Handbook of Health Economics A.J. Culyer, J.P. Newhouse, 2000-07-19

What new theories, evidence, and policies have shaped health economics in the 21st century? Editors Mark Pauly, Thomas McGuire, and Pedro Pita Barros assemble the expertise of leading authorities in this survey of substantive issues. In 16 chapters, they cover recent developments in health economics from medical spending growth to the demand for health care, the markets for pharmaceutical products, the medical workforce, and equity in health and health care. Its global perspective, including an emphasis on low and middle income countries, will result in the same high citations that made Volume 1 (2000) a foundational text. Presents coherent summaries of major subjects and methodologies, marking important advances and revisions. Serves as a frequently used non-journal reference. Introduces non-economists to the best research in health economics.

Dilemmas of the Welfare Mix Ugo Ascoli, Costanzo Ranci, 2013-04-17
The 1990s will be remembered in Europe as the period in which privatization assumed significant proportions in the field of welfare policies. In an age of crisis for the welfare state and increased demand for care services, there is now a widespread opinion that future welfare systems will see more and more space occupied by private and nonprofit organizations taking the direct responsibility of providing services and meeting the needs of the clients. A welfare mix is emerging as a system in which government, private, and nonprofit organizations operate in place of the state monopoly. Nonprofit organizations, in particular, have obtained formal recognition as partners of public authorities and professional groups in policy making. An increasing interdependence between state, private, and third sector organizations will characterize next years in all post-industrial societies. Through research in the field of social care in six European countries (France, Germany, Italy, Norway, Spain, and the U.K.), the authors highlight the role of nonprofit and commercial organizations in the new welfare mix systems and main social and institutional effects of such new order. This volume in the Nonprofit and Civil Society Studies series is the first attempt to bridge the relevant gap existing between the literature on the welfare state and studies on the nonprofit sector.

Improving Healthcare David Hyman, 2007-04-21
Improving Healthcare: A Dose of Competition systematically examines the American health care system from a competition-oriented perspective. The volume surveys the performance of each major sector of the health care system and identifies impediments to more effective competition. Improving Healthcare examines such issues as competition v. regulation, public and private sector approaches to health care financing, cross-subsidies, licensure, provider market concentration, financial and clinical integration, payment for performance, quality, pharmacy benefit managers, direct-to-consumer advertising of pharmaceuticals, certificates of need, mandates, unionization, the significance of organizational status (nonprofit v. for-profit), and the role of antitrust and consumer protection in health care. It offers concrete recommendations to improve the quality and cost effectiveness of the American health care marketplace.
