After Lacan Ankhī Mukherjee, 2018-11-01 This book draws on the distinct phases of Jacques Lacan's career to show his way of thinking in and beyond his lifetime. It is an examination of the past, present and futures of psychoanalysis as these are developed in the dimensions of language, literature, logic, philosophy, visual culture, identity and sexuality and politics. The interdisciplinary approach of the volume allows it to work across clinical, sociological, philosophical and literary fields to both add dimensions to the literary critical reception of Lacan and enable the system of Lacanian psychoanalysis to have a wider conversation. Re-examining the fundamental concepts of Lacanian theory in its historical contexts through the topological structures he inaugurated, After Lacan makes innovative critical interventions in contemporary debates on racism, Islam, the Communist Party, poetry, new media, disability, identity and queer theory. It is a key resource for students, graduates and instructors of literary theory, psychoanalysis and the works of Lacan.

Symmetry as a Developmental Principle in Nature and Art Werner Hahn, 1998 Looking beyond the boundaries of various disciplines, the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges. He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry. Many pictorial examples are included to enable the reader to fully understand the issues discussed. Based on the artistic evidence that the author has collected, he proposes that the new *ars evolutoria* can function as an example for the sciences. The book is divided into three distinct parts, each one focusing on a special issue. In Part I, the phenomenon of symmetry, including its discovery and meaning, is reviewed. The author looks closely at how Vitruvius, Polyclitus, Democritus, Plato, Aristotle, Plotinus, Augustine, Alberti, Leonardo da Vinci and Dürer viewed symmetry. This is followed by an explanation on how the concept of symmetry developed. The author further discusses symmetry as it appears in art and science as well as in the modern age. Later, he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science. In Part II, he covers the points of contact between the form-developing process in nature and art. He deals with biological questions in particular evolution. The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry. In Part III, the author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles. He demonstrates symmetry as a far-reaching, leading, structuring causal element of evolution as the idea lying behind nature and culture. Numerous controllable, reproducible, double mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception.

Bakhtin Between East and West Karine Zbinden, 2006 Mikhail Bakhtin 1895-1975 has had an enormous influence on

literary studies and cultural theory Bakhtin between East and West Cross Cultural Transmission looks beyond the concepts of carnival and dialogue and traces for the first time the transformation of the Bakhtin Circle's thought from its introduction to the West in Julia Kristeva's seminal late 1960s theory of intertextuality through Tzvetan Todorov's landmark study and on to contemporary interpretations The notion of sociality in all its problematic complexity provides the red thread guiding us through this historical and thematic examination of Western and Russian Bakhtin studies As a critical evaluation of Bakhtin scholarship across various cultures and a celebration of the vigour of the Circle's legacy this is an invaluable resource for scholars and students with an interest in Bakhtin and critical theory

Heterotopia and the City Michiel Dehaene,Lieven De Cauter,2008-05-15 Heterotopia literally meaning other place is a rich concept in urban design that describes a space that is on the margins of ordered or civil society and one that possesses multiple fragmented or even incompatible meanings The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since Heterotopia and the City seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world in museums theme parks malls holiday resorts gated communities wellness hotels and festival markets With theoretical contributions on the concept of heterotopia including a new translation of Foucault s influential 1967 text Of Other Space and essays by well known scholars the book comprises a series of critical case studies from Beaubourg to Bilbao which probe a range of post urban transformations and which redirect the debate on the privatization of public space Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized postcivil condition through case studies on Jakarta Dubai and Kinshasa Heterotopia and the City provides a

collective effort to reposition heterotopia as a crucial concept for contemporary urban theory The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post historical era Planners architects cultural theorists urbanists and academics will find this a valuable contribution to current critical argument
