including trade and financial sectors *The Everyday Impact of Economic Reform in China* Ying Zhu, Michael Webber, John Benson, 2010-05-11 Examining the impact of economic reform on everyday life in China this book explores how changes in the employment relationship have affected the enterprise performance the quality of working life and the livelihood strategies for individual households and families in China East Asia, Globalization and the New Economy F. Gerard Adams, 2006-10-03 We are witnessing a transformation in the world economy as a result of the IT e business revolution Modern logistics based on cheap communication and transportation are shifting the locus of production and the international division of labour between the West and the lower wage countries of East Asia and

similar changes are occurring within East Asia itself Looming over the entire picture is the colossus that is China and this transformation is making East Asia the manufacturing centre of the world economy Written by a recognized expert in the area of business economics this book analyzes these developments and evaluates their future impact on the development of East Asia and its role in the world economy The book examines the effect of the IT revolution globalization and the new economy on the development of East Asia The first book length treatment of IT e business in the region it questions whether the e business revolution will renew and sustain the rapid economic development of East Asia *State Structure, Policy Formation, and Economic Development in Southeast Asia* Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future
