Rise Of Architectural History

David Watkin

Rise Of Architectural History:

The Rise of Architectural History David Watkin, 1980 *History of Architectural Theory* Hanno-Walter Kruft, 1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive

Reading Architectural History Dana Arnold, 2003-09-02 Architectural history is more than just the study of buildings Architecture of the past and present remains an essential emblem of a distinctive social system and set of cultural values and as a result it has been the subject of study of a variety of disciplines But what is architectural history and how should we read it Reading Architectural History examines the historiographic and socio cultural implications of the mapping of British architectural history with particular reference to eighteenth and nineteenth century Britain Discursive essays consider a range of writings from biographical and social histories to visual surveys and guidebooks to examine the narrative structures of histories of architecture and their impact on perception and understanding of the architecture of the past Alongside this each chapter cites canonical histories juxtaposed with a range of social and cultural theorists to reveal that these writings are richer than we have perhaps recognised and that architectural production in this period can be interrogated in the same way as that from more recent past and can be read in a variety of ways The essays and texts combine to form an essential course reader for methods and critical approaches to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning What is Architectural History? Andrew Leach, 2013-05-03 What is Architectural

History considers the questions and problems posed by architectural historians since the rise of the discipline in the late nineteenth century How do historians of architecture organise past time and relate it to the present How does historical evidence translate into historical narrative Should architectural history be useful for practicing architects If so how Leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture He suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically Read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history Graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work A History of Architectural Development ... Frederick Moore Simpson, 1916 **Art History as**

Cultural History Richard Woodfield, 2014-04-08 This book focuses on Aby Warburg 1866 1929 one of the legendary figures

of twentieth century cultural history His collection which is now housed in the Warburg Institute of the University of London bears witness to his idiosyncratic approach to a psychology of symbolism and explores the *Nachleben* of classical antiquity in its manifold cultural legacy This collection of essays offers the first translation of one of Warburg's key essays the Gombrich lecture described by Carlo Ginzburg as the richest and most penetrating interpretation of Warburg and original essays on Warburg's astrology his Mnemosyne project and his favourite topic of festivals Richard Woodfield is Research Professor in the Faculty of Art and Design at the Nottingham Trent University England He has edited E H Gombrich's *Reflections on the History of Art* 1987 Gombrich on Art and Psychology 1996 *The Essential Gombrich* 1996 and a volume on Riegl in the *Critical Voices in Art Theory and Culture* series He is also the General Editor of a new series of books for G B Arts International Aesthetics and the Arts Edited by Richard Woodfield Research Professor in the Faculty of Art and Design at Nottingham Trent University UK

History of Architectural Development Frederick Moore Simpson, 1913 **Nineteenth-Century Photographs and Architecture** Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic

American Architectural History Keith Eggner, 2004-07-31 Offering some 30 essays this volume concentrates on recent writings by historians of American architecture urbanism The essays are arranged chronologically from colonial to contemporary accessible in thematic groupings

Rethinking Architectural Historiography Dana Arnold, Elvan Altan Ergut, Belgin Turan Ozkaya, 2006-09-27 Rather than subscribing to a single position this collection informs the reader about the current state of the discipline looking at changes across the broad field of methodological theoretical and geographical plurality Divided into three sections *Rethinking Architectural Historiography* begins by renegotiating foundational and contemporary boundaries of architectural history in relation to other fields such as

art history and archaeology It then goes on to critically engage with past and present histories disclosing assumptions biases and absences in architectural historiography It concludes by exploring the possibilities provided by new perspectives reframing the discipline in the light of new parameters and problematics This timely and illustrated title reflects upon the current changes in historiographical practice exploring potential openings that may contribute further transformation of the disciplines and theories on architectural historiography and addresses the current question of the disciplinary particularity of architectural history
