Rise And Fall Of The Labour Left:

The Socialist Ideas of the British Left's Alternative Economic Strategy Baris Tufekci, 2019-11-30 This book provides the first book length study of the political and economic ideas of the British left's Alternative Economic Strategy in the 1970s and early 1980s. Discussing the AES's approaches to capitalism, the nation state and the working class, it argues that existing academic accounts have significantly overstated the radicalism of the strategy. Perhaps more notable, especially in the light of its stated revolutionary aims, was the extent of its moderation, its continuities with post-war Labour revisionism, its marked reluctance to look beyond the market economy, the degree of its preoccupation with Britain's global economic status and its inability to break with Labourist politics of class co-operation in the national interest. While the book argues that the AES was the last class politics socialist initiative in mainstream British politics, it also explores the ways in which its ideas perhaps prepared the way for New Labour in the 1990s and its relationship with Corbynism since 2015. **The Rise and Fall of the Labour Left** Patrick Seyd, 1987

The Rise and Fall of Citizenship Bryan S. Turner, 2023-10-13 *The Rise and Fall of Citizenship* brings together many of Turner's publications on the topic of citizenship and includes three new chapters reflecting upon conceptions of citizenship today. The collection begins with a newly written overview of the rise of social citizenship with particular reference to the UK and the US from 1945 to the 1980s, which charts the experiences of the Baby Boomers that benefited from the creation of welfare states, post-war reconstruction and the commitment to full employment. The core chapters are based on previously published articles, primarily from *Taylor Francis Citizenship Studies* journal. These chapters examine and critique various sociological and political theories of citizenship and social rights as expounded in the works of R. H. Tawney, J. M. Keynes, T. H. Marshall, Ralf Dahrendorf, Judith Shklar, Peter Townsend, Bernard Crick and Jürgen Habermas, among others. Later chapters bring the concept of citizenship up to date. Since the 1980s, the UK and the US have been radically altered by neoliberal economic policies involving the deindustrialization of capitalism and an emphasis on financial institutions, which have given rise to new patterns of inequality and changing labour markets. In describing where we are now, Turner argues that new forms of employment instability and uncertainty are captured by the idea of the precariat and that citizens now experience their social world as if they were denizens. Turner also considers the impact of demographic changes and increased immigration, widely opposed by populist parties, on conceptions of citizenship. Migration and membership are also examined with reference to issues of dual citizenship, permanent residence and citizenship for cash. The final chapter considers the ongoing relevance of the ancient law of hospitality, positing how the migrant can be considered as an asset rather than a threat. This wide-ranging and thought-provoking collection will be of interest to scholars and students in the humanities and social sciences with a focus on citizenship and rights. *Hammer of the Left* John Golding, 2016-02-16 We went into the general election with an unelectable leader in a state of chaos with a manifesto that might have swept us to victory in cloud cuckoo land, but which was held in contempt in the Britain of 1983. It is said that those who do not learn from

past mistakes are doomed to repeat them and though Golding was describing the Labour Party of the early 1980s he could just as easily have been talking about its situation today A lurch to the left and a party in turmoil the ascension of Jeremy Corbyn as Labour leader will for many trigger only unhappy memories of the dark days of the 1970s and 80s when the party was plagued by a civil war that threatened to end all hopes of re election In that battle moderate elements fought the illiberal hard left for the soul of Labour that they won paving the way for later electoral successes was down to men and women like John Golding In this visceral no holds barred account Golding describes how he took on and helped defeat the Militant Tendency and the rest of the hard left providing not only a vivid portrait of political intrigue and warfare but a timely reminder for the party of today of the dangers of disunity and of drifting too far from electoral reality

A Bibliography of British History, 1914-1989 Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index

Voices of the UK Left Judi Atkins, John Gaffney, 2017-08-10 This book brings together a team of specialists to explore why some left wing politicians are able to communicate their message effectively whereas others struggle to connect with the public To address this question it analyses the rhetoric and narratives employed by figures from British and Welsh Labour the Green Party the Scottish National Party and the radical left as well as the anti austerity movement In doing so the collection offers insights into why the performances of political actors such as Carwyn Jones and Nicola Sturgeon resonate with a wide audience whereas some like Jeremy Corbyn have limited appeal beyond the party faithful The volume provides an accessible examination of the language and ideas of the UK left while offering a novel perspective on the challenges currently facing the Labour Party It will therefore appeal to a wide readership including scholars and students of rhetoric ideology political leadership and British politics

The Spirit of '68 Gerd-Rainer Horn, 2008-10-02 In virtually all corners of the Western world 1968 witnessed a highly unusual sequence of popular rebellions In Italy France Spain Vietnam the United States West Germany Czechoslovakia Mexico and elsewhere millions of individuals took matters into their own hands to counter imperialism capitalism autocracy bureaucracy and all forms of hierarchical thinking Recent reinterpretations have sought to play down any real challenge to the socio political status quo in these events but Gerd Rainer Horn s book offers a spirited counterblast 1968 he argues opened up the possibility that economic and political elites on both sides of the Iron Curtain could be toppled from their position of unnatural superiority to make way for a new society where everyday people could for the first time become masters of their own destiny Furthermore Horn contends the moment of crisis and opportunity culminating in 1968 must be seen as part of a larger period of experimentation and revolt The ten years between 1956 and 1966 characterised above all by the flourishing of iconoclastic cultural rebellions can be regarded as a preparatory period which set the stage for the non conformist cum political revolts of

the subsequent red decade 1966-1976. Horn's geographic centres of attention are Western Europe including the first full examination of Mediterranean revolts and North America. He placed particular emphasis on cultural nonconformity, the student movement, working class rebellions, the changing contours of the Left and the meaning of participatory democracy. His book will make fascinating reading for anyone interested in this turbulent period and the fundamental changes that were wrought upon societies either side of the Atlantic.

Class, Politics, and the Decline of Deference in England, 1968-2000 Florence Sutcliffe-Braithwaite, 2018. In late twentieth century England inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power. Neither interpretation is satisfactory: class remained important to ordinary people's narratives about social change and their own identities throughout the period 1968-2000 but in changing ways. Using self-narratives drawn from a wide range of sources, the raw materials of sociological studies, transcripts from oral history projects, Mass Observation and autobiography, the book examines class identities and narratives of social change between 1968 and 2000, showing that by the end of the period class was often seen as an historical identity related to background and heritage and that many felt strict class boundaries had blurred quite profoundly since 1945. Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity, individuality and ordinariness. In fact, Sutcliffe-Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people's attitudes towards class and towards politics. The study also examines the claim that Thatcher and New Labour wrote class out of politics, arguing that this simple and highly political narrative misses important points. Thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the New Labour project was good at listening to voters, particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness. But this did not add up to an abandonment of a majoritarian project as New Labour reoriented their political project to emphasize using the state to empower the individual.

The British left and the defence economy Keith Mc Loughlin, 2022-03-29. Forty years before COVID-19, socialists in Britain campaigned for workers to have the right to make socially useful products from hospital equipment to sustain the NHS, to affordable heating systems for the impoverished elderly. This movement held one thing responsible above all else for the nation's problems: the burden of defence spending. In the middle of the Cold War, the left put a direct challenge to the defence industry, the Labour government and trade unions. The response it received revealed much about a military industrial state that prioritised the making and exporting of arms for political favour and profit. Looking at peace activism from the early 1970s to Labour's landslide defeat in the 1983 general election, this book examines the conflict over the cost of Britain's commitment to the Cold War and asserts that the wider left presented a comprehensive and implementable alternative to the stark choice between making weapons and joining the dole queue.
